

# Latest 1Z1-771 Braindumps Files, Exam 1Z1-771 Price

What's more, part of that itPass4sure 1Z1-771 dumps now are free: <https://drive.google.com/open?id=1Y4SH72spgvP5KlytM1fS5IHxIm566FkF>

You can make your dream of passing the Oracle 1Z1-771 exam come true with itPass4sure updated Oracle 1Z1-771 practice test questions. itPass4sure offer Oracle 1Z1-771 the latest dumps in three formats. Oracle 1Z1-771 desktop practice test software creates a real exam environment so that you can feel like attempting the Oracle APEX Cloud Developer Professional 1Z1-771 actual exam.

## Oracle 1Z1-771 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.</li> </ul>
Topic 12	<ul style="list-style-type: none"> <li>Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.</li> </ul>
Topic 13	<ul style="list-style-type: none"> <li>Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.</li> </ul>
Topic 14	<ul style="list-style-type: none"> <li>Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.</li> </ul>

## **Useful Latest 1Z1-771 Braindumps Files | 1Z1-771 100% Free Exam Price**

The itPass4sure is a trusted and reliable platform that has been helping the Oracle APEX Cloud Developer Professional (1Z1-771) certification exam candidates for many years. Over this long time period, the itPass4sure 1Z1-771 exam practice questions have helped the 1Z1-771 exam candidates in their preparation and enabled them to pass the challenging exam on the first attempt. You can also trust itPass4sure 1Z1-771 Exam Practice questions and start preparation with complete peace of mind and satisfaction.

## **Oracle APEX Cloud Developer Professional Sample Questions (Q18-Q23):**

### NEW QUESTION # 18

An APEX e-commerce application is being used by 50 users. You have a promotional offer, and you need to send a push notification to all the subscribed users on their devices. Which step must be performed in Oracle APEX to achieve this?

- A. Create a REST Data Source to send push notifications to all the subscribed users.
- B. Enable push notifications at the application level and let APEX handle the subscription and delivery process automatically.
- C. Create a PL/SQL block to fetch all the subscribed users and send push notifications by using `APEX_APPL_PUSH_SUBSCRIPTIONS` & `APEX_PWA.SEND`.
- D. Create a Dynamic Action of Send Push Notification type to send push notifications to all the subscribed users.

**Answer: C**

Explanation:

To send push notifications to all subscribed users, you must:

Enable push notifications at the application level (a prerequisite).

Use a PL/SQL block with `APEX_APPL_PUSH_SUBSCRIPTIONS` to fetch subscribers and `APEX_PWA.SEND` to send the notifications.

Option A is incorrect as there's no "Send Push Notification" Dynamic Action type. Option B is incomplete as enabling alone doesn't send notifications. Option C is unrelated to push notifications.

### NEW QUESTION # 19

What are two reasons to enable the "Used by App Builder" option while creating a Generative AI Server?

- A. To author SQL powered by Generative AI
- B. To create a Working Copy of your application
- C. To build applications using natural language powered by Generative AI
- D. To create a REST-enabled database object

**Answer: A,C**

Explanation:

Enabling "Used by App Builder" for a Generative AI Server allows:

Author SQL powered by Generative AI: Integrates AI-driven SQL generation in App Builder.

Build applications using natural language: Enables natural language prompts to create app components.

Options A and B are unrelated to this setting, as it's specific to AI integration in App Builder.

### NEW QUESTION # 20

Which two SQL format options does the APEX Assistant provide when using the "Create Data Model using AI" feature?

- A. MySQL
- B. Oracle SQL
- C. Oracle PL/SQL
- D. Quick SQL

**Answer: B,D**

Explanation:

The "Create Data Model using AI" feature in APEX Assistant leverages AI to generate data models based on natural language input.

The supported SQL format options are:

Quick SQL: A shorthand syntax for defining database objects, which APEX can convert into full DDL.

Oracle SQL: Standard SQL syntax compatible with Oracle Database for creating tables and other objects.

MySQL is not supported as it's specific to a different database system, and Oracle PL/SQL is a procedural language, not a format for defining data models in this context.

### NEW QUESTION # 21

At what level does a developer enable push notifications so that end users can receive them on their devices from an APEX application?

- A. Application
- B. Page
- C. Instance
- D. Region

**Answer: A**

Explanation:

Push notifications in Oracle APEX are enabled at the application level. This allows the application to register with the Progressive Web App (PWA) framework and manage subscriptions for all end users. Once enabled in the Application Definition under "Progressive Web App" settings, APEX handles the subscription process, and developers can use APIs like APEX\_PWA.SEND to send notifications. Enabling at the region, page, or instance level is not supported for this feature.

## NEW QUESTION # 22

Which three statements are true about Data Workshops in Oracle APEX?

- A. You can load or unload multiple tables at a time.
- B. You can load data into a new or existing table.
- C. You can unload data from a new or existing table.
- D. You can load or unload a single table at a time.

**Answer: B,C,D**

Explanation:

Data Workshop in SQL Workshop is a powerful tool for importing/exporting table data:

B . You can load or unload a single table at a time: The wizard focuses on one table per operation. For loading, you upload a file (e.g., CSV) and map it to a single table; for unloading, you select one table to export (e.g., EMP to CSV). This granularity ensures precision and simplicity.

C . You can unload data from a new or existing table: Unloading (exporting) works on any table in the schema, whether newly created (e.g., via Quick SQL) or pre-existing (e.g., DEPT). The "Unload" option generates a file (e.g., CSV, JSON) from the table's data.

D . You can load data into a new or existing table: Loading supports creating a new table from the uploaded file (e.g., CSV defines NEW\_EMP) or appending/overwriting an existing one (e.g., EMP). The wizard prompts for table creation or selection.

A . You can load or unload multiple tables at a time: False; Data Workshop processes one table per wizard run. Multiple tables require separate operations or custom SQL scripts.

Technical Insight: Loading uses APEX\_DATA\_LOADING internally, parsing files into rows, while unloading leverages APEX\_DATA\_EXPORT. For example, uploading emp.csv with "Create New Table" generates a table with inferred columns.

Use Case: Migrating EMP data from a legacy system (CSV) into APEX, then exporting it later for analysis.

Pitfall: Multi-table operations need SQL Scripts or external tools like SQL Developer.

## NEW QUESTION # 23

.....

Our 1Z1-771 study questions will update frequently to guarantee that you can get enough test banks and follow the trend in the theory and the practice. That is to say, our 1Z1-771 training materials boost many advantages and to gain a better understanding of our 1Z1-771 Guide Torrent. It is very worthy for you to buy our 1Z1-771 practice guide and please trust us. If you still can't fully believe us, please read the introduction of the features and the functions of our 1Z1-771 learning questions.
