

VCE SC-401 Dumps - Valid SC-401 Exam Topics

What's more, part of that SureTorrent SC-401 dumps now are free: <https://drive.google.com/open?id=1mRuQkxSv8tGuYO4KwKf5uzektn0jpHaW>

The experts in our company have been focusing on the SC-401 examination for a long time and they never overlook any new knowledge. The content of our study materials has always been kept up to date. Don't worry if any new information comes out after your purchase of our SC-401 study guide. We will inform you by E-mail when we have a new version. With our great efforts, our study materials have been narrowed down and targeted to the SC-401 examination. So you don't need to worry about wasting your time on useless SC-401 exam materials information.

The design of our SC-401 learning materials is ingenious and delicate. Every detail is perfect. For example, if you choose to study our learning materials on our windows software, you will find the interface our learning materials are concise and beautiful, so it can allow you to study SC-401 learning materials in a concise and undisturbed environment. In addition, you will find a lot of small buttons, which can give you a lot of help. Some buttons are used to hide or show the answer. What's more important is that we have spare space, so you can take notes under each question in the process of learning SC-401 Learning Materials.

Microsoft VCE SC-401 Dumps - Realistic Valid Administering Information Security in Microsoft 365 Exam Topics

In modern society, whether to obtain SC-401 certification has become a standard to test the level of personal knowledge. Many well-known companies require the SC-401 certification at the time of recruitment. Whether you're a student or a white-collar worker, you're probably trying to get the certification in order to get more job opportunities or wages. If you are one of them, our SC-401 Exam Guide will effectively give you a leg up.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.
Topic 2	<ul style="list-style-type: none"> • Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 3	<ul style="list-style-type: none"> • Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.
Topic 4	<ul style="list-style-type: none"> • Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q241-Q246):

NEW QUESTION # 241

You have two Microsoft 365 subscriptions named Contoso and Fabrikam. The subscriptions contain the users shown in the following table.

Name	Subscription	Email address
User1	Contoso	user1@contoso.com
User2	Contoso	user2@contoso.com
User3	Fabrikam	user3@fabrikam.com
User4	Fabrikam	user4@fabrikam.com

You have a sensitivity label named Sensitivity1 as shown in the exhibit. (Click the Exhibit tab) you have the files shown in the following table.

Name	Microsoft Sensitivity1
File1	Automatically applied by using an auto-labeling policy
File2	Applied by User2
File3	Applied by User1

For each of the following statements, select yes if the statement is true. Otherwise select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can edit rights for File1.	<input type="radio"/>	<input type="radio"/>
User2 can edit rights for File3.	<input type="radio"/>	<input type="radio"/>
User3 can print File2.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area

Statements

User1 can edit rights for File1.

User2 can edit rights for File3.

User3 can print File2.

Yes No

Explanation:

Yes, Yes, No

To determine whether each statement is true or false, let's analyze the provided information step by step based on the sensitivity label settings and the user permissions associated with the files.

Given Information:

Users and Subscriptions:

User1: Contoso subscription, email: user1@contoso.com

User2: Contoso subscription, email: user2@contoso.com

User3: Fabrikam subscription, email: user3@fabrikam.com

User4: Fabrikam subscription, email: user4@fabrikam.com

Files and Sensitivity Label Application:

File1: Automatically applied Sensitivity1 using an auto-labeling policy File2: Applied by User2 File3: Applied by User1 Sensitivity Label (Sensitivity1) Assumptions: Since the exhibit for the sensitivity label is not fully detailed, we need to make reasonable assumptions based on typical Microsoft 365 sensitivity label behavior.

Sensitivity labels can restrict access based on user permissions, subscription boundaries, or specific configurations (e.g., allowing only users within the same organization to edit or view). Given the context of two separate subscriptions (Contoso and Fabrikam), it's likely that Sensitivity1 restricts access to users within the same subscription unless explicitly configured otherwise. A common default for such labels is to allow editing and other rights only to users within the applying user's organization, with possible restrictions for cross-subscription access.

Key Assumptions:

Sensitivity1 likely encrypts the files and restricts editing rights to users within the same subscription as the user who applied the label or where the auto-labeling policy is configured.

File1 (auto-applied) would inherit permissions based on the policy, likely restricting access to Contoso users if the policy is set up within the Contoso subscription.

File2 (applied by User2 from Contoso) would restrict access to Contoso users.

File3 (applied by User1 from Contoso) would also restrict access to Contoso users.

Users from Fabrikam (User3, User4) would not have edit rights unless explicitly granted, which is unlikely given the separation of subscriptions.

Statement Analysis:

User1 can edit rights for File1.

File1 was automatically applied with Sensitivity1 using an auto-labeling policy. Since the policy is likely configured within the Contoso subscription (where User1 resides), User1, as a Contoso user, should have edit rights unless the policy explicitly restricts this. Given User1's affiliation with Contoso, this is typically allowed.

The answer: Yes

User2 can edit rights for File3.

File3 was applied by User1, who is from the Contoso subscription. Since User2 is also from the Contoso subscription, they should have edit rights unless the label configuration explicitly denies this for other users within the same subscription. Typically, users within the same organization can edit files labeled by another user from the same organization.

The answer: Yes

User3 can print File2.

File2 was applied by User2, who is from the Contoso subscription. Sensitivity1 likely restricts access to Contoso users only. User3 is from the Fabrikam subscription, which is a separate entity. Unless cross-sub Answer : No

NEW QUESTION # 242

You are creating a DLP policy named Policy1 that will be applied to the locations as shown in the following exhibit.

Choose where to apply the policy

We'll apply the policy to data that's stored in the locations you choose.

Protecting sensitive info in on-premises repositories (SharePoint sites and file shares) is now in preview. Note that there are prerequisite steps needed to support this new capability. [Learn more about the prerequisites](#)

Location	Scope	Actions
<input checked="" type="checkbox"/> Exchange email	All groups	Edit
<input checked="" type="checkbox"/> SharePoint sites	All sites	Edit
<input checked="" type="checkbox"/> OneDrive accounts	All users & groups	Edit
<input checked="" type="checkbox"/> Teams chat and channel messages	All users & groups	Edit
<input checked="" type="checkbox"/> Instances	All instances	Edit
<input checked="" type="checkbox"/> On-premises repositories	All repositories	Edit

Fabric and Power BI workspaces

Policy1 contains an advanced data loss prevention (DLP) rule named Rule1.

Which two conditions can you use in Rule1? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Document property is
- B. Content is shared from Microsoft 365
- C. Attachment's file extension is
- D. Content contains
- E. Document size equals or is greater than

Answer: B,D

Explanation:

You are creating a Data Loss Prevention (DLP) policy in Microsoft 365 with advanced rules. Advanced DLP rules provide more granular conditions and actions than standard DLP rules.

Conditions available in advanced DLP

According to Microsoft Docs on Conditions in DLP policies:

* # Content contains # Used to detect sensitive information types, keywords, or exact data matches.

This is one of the most common and fundamental DLP conditions.

* # Content is shared from Microsoft 365 # Used to detect whether content has been shared externally or with specific domains/users. This is a modern advanced DLP condition.

Why the others are not correct:

* A. Document property is # This condition applies to information governance retention policies /labels (not DLP). Not available in DLP rules.

* B. Attachment's file extension is # This is supported in Exchange mail flow rules (transport rules) but not in advanced DLP rules.

* C. Document size equals or is greater than # Also applies in Exchange transport rules and certain SharePoint restrictions, but not available as a DLP rule condition.

NEW QUESTION # 243

You have a Microsoft SharePoint Online site named Site1 that contains the files shown in the following table.

Name	Number of IP addresses in the file
File1	2
File2	3

You have a data loss prevention (DLP) policy named DLP1 that has the advanced DLP rules shown in the following table.

Name	Content contains	Policy tip	If match, stop processing	Priority
Rule1	1 or more IP addresses	Tip1	No	0
Rule2	3 or more IP addresses	Tip2	Yes	1
Rule3	2 or more IP addresses	Tip3	No	2

You apply DLP1 to Site1.

Which policy tips will appear for File2?

- A. Tip3 only
- B. Tip1 only
- C. Tip1 and Tip2 only
- D. Tip2 only

Answer: D

Explanation:

Comprehensive Detailed Explanation with References

Step 1 - Review File2 contents

File2 contains 3 IP addresses.

Step 2 - Review DLP rules and priorities

RuleConditionPolicy TipStop Processing?Priority

Rule1 1 or more IP addresses Tip1 No 0

Rule2 3 or more IP addresses Tip2 Yes 1

Rule3 2 or more IP addresses Tip3 No 2

Step 3 - Rule evaluation order

Advanced DLP rules are processed by priority order (lowest number first).

Rule1 (Priority 0) will trigger because File2 has at least 1 IP address.

This applies Tip1.

However, Rule1 has Stop Processing = No, so evaluation continues.

Rule2 (Priority 1) will also trigger because File2 has 3 IP addresses (#3).

This applies Tip2.

Rule2 has Stop Processing = Yes, so evaluation stops after this.

Rule3 (Priority 2) will not be evaluated because Rule2 stopped processing.

Step 4 - Final outcome

File2 matches Rule1 (Tip1), but since Rule2 fires afterward with Stop Processing = Yes, only Tip2 is applied.

Step 5 - Microsoft Reference

From Microsoft docs: "When a rule is configured to stop processing, subsequent rules are not evaluated and only the policy tip from the last triggered rule with stop processing applies." Reference: Order of rule processing in DLP policies

NEW QUESTION # 244

Hotspot Question

You have a Microsoft 365 E5 tenant that contains the objects shown in the following table.

Name	Type
Project1	Microsoft Teams team
Sales	Microsoft Teams channel
User1	User

You need to restore a Microsoft Word document that was deleted from the Sales channel by User1.

From where can the document be restored, and how long will the document be retained if it is NOT restored? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Restored from:

Microsoft Teams
Microsoft OneDrive
Microsoft Exchange Online
Microsoft SharePoint Online

Retained for:

10 days
30 days
93 days

Answer:

Explanation:

Answer Area

Restored from:

Microsoft Teams
Microsoft OneDrive
Microsoft Exchange Online
Microsoft SharePoint Online

Retained for:

10 days
30 days
93 days

Explanation:

Box 1: Microsoft Teams

Restore items in the recycle bin that were deleted from SharePoint or Teams. When you delete items from a document library or list in Microsoft Teams or SharePoint, they aren't immediately removed. Deleted items go into the SharePoint site recycle bin for a period of time or until they are emptied from the recycle bin. The SharePoint site recycle bin isn't the same as the Windows recycle bin that you see on your desktop.

Box 2: 30 days

Restore a shared library

SharePoint in Microsoft 365 Microsoft Teams

If lots of your SharePoint or Microsoft Teams files get deleted, overwritten, corrupted, or infected by malware, you can restore an entire shared document library to a previous time. The restore will undo all the actions that occurred on both files and folders in the last 30 days.

If your entire library was deleted, see Restore items in the Recycle Bin of a SharePoint site. If you want to correct issues with individual files one at a time, you can restore deleted items or restore a previous version of an item.

Reference:

<https://support.microsoft.com/en-us/office/restore-items-in-the-recycle-bin-that-were-deleted-from-sharepoint-or-teams-6d466b6-55f2-4898-8d6e-c0dff851a0be>

<https://support.microsoft.com/en-us/office/restore-a-shared-library-317791c3-8bd0-4dfd-8254-3ca90883d39a>

NEW QUESTION # 245

You have a Microsoft 365 E5 subscription that contains a trainable classifier named Trainable1. You plan to create the items shown in the following table.

Name	Type
Label1	Sensitivity label
Label2	Retention label
Policy1	Retention label policy
DLP1	Data loss prevention (DLP) policy

Which items can use Trainable 1?

- A. Label1 and Label2 only
- B. Label1, Label2, Policy1, and DLP1
- C. Label2 only
- **D. Label2, Policy1, and DLP1 only**
- E. Label1 and Policy1 only

Answer: D

Explanation:

A trainable classifier in Microsoft Purview is used to automatically identify and classify unstructured data based on content patterns. The classifier can be used in:

1. Retention Labels (Label2) # Supported

Trainable classifiers can be linked to retention labels to automatically classify and apply retention policies to documents.

2. Retention Label Policies (Policy1) # Supported

Retention label policies define how and where retention labels are applied, including automatically using trainable classifiers.

3. Data Loss Prevention (DLP) Policies (DLP1) # Supported

Trainable classifiers can be used in DLP policies to detect and protect sensitive content automatically.

NEW QUESTION # 246

.....

SureTorrent Microsoft SC-401 preparation material is a comprehensive solution for Microsoft SC-401 test preparation, with a variety of features aimed to help you earning the SC-401. The SC-401 test is a required step in getting the Administering Information Security in Microsoft 365 certification badge. With SureTorrent, you will get access to Microsoft SC-401 Actual Questions that will allow you to focus on important concepts and prepare for the Microsoft exam in a short period of time.
