## **MB-500 Test Voucher, Latest MB-500 Exam Answers**

In order to save a lot of unnecessary trouble to users, we have completed our MB-500 study questions research and development of online learning platform, users do not need to download and install, only need your digital devices have a browser, can be done online operation of the MB-500 test guide. This kind of learning method is very convenient for the user, especially in the time of our fast pace to get MB-500 Certification. When using our MB-500 training materials, all the operations of the MB-500 learning material of can be applied perfectly.

Microsoft MB-500 certification exam is designed for individuals who are interested in becoming Microsoft Dynamics 365: Finance and Operations Apps Developers. Microsoft Dynamics 365: Finance and Operations Apps Developer certification exam tests the candidate's knowledge and skills related to designing, developing, testing, and deploying applications for Dynamics 365 Finance and Operations. MB-500 Exam also evaluates the candidate's ability to integrate Dynamics 365 Finance and Operations with other applications and services.

## **Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q41-Q46):**

**NEW QUESTION # 41**

A company uses Dynamics 365 Unified Operations.

You need to integrate the system with third-party applications.

Which data integration strategies should you use? To answer, drag the appropriate data integration strategies to the correct scenarios. Each strategy may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

□ Explanation

□ Box 1: custom service

Custom service peak data volume is 1,000 records per hour.

□ Box 2: batch data API

This scenario is best implemented by using batch data APIs, which has a peak data volume of 300,000 records per hour.

□ Box 3: OData endpoint

Peak data volume for reading Odata status of orders is 5,000 records per hour.

This scenario is best implemented by using the OData service endpoints to read order status information.

**NEW QUESTION # 42**

You are creating a new class and adding methods to the class.

You need to control extensibility capabilities of some of the methods in the class.

Which attribute should you use? To answer, drag the appropriate attributes to the correct requirements. Each attribute may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

□ Explanation:

□

**NEW QUESTION # 43**

You are a Dynamics 365 Finance developer.

Users can view customers from all customer groups on the customer form.

You need to ensure that users can only see customers who belong to a specific customer group.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

□ Explanation:

□

**NEW QUESTION # 44**

You are a Dynamics 365 Finance and Operations developer.

Users are experiencing slower load times for the All Customers form.

You need to update caching for CustTable to improve data retrieval times.

How should you configure CacheLookup properties? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

□

Explanation:

Box 1: Entire table

In Microsoft Dynamics AX, groups of records can be cached all at once with set-based caching. Set-based caching can be implemented in two ways:

At design time, by setting the table's CacheLookup property to EntireTable.

In code, by using the RecordViewCache class.

Box 2: Found

Record caching is enabled for a table when all the following statements are true:

The CacheLookup property on the table is enabled by setting it to one of the following values:

NotInTTS, Found, FoundAndEmpty.

The record buffer disableCache method has not been called with a parameter of true.
