

# New Guide F5CAB4 Files | F5CAB4 Top Questions

Our F5CAB4 exam questions are compiled by experts and approved by the professionals with years of experiences. They are revised and updated according to the change of the syllabus and the latest development situation in the theory and practice. The language is easy to be understood which makes any learners have no obstacles and our F5CAB4 Guide Torrent is suitable for anyone. The content is easy to be mastered and has simplified the important information. Our F5CAB4 test torrents convey more important information with less questions and answers and thus make the learning relaxing and efficient.

Our F5CAB4 practice dumps is high quality product revised by hundreds of experts according to the changes in the syllabus and the latest developments in theory and practice, it is focused and well-targeted, so that each student can complete the learning of important content in the shortest time. With F5CAB4 training prep, you only need to spend 20 to 30 hours of practice before you take the F5CAB4 exam

## Quiz High Hit-Rate F5 - New Guide F5CAB4 Files

During the prolonged review, many exam candidates feel wondering attention is hard to focus. But our F5CAB4 real exam is high efficient which can pass the F5CAB4 exam during a week. To prevent you from promiscuous state, we arranged our F5CAB4 Learning Materials with clear parts of knowledge. Besides, without prolonged reparation you can pass the F5CAB4 exam within a week long. Everyone's life course is irrevocable, so missing the opportunity of this time will be a pity.

## F5 BIG-IP Administration Control Plane Administration Sample Questions (Q52-Q57):

### NEW QUESTION # 52

What can the BIG-IP Administrator do when restoring BIG-IP configuration files with a UCS archive?  
(Choose two answers)

- A. The BIG-IP Administrator can restore a UCS archive on a BIG-IP system running a later software version than the version of software the UCS archive was created on.
- B. The BIG-IP Administrator can restore a UCS archive on a BIG-IP system on a different platform.
- C. The BIG-IP Administrator can only restore a UCS archive on a BIG-IP system running the same version.
- D. The BIG-IP Administrator can only restore the UCS archive to the same system from which it was saved.

**Answer: A,B**

Explanation:

The User Configuration Set (UCS) is a flexible tool designed by the Control Plane to handle various lifecycle management scenarios, including upgrades and hardware migrations.

\* Version Compatibility (Option B): TMOS is designed to be backward compatible. The Control Plane can ingest a UCS file created on an older version of software and automatically upgrade the configuration objects to match the current, later version during the restore process.

\* Platform Portability (Option C): While a UCS archive contains platform-specific information, the BIG-IP system allows for "platform-independent" restores. This is a vital procedural concept for migrating from one hardware model to another or from physical hardware to a Virtual Edition (VE).

\* Management of State: When restoring to a different platform or a later version, the administrator often uses specific flags (such as no-license or platform-migrate in later versions) to ensure that only the portable configuration data is applied while preserving the new platform's unique identifiers.

#### NEW QUESTION # 53

An LTM device has a virtual server mapped to www.f5.com. Users report that when they connect to /resources/201.1.2h.l\_l.com they are unable to receive content. What is the likely cause of the issue?

- A. The virtual address does not have ARP enabled.
- B. The virtual address does not have route advertising enabled.
- C. The pool associated with the virtual server is failing its health check.
- D. The pool associated with the virtual server does not have priority group activation enabled.

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: The Control Plane is responsible for ARP (Address Resolution Protocol) management for Virtual Addresses. For a Virtual Server to be reachable, the BIG-IP must respond to ARP requests for that IP. If the "ARP" setting is disabled on the Virtual Address properties, upstream routers cannot resolve the MAC address of the BIG-IP, leading to connectivity failure even if the service itself is "Available."

#### NEW QUESTION # 54

In the BIG-IP Configuration Utility, where can an administrator go to view a real-time, graphical overview of system performance, including CPU usage, memory utilization, and network throughput?

- A. Local Traffic > Virtual Servers
- B. Statistics > Dashboard
- C. Network > Interfaces
- D. Device Management > Overview

**Answer: B**

Explanation:

The Statistics Dashboard is the primary graphical interface used by administrators to monitor the real-time performance and health of the BIG-IP system.

\* System-Wide Overview: Navigating to Statistics > Dashboard provides a centralized view of critical system-level metrics, including global CPU utilization (across all TMM instances and the Linux host) and total memory usage.

\* Performance Tracking: In addition to CPU and memory, the dashboard displays other vital statistics such as total active connections, throughput (bits/packets per second), SSL transactions per second (TPS), and compression efficiency.

\* Operational Health: Monitoring these metrics from the dashboard allows the administrator to quickly identify performance trends or resource exhaustion that could impact the Control Plane or Data Plane stability.

\* Comparison to Other Menus:

\* Local Traffic > Virtual Servers: Provides statistics specific to traffic objects rather than global system resources.

\* Network > Interfaces: Shows physical layer statistics like link status, errors, and drops for specific ports.

\* Device Management > Overview: Focuses on high availability (HA) states, synchronization status, and device trust rather than granular performance metrics.

#### NEW QUESTION # 55

The BIG-IP Administrator generates a qkview using "qkview -s0" and needs to transfer the output file via SCP. Which directory contains the output file?

- A. /var/config
- B. /var/tmp
- C. /var/local
- D. /var/log

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: A QKView is a comprehensive snapshot of the device's Control Plane state, configuration, and logs used for troubleshooting. By default, the qkview utility stores its generated output file in the /var/tmp/ directory. Administrators must know this path to retrieve the file for upload to F5 iHealth or Support.

#### NEW QUESTION # 56

The BIG-IP Administrator runs the command:

```
netstat -an | grep 443
```

and sees the following output:

```
tcp 0 0 0.0.0.0:443 0.0.0.0:* LISTEN
```

What does this output indicate about the service on port 443? (Choose one answer)

- **A. The service is actively listening on all interfaces for HTTPS traffic.**
- B. The service is in a standby state and unable to accept connections.
- C. The service is actively listening only on the loopback interface.
- D. The service indicates no connections to the LISTEN port.

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents:

In netstat output:

0.0.0.0:443 means the service is bound to all available IPv4 interfaces on the system.

LISTEN indicates the service is actively waiting for incoming connection requests.

Therefore, this output confirms that a service (commonly HTTPS/443, such as the BIG-IP Configuration Utility or an application listener) is actively listening on all interfaces, making B the correct answer.

Why the other options are incorrect:

A would show 127.0.0.1:443 if it were loopback-only.

C is incorrect because LISTEN explicitly indicates readiness to accept connections.

D is unrelated; standby state does not affect socket binding shown by netstat.

Hence, the correct answer is B.

#### NEW QUESTION # 57

.....

In the Desktop F5CAB4 practice exam software version of F5 F5CAB4 practice test is updated and real. The software is useable on Windows-based computers and laptops. There is a demo of the F5CAB4 Practice Exam which is totally free. BIG-IP Administration Control Plane Administration (F5CAB4) practice test is very customizable and you can adjust its time and number of questions.
