

2V0-11.25 Review Guide - New 2V0-11.25 Test Braindumps

BTW, DOWNLOAD part of TestKingIT 2V0-11.25 dumps from Cloud Storage: https://drive.google.com/open?id=1Ru7GC3gRJq1wjwQMhWM_ijF-5Kyik05y

Experts at TestKingIT have also prepared VMware 2V0-11.25 practice exam software for your self-assessment. This is especially handy for preparation and revision. You will be provided with an examination environment and you will be presented with actual exam VMware 2V0-11.25 Exam Questions. This sort of preparation method enhances your knowledge which is crucial to excelling in the actual VMware 2V0-11.25 certification exam.

Our company is a professional certificate exam materials provider. We have occupied in the field for years, therefore we have rich experiences. 2V0-11.25 learning materials of us are high-quality, and we receive many good feedbacks from our customers, and they think highly of the 2V0-11.25 Exam Dumps. In order to serve you better, we have online and offline chat service, you can ask any questions about the 2V0-11.25 learning materials. Besides, we provide you with free update for one year after purchasing.

Excellent 2V0-11.25 Review Guide Offers Candidates Well-Prepared Actual VMware VMware Cloud Foundation 5.2 Administrator Exam Products

With our 2V0-11.25 study materials, you can make full use of those time originally spent in waiting for the delivery of exam files so that you can get preparations as early as possible. There is why our 2V0-11.25 learning prep exam is well received by the general public. I believe if you are full aware of the benefits the immediate download of our PDF study exam brings to you, you will choose our 2V0-11.25 actual study guide. Just come and buy it! You will be surprised about our high quality.

VMware 2V0-11.25 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Troubleshoot and Optimize the VMware by Broadcom Solution: This section of the exam measures skills of the cloud infrastructure support engineer and covers diagnosing and resolving technical issues related to VMware Cloud Foundation deployment and operations. It includes troubleshooting the deployment process, vSphere, networking, vSAN, SDDC Manager, and Aria Suite. The section also evaluates the ability to optimize infrastructure performance, manage resources, and ensure efficient operation, focusing on the practical aspects of maintaining and enhancing VMware Cloud Foundation environments.
Topic 2	<ul style="list-style-type: none"> • Install, Configure, Administrate the VMware by Broadcom Solution: This section of the exam measures skills of the VMware Cloud Foundation administrator and covers the installation and configuration processes for VMware Cloud Foundation components, deploying and configuring management domains, NSX Edge Clusters, and the VMware Aria Suite Lifecycle. It assesses the ability to deploy workload domains, enable vSphere IaaS control plane, create vSphere namespaces, manage stretched clusters, and use VMware Cloud Foundation APIs. Candidates are also tested on scaling deployments, performing Day 2 operations like backup, recovery, lifecycle management, VM lifecycle management, configuring networking and storage, managing ESXi hosts, implementing encryption, and operationalizing VMware NSX, vSAN, and Aria Suite. The section is comprehensive, targeting those responsible for the ongoing administration and optimization of VMware environments.
Topic 3	<ul style="list-style-type: none"> • VMware by Broadcom Solution: This section of the exam measures skills of the cloud administrator and covers identifying VMware Cloud Foundation components like vSphere, vSAN, and NSX, as well as their architecture, including stretched configurations. It also assesses knowledge of requirements for implementing private cloud solutions, use cases for VMware Aria Suite components, vSphere IaaS control plane, Data Services Manager, and VMware Cloud Foundation Add-Ons. The focus is on the ability to recognize and apply the correct VMware solutions for various enterprise scenarios.
Topic 4	<ul style="list-style-type: none"> • IT Architectures, Technologies, Standards: There are no testable objectives in this section. However, this area establishes the foundational knowledge expected of cloud administrators, such as understanding basic IT infrastructure, virtualization, and cloud models. This section is relevant for cloud administrators and infrastructure engineers.
Topic 5	<ul style="list-style-type: none"> • Plan and Design the VMware by Broadcom Solution: There are no testable objectives in this section. Still, it is intended for solution architects who need to plan and design VMware Cloud Foundation deployments, focusing on sizing, architecture selection, and network • storage design.

VMware Cloud Foundation 5.2 Administrator Sample Questions (Q17-Q22):

NEW QUESTION # 17

An administrator needs to create a custom role in vCenter Server that is part of VMware Cloud Foundation environment to grant specific privileges to a group of users.

Which two actions should be taken to create this custom role? (Choose two.)

- A. Assign permissions to the custom role before adding privileges.
- B. Clone an existing role in SDDC Manager to create the custom role.
- C. Apply the custom role to the root of the vCenter Server inventory/.
- D. Navigate to the Roles section in the vSphere Client.
- E. Choose the privileges required for the custom role.

Answer: D,E

Explanation:

When creating a custom role, it is essential to choose the appropriate privileges that the role will require.

These privileges define what actions the users in the role can perform.

To create and manage roles, you need to navigate to the "Roles" section in the vSphere Client. This is where roles are defined and assigned within the vCenter Server.

NEW QUESTION # 18

What are three prerequisites for deploying an NSX Edge cluster in a VMware Cloud Foundation solution?
(Choose three.)

- A. Set up vSAN storage policies for the Edge VMs.
- B. Assign separate VLAN IDs and subnets for the NSX host overlay and NSX Edge overlay networks.
- C. Verify that the NSX host overlay VLAN and NSX Edge overlay VLAN are routed to each other.
- D. Create DNS entries for the NSX Edge nodes.
- E. Install Aria Operations and enable Edge Cluster monitoring.

Answer: B,C,D

Explanation:

The NSX host overlay VLAN and NSX Edge overlay VLAN need to be routed to each other to ensure proper communication between the host and NSX Edge clusters.

DNS entries for the NSX Edge nodes are required to enable name resolution, which is important for the proper functioning of the NSX Edge cluster.

Assigning separate VLAN IDs and subnets for the NSX host overlay and NSX Edge overlay networks is necessary to maintain network isolation and optimize traffic flow between components.

NEW QUESTION # 19

An administrator has deployed a new VMware Cloud Builder appliance using the downloaded OVF file.

While attempting to use the VMware Cloud Builder interface, the administrator discovers that no connection can be established to the appliance.

Which three configuration errors may have occurred? (Choose three.)

- A. Incorrect Dynamic IP configuration.
- B. Incorrect Static IP configuration.
- C. Incorrect DNS settings or inaccessible DNS servers.
- D. VLAN misconfiguration.
- E. Incorrect NTP settings or inaccessible NTP servers.
- F. BGP routing misconfiguration.

Answer: B,C,D

Explanation:

A VLAN misconfiguration could prevent proper network connectivity, particularly if the appliance is not in the correct VLAN or if there is a misalignment in network segmentation.

Incorrect DNS settings or inaccessible DNS servers can prevent the VMware Cloud Builder appliance from being able to resolve hostnames, leading to connection issues.

Incorrect Static IP configuration would result in the appliance being unreachable because it won't have the correct IP address or network configuration to communicate with other components.

NEW QUESTION # 20

What is the first step to take when updating the vSAN database in a VMware Cloud Foundation environment?

- A. Download the latest HCL database from VMware
- B. Check the VMware Compatibility Guide for supported versions
- C. Place the vSAN cluster in maintenance mode
- D. Backup the vSAN database

Answer: D

Explanation:

The first step when updating the vSAN database (or performing any update to the vSAN environment) is to back up the vSAN database. This ensures that if any issues arise during the update process, the administrator can restore the environment to a previous state. This step is crucial to ensure data protection and prevent data loss.

NEW QUESTION # 21

What are the two types of virtual networks that the Administrator could configure to support the deployment? (Choose two.)

- Answer: A,C**

Overlay-backed NSX Segments use NSX to create virtual networks overlaid on existing physical networks, which is essential for network virtualization and communication between virtual machines, especially in a VMware Cloud Foundation environment.
