Salesforce Process Automation Accredited Professional Sample Questions (Q131-Q136):

NEW QUESTION # 131

The Administrator is creating a login flow for a new application which will be deployed on Salesforce. The create an automation logic to help validate the credentials and access. What is the right design for this?

- A. Leverage Screen Flow for displaying the input fields and for handling the post login and process.
- B. Leverage Process Builder with Workflow rules for displaying the input fields and for handling the post login and process.
- C. Leverage Screen Flow for displaying the input fields and autolaunched flow for handling the post login and process
- D. Leverage Screen Flow for displaying the input fields and custom apex triggers for the post login and process.

Answer: A

NEW QUESTION # 132

What does a Constant resource do?

- A. It displays text input.
- B. It allows to configure logic to change the data type.
- C. It displays static text to the user.
- D. It stores a fixed value that can be used throughout the flow.

Answer: D

Explanation:

A Constant resource in Salesforce Flow stores a fixed value that can be used throughout the flow (D). Constants are used to hold values that do not change during the flow's execution, providing a way to reuse static values in multiple places within a flow without the need to redefine them each time. This can simplify flow design and make flows easier to maintain. Reference: Salesforce Help Documentation on Flow Resources.

NEW QUESTION # 133

Which two places can a flow designer distribute a flow with a screen?

- A. Related List
- B. LWC javascript
- C. Utility Bar
- D. Buttons
- E. Lightning Pages

Answer: C,E

Explanation:

A flow with a screen can be distributed in Salesforce by embedding it in Lightning Pages using the Lightning App Builder, which allows for the integration of the flow on Home, Record, App, and other custom pages. Additionally, flows can be added to the Utility Bar of Lightning Apps, providing users with easy access to the flow from the utility bar at the bottom of the Salesforce interface. Reference: Salesforce Help - Add Flows to Lightning Pages

NEW QUESTION # 134

An administrator wants to route an employee's time-off request to their manager for approval. Which tool should the administrator use?

- A. Approvals
- B. Workflow Rules
- C. Process Builder
- D. Flow Builder

Answer: A

NEW QUESTION # 135

What are two valid trigger invocation conditions when creating a trigger that invokes a record-based process?

- A. When a record is deleted.
- B. When a record is updated.

- Answer: B,D**
