With precious time passing away, many exam candidates are making progress with high speed and efficiency with the help of our Information-Technology-Management study guide. You cannot lag behind and with our Information-Technology-Management preparation materials, and your goals will be easier to fix. So stop idling away your precious time and begin your review with the help of our Information-Technology-Management learning quiz as soon as possible, and you will pass the exam in the least time.

Our Information-Technology-Management exam cram has been revised for lots of times to ensure all candidates can easily understand all knowledge parts. In the meantime, the learning process is recorded clearly in the system, which helps you adjust your learning plan. On the one hand, our company has benefited a lot from renovation. Customers are more likely to choose our products. On the other hand, the money we have invested is meaningful, which helps to renovate new learning style of the Information-Technology-Management Exam. So, why not buy our Information-Technology-Management test guide?

## Information-Technology-Management Dump, Latest Information-Technology-Management Test Testking

In the world in which the competition is constantly intensifying, owning the excellent abilities in some certain area and profound knowledge can make you own a high social status and establish yourself in the society. Our product boosts many advantages and varied functions to make your learning relaxing and efficient. The client can have a free download and tryout of our Information-

Technology-Management Exam Torrent before they purchase our product and can download our study materials immediately after the client pay successfully.

## WGU Information Technology Management QGC1 Sample Questions (Q19-Q24):

### NEW QUESTION # 19

Which type of memory describes a special type of rewritable memory that is compact and portable?

- A. Random access
- **B. Flash**
- C. Cache
- D. Read-only

**Answer: B**

Explanation:

Flash memory is a type of non-volatile rewritable memory that is compact and portable. It is commonly used in USB drives, SSDs, and memory cards. Unlike RAM, which loses data when power is off, flash memory retains stored information even without power.

References:

\* Stallings, W. (2015). Computer Organization and Architecture: Designing for Performance. Pearson Education.

\* Tanenbaum, A. S. (2016). Structured Computer Organization. Pearson.

### NEW QUESTION # 20

Which three primary elements of information infrastructure support ongoing operations? Choose 3 answers.

- A. Augmentation plans
- B. Authentication plans
- **C. Business continuity plans**
- **D. Backup and recovery plans**
- **E. Disaster recovery plans**

**Answer: C,D,E**

Explanation:

Primary Elements of Information Infrastructure:

Business Continuity Plans (BCP): Ensure that critical business operations continue during and after a disruption.

Disaster Recovery Plans (DRP): Focus on restoring IT systems and data after a disaster.

Backup and Recovery Plans: Protect against data loss and enable data restoration after failures.

Why Other Options Are Incorrect:

Option B (Augmentation plans): Not a standard element of information infrastructure.

Option C (Authentication plans): Authentication is part of security protocols, not infrastructure support.

:

IT Continuity and Disaster Recovery Frameworks - ISO 22301

Backup and Recovery Best Practices - NIST

### NEW QUESTION # 21

Which software carries out a set of operations on behalf of a user with a degree of independence and employs knowledge of the user's goals?

- A. Ambient digital experience
- B. Virtual assistant
- C. Information of Everything
- **D. Autonomous agent**

**Answer: D**

Explanation:

Understanding Autonomous Agents:

An autonomous agent is a software entity capable of performing tasks on behalf of a user independently.

It employs knowledge of the user's goals and adapts to achieve them.

Examples of Autonomous Agents:

Examples include shopping bots, automated trading systems, and decision-making software.

Why Other Options Are Incorrect:

Option A (Information of Everything): Refers to interconnected data but not software entities.

Option B (Virtual assistant): Virtual assistants interact with users but are not fully autonomous.

Option D (Ambient digital experience): Refers to seamless digital interaction, not task automation.

:

"Autonomous Agents in AI Systems" - IEEE

Adaptive Software and Autonomous Agents - AI Journal

## NEW QUESTION # 22

Which phase of the systems development life cycle (SDLC) includes writing code for the software?

- A. Testing
- B. Design
- C. Deployment
- **D. Development**

**Answer: D**

Explanation:

The Development phase of the SDLC is where programmers write, compile, and build code to create the actual software system. This is based on the specifications created in the design phase.

Option A (Deployment): Involves moving the system to production.

Option B (Testing): Focuses on defect detection and validation.

Option D (Design): Defines technical specifications but does not involve coding.

Thus, the coding occurs in the Development phase.

## NEW QUESTION # 23

What is an advantage of virtualization?

- A. Increases reliance on manual operations
- B. Restricts the availability of resources
- C. Allows for greater workload stagnation
- **D. Reduces the cost of ownership and makes IT simpler to manage**

**Answer: D**

Explanation:

\* Understanding Virtualization:

\* Virtualization is the process of creating virtual versions of physical resources, such as servers, storage, or networks, to maximize their utilization.

\* Cost Reduction and Simplified Management:

\* Virtualization reduces hardware costs by allowing multiple virtual machines to run on a single physical server.

\* It simplifies IT management by enabling easier resource allocation, scaling, and disaster recovery.

\* Why Other Options Are Incorrect:

\* Option A: Virtualization increases resource availability, not restricts it.

\* Option C: Virtualization enhances workload distribution, reducing stagnation.

\* Option D: It reduces reliance on manual operations by enabling automation and centralized control.
