

Seeing The 1Z0-182 Exam Fees, Passed Half of Oracle Database 23ai Administration Associate

P.S. Free & New 1Z0-182 dumps are available on Google Drive shared by PassReview: https://drive.google.com/open?id=1qGjgy59b93Ubw_I03Z3fEjCy-6Vyk6e4

A professional Oracle certification serves as the most powerful way for you to show your professional knowledge and skills. For those who are struggling for promotion or better job, they should figure out what kind of 1Z0-182 Test Guide is most suitable for them. However, some employers are hesitating to choose. We here promise you that our 1Z0-182 certification material is the best in the market, which can definitely exert positive effect on your study. Our Oracle Database 23ai Administration Associate learn tool create a kind of relaxing leaning atmosphere that improve the quality as well as the efficiency, on one hand provide conveniences, on the other hand offer great flexibility and mobility for our customers. That's the reason why you should choose us.

Owing to our high-quality 1Z0-182 real dump sand high passing rate, our company has been developing faster and faster and gain good reputation in the world. Our education experts are adept at designing and researching exam questions and answers of 1Z0-182 study materials. What's more, we can always get latest information resource. Our high passing rate is the leading position in this field. We are the best choice for candidates who are eager to Pass 1Z0-182 Exam and acquire the certification.

Exam 1Z0-182 Book - Actual 1Z0-182 Test Answers

PassReview offers actual and updated 1Z0-182 Dumps after seeing the students struggling to prepare quickly for the test. We have made this product after consulting with a lot of professionals so the students can be successful. PassReview has hired a team of professionals who work on a daily basis without caring about themselves to update the Oracle 1Z0-182 practice material.

Oracle Database 23ai Administration Associate Sample Questions (Q11-Q16):

NEW QUESTION # 11

Examine this command: ALTER DATABASE MOVE DATAFILE '/u01/sales01.dbf' TO '/u02/sales02.dbf'; Which two statements are true?

- A. DML may be performed on tables with one or more extents in this data file during the execution of this command.
- B. Tables with one or more extents in this data file may be queried during the execution of this command.
- C. Compressed objects in sales01.dbf will be uncompressed in sales02.dbf after the move.
- D. It overwrites any existing file with the name sales02.dbf in /u02 by default.
- E. The "TO" clause containing the new file name must be specified even if Oracle Managed Files (OMF) is used.

Answer: A,B

Explanation:

The ALTER DATABASE MOVE DATAFILE command relocates a data file to a new location while the database remains online,

introduced in Oracle 12c and enhanced in subsequent releases like 23ai. Let's evaluate each option:

- A . DML may be performed on tables with one or more extents in this data file during the execution of this command.True. The move operation is online by default in Oracle 23ai, allowing DML (INSERT, UPDATE, DELETE) operations on tables within the data file being moved. The database ensures consistency using redo and undo mechanisms.
- B . It overwrites any existing file with the name sales02.dbf in /u02 by default.False. By default, the command does not overwrite an existing file unless the REUSE clause is specified (e.g., ALTER DATABASE MOVE DATAFILE ... REUSE). Without it, the command fails if the target file exists.
- C . The "TO" clause containing the new file name must be specified even if Oracle Managed Files (OMF) is used.False. When OMF is enabled (via DB_CREATE_FILE_DEST), the TO clause is optional. If omitted, Oracle automatically generates a file name and places it in the OMF destination.
- D . Compressed objects in sales01.dbf will be uncompressed in sales02.dbf after the move.False. The move operation is a physical relocation of the data file; it does not alter the logical structure or compression state of objects within it. Compressed data remains compressed.
- E . Tables with one or more extents in this data file may be queried during the execution of this command.True. The online nature of the move allows queries (SELECT statements) to proceed without interruption, leveraging Oracle's multi-version consistency model.

NEW QUESTION # 12

orcl.dmp contains a full export of the ORCL database. This command is executed to load data from orcl.dmp into the TESTDB database: [oracle@host01 ~] impdp system/oracle SCHEMAS=sh,oe REMAP_SCHEMA=sh:hr DUMPFILE=orcl.dmp EXCLUDE=index TABLE_EXISTS_ACTION=replace LOGFILE=impdp.log Which two statements are true?

- A. It drops and re-creates tables that exist in both ORCL:SH and TESTDB:HR.
- B. It drops and re-creates indexes that exist in both ORCL:SH and TESTDB:HR.
- C. It skips only indexes that exist in both ORCL:SH and TESTDB:HR.
- D. It skips only tables that exist in ORCL:SH and ORCL:OE.
- E. It skips all indexes of ORCL:SH and in both ORCL:SH and TESTDB:HR.

Answer: A,E

Explanation:

- A .False. EXCLUDE=index skips all indexes, not re-creates them.
- B .False. TABLE_EXISTS_ACTION=replace drops and re-creates tables.
- C .True. EXCLUDE=index omits all indexes from import.
- D .True. replace drops and re-creates existing tables.
- E .False. Skips all indexes, not just overlapping ones.

NEW QUESTION # 13

Which two statements describe why Database Auditing is a security requirement?

- A. To alert DBAs about system issues.
- B. To monitor suspicious activity.
- C. To monitor proper usage of the system and data by privileged users.
- D. To protect against data corruption.
- E. To protect against data theft by a non-authorized user.

Answer: B,C

Explanation:

- A .True. Auditing tracks suspicious actions.
- B .False. That's monitoring, not auditing.
- C .False. Auditing detects, doesn't prevent.
- D .False. Corruption is a reliability issue.
- E .True. Ensures privileged user compliance.

NEW QUESTION # 14

Which three statements are true about UNDO and REDO?

- A. REDO is used for read consistency.
- **B. REDO is used for instance recovery.**
- C. Both REDO and UNDO can be multiplexed.
- D. REDO is used for ROLLBACK.
- **E. UNDO is used for some flashback operations.**
- **F. UNDO is used for read consistency.**

Answer: B,E,F

Explanation:

A . REDO is used for read consistency.False. Read consistency is achieved using UNDO, which provides a consistent view of data as of a specific point in time. REDO logs changes for recovery, not consistency.

B . UNDO is used for some flashback operations.True. Flashback features like Flashback Query and Flashback Table rely on UNDO to reconstruct past states of data.

C . UNDO is used for read consistency.True. UNDO stores pre-change data, enabling multi-version read consistency for queries.

D . Both REDO and UNDO can be multiplexed.False. REDO logs can be multiplexed (mirrored across multiple destinations), but UNDO is managed within a single UNDO tablespace per instance (though it can have multiple data files).

E . REDO is used for ROLLBACK.False. ROLLBACK uses UNDO to revert changes; REDO logs the changes but isn't used to undo them.

F . REDO is used for instance recovery.True. REDO logs are replayed during instance recovery to reapply committed changes after a crash.

NEW QUESTION # 15

Which two statements are true about views used for viewing tablespace and datafile information?

- A. Tablespace free space can be viewed in DBA_TABLESPACES.
- B. Tablespace free space can be viewed in V\$TABLESPACE.
- **C. A datafile can be renamed when the database is in MOUNT state and the new file name is displayed when querying DBA_DATA_FILES after the database is opened.**
- **D. V\$TABLESPACE displays information that is contained in the control file about tablespaces.**
- E. V\$TABLESPACE displays information about tablespaces contained in the data dictionary.

Answer: C,D

Explanation:

A .False. V\$TABLESPACE doesn't show free space directly.

B .False. It's from the control file, not the data dictionary.

C .True. Renaming in MOUNT state updates DBA_DATA_FILES post-open.

D .False. DBA_TABLESPACES shows attributes, not free space directly (use DBA_FREE_SPACE).

E .True. V\$TABLESPACE reflects control file data.

NEW QUESTION # 16

.....

PassReview's Oracle 1Z0-182 practice exam software tracks your performance and provides results on the spot about your attempt. In this way, our Oracle 1Z0-182 simulation software encourages self-analysis and self-improvement. Questions in the Oracle 1Z0-182 Practice Test software bear a striking resemblance to those of the real test. This Oracle 1Z0-182 practice exam software is easily accessible on all Windows laptops and computers.
