

Exam CC Simulator - Reliable CC Dumps Questions

P.S. Free 2026 ISC CC dumps are available on Google Drive shared by ExamDiscuss: <https://drive.google.com/open?id=1sqnpzdwUZOq6f75ZIC7aE0h41942fPfl>

As we know that if you have an outstanding certification you will have more opportunities for application and promotion, many companies think highly of golden certifications, it will be a step-stone to some great positions. Our website ExamDiscuss is engaging in providing high-pass-rate CC Exam Guide torrent to help candidates clear CC exam easily and obtain certifications as soon as possible. We are engaging in this line more than 8 years on the CC exam questions. Thousands of candidates choose us and achieve their goal every year.

The privacy protection of users is an eternal issue in the internet age. Many illegal websites will sell users' privacy to third parties, resulting in many buyers are reluctant to believe strange websites. But you don't need to worry about it at all when buying our CC study materials. We assure you that we will never sell users' information because it is damaging our own reputation. In addition, when you buy our CC Study Materials, our website will use professional technology to encrypt the privacy of every user to prevent hackers from stealing.

Reliable CC Dumps Questions - New CC Dumps Ppt

All the ExamDiscuss ISC CC practice questions are real and based on actual Certified in Cybersecurity (CC) (CC) exam topics. The web-based Certified in Cybersecurity (CC) (CC) practice test is compatible with all operating systems like Mac, IOS, Android, and Windows. Because of its browser-based Certified in Cybersecurity (CC) (CC) practice exam, it requires no installation to proceed further. Similarly, Chrome, IE, Firefox, Opera, Safari, and all the major browsers support the Certified in Cybersecurity (CC) (CC) practice test.

ISC CC Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Business Continuity (BC), Disaster Recovery (DR) & Incident Response Concepts: This domain targets Business Continuity Planners and Incident Response Coordinators. It focuses on the purpose, importance, and core components of business continuity, disaster recovery, and incident response. Candidates learn how to prepare for and manage disruptions while maintaining or quickly restoring critical business operations and IT services.
Topic 2	<ul style="list-style-type: none">Access Control Concepts: This section measures skills of Access Control Specialists and Physical Security Managers in understanding physical and logical access controls. Topics include physical security measures like badge systems, CCTV, monitoring, and managing authorized versus unauthorized personnel. Logical access control concepts such as the principle of least privilege, segregation of duties, discretionary access control, mandatory access control, and role-based access control are essential for controlling information system access.

Topic 3	<ul style="list-style-type: none"> • Security Operations: This area targets Security Operations Center (SOC) Analysts and System Administrators. It covers data security with encryption methods, secure handling of data including classification and retention, and the importance of logging and monitoring security events. System hardening through configuration management, baselines, updates, and patching is included. Best practice security policies such as data handling, password, acceptable use, BYOD, change management, and privacy policies are emphasized. Finally, the domain highlights security awareness training addressing social engineering awareness and password protection to foster a security-conscious organizational culture.
Topic 4	<ul style="list-style-type: none"> • Security Principles: This section of the exam measures skills of Security Analysts and Information Assurance Specialists and covers fundamental security concepts such as confidentiality, integrity, availability, authentication methods including multi-factor authentication, non-repudiation, and privacy. It also includes understanding the risk management process with emphasis on identifying, assessing, and treating risks based on priorities and tolerance. Candidates are expected to know various security controls, including technical, administrative, and physical, as well as the ISC2 professional code of ethics. Governance processes such as policies, procedures, standards, regulations, and laws are also covered to ensure adherence to organizational and legal requirements.
Topic 5	<ul style="list-style-type: none"> • Network Security: This domain assesses the knowledge of Network Security Engineers and Cybersecurity Specialists. It covers foundational computer networking concepts including OSI and TCP • IP models, IP addressing, and network ports. Candidates study network threats such as DDoS attacks, malware variants, and man-in-the-middle attacks, along with detection tools like IDS, HIDS, and NIDS. Prevention strategies including firewalls and antivirus software are included. The domain also addresses network security infrastructure encompassing on-premises data centers, design techniques like segmentation and defense in depth, and cloud security models such as SaaS, IaaS, and hybrid deployments.

ISC Certified in Cybersecurity (CC) Sample Questions (Q61-Q66):

NEW QUESTION # 61

Which of the following is a subject?

- A. Filename
- B. File
- C. Fence
- **D. User**

Answer: D

Explanation:

A subject in cybersecurity is an active entity that initiates actions and requests access to resources. Among the options provided, a user is the correct example of a subject because users actively authenticate, request access, and perform operations on systems. Files and filenames are objects, not subjects. They are passive entities that store data and do not initiate actions. A fence is a physical security control and does not function as a subject within access control models.

Subjects can include human users, system processes, applications, or services acting on behalf of users. In access control decisions, systems evaluate whether a subject is authorized to perform a specific action on an object based on identity, role, or security label. Understanding the distinction between subjects and objects is essential for designing secure systems and implementing access control policies. It supports core principles such as least privilege and separation of duties. Without clearly identifying subjects, organizations cannot accurately enforce permissions, monitor activity, or perform effective auditing and incident response.

NEW QUESTION # 62

Which addresses reserved for internal network use and are not routable on the internet.

- A. ccOO:: to cdff:ffff:ffff:ffff:ffff:ffff
- **B. fcOO:: to fdff:ffff:ffff:ffff:ffff:ffff**
- C. acOO:: to adff:ffff:ffff:ffff:ffff:ffff
- D. bcOO:: to bdff:ffff:ffff:ffff:ffff:ffff

Answer: B

NEW QUESTION # 63

For our authentication, we are looking at knowledge factors. Which is the MOST common knowledge factor in use today?
Response:

- A. Passwords.
- B. One-time passwords.
- C. Pass phrase.
- D. PINs.

Answer: A

NEW QUESTION # 64

What is the term used to denote the inherent set of privileges assigned to a user upon the creation of a new account?

- A. Aggregation
- B. Transitivity
- C. Baseline
- D. Entitlement

Answer: C

NEW QUESTION # 65

Cheryl is browsing the Web. Which of the following protocols is she probably using?

- A. HTTP (Hypertext Transfer Protocol)
- B. FTP (File Transfer Protocol)
- C. TFTP (Trivial File Transfer Protocol)
- D. SNMP (Simple Network Management Protocol)

Answer: A

NEW QUESTION # 66

.....

If you visit our website ExamDiscuss, then you will find that our CC practice questions are written in three different versions: PDF version, Soft version and APP version. All types of CC training questions are priced favorably on your wishes. Obtaining our CC Study Guide in the palm of your hand, you can achieve a higher rate of success. Besides, there are free demos of our CC learning guide for your careful consideration to satisfy individual needs.
