C_S4CPB_2508 exam bootcamp of us have the questions and answers, and it not only have quality but also contain certain quantity, it will be enough for you to deal with your exam. With the pass rate more than 98.65%, we can ensure you pass your exam. C_S4CPB_2508 Exam Dumps also have most of knowledge points of the exam, and they may help you a lot. We offer you free update for 365 days after you purchase the C_S4CPB_2508 exam bootcamp.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q10-Q15):

NEW QUESTION # 10

In SAP Central Business Configuration, which activities can you perform in the Product-Specific Configuration Phase? Note: There are 3 correct answers to this question.

- A. Add new sales organizations.
- B. Modify building blocks.
- C. Change approval thresholds.
- D. Create new scope items.
- E. Add blocking reasons for billing.

Answer: A,C,E

Explanation:

In the Product-Specific Configuration Phase within SAP Central Business Configuration, several key activities can be performed to tailor the SAP S/4HANA Cloud system to meet specific business needs:

* Add new sales organizations: This activity involves setting up new sales organizations within the system, defining the structure of the sales department, and aligning it with the company's sales strategies and territories. This setup is crucial for managing sales processes, customer relationships, and sales reporting.

* Change approval thresholds: Modifying approval thresholds is an essential configuration activity that adjusts the approval limits for various transactions, ensuring that the approval process aligns with the company's internal control and governance policies. This can involve setting different thresholds for purchase orders, expense approvals, and other financial transactions.

* Add blocking reasons for billing: This configuration activity allows the company to define specific reasons for blocking billing documents, ensuring that billing does not proceed under certain conditions until the issues are resolved. This is critical for maintaining accurate and compliant billing processes.

These activities are part of the detailed configuration work that tailors the SAP S/4HANA Cloud system to the specific operational needs of the business, ensuring that the software supports the company's unique processes and policies.

NEW QUESTION # 11

In which SAP Activate methodology phase do consultants configure business processes based on the information gathered in the Fit-to-Standard workshops?

- A. Prepare
- B. Explore
- C. Realize
- D. Deploy

Answer: C

NEW QUESTION # 12

In which deployment models is application management the responsibility of the customer? Note: There are 3 correct answers to this question.

- A. Private Cloud
- B. Software as a Service
- C. On premise
- D. Infrastructure as a Service
- E. Platform as a Service

Answer: A,C,E

Explanation:

In different deployment models, the responsibility for application management varies, with the customer typically taking on more responsibility in certain models:

* Platform as a Service (PaaS): In this model, the customer is responsible for managing the applications they develop or deploy on the platform, even though the provider manages the underlying infrastructure, operating systems, and middleware.

* On premise: In an on-premise deployment, the customer has full responsibility for managing both the applications and the infrastructure they run on. This includes maintenance, updates, security, and compliance for both the applications and the hardware/software infrastructure.

* Private Cloud: Similar to on-premise deployments, customers in a private cloud model are typically responsible for managing their applications, including SAP S/4HANA Cloud Public Edition. The cloud provider may manage the cloud infrastructure and virtualization layer, but the customer often handles application-level management tasks, including updates, customization, and user management.

These deployment models contrast with Software as a Service (SaaS), where the service provider is generally responsible for managing the application, including its maintenance, updates, and availability.

NEW QUESTION # 13

Which of the following are captured in a completed Digital Discovery Assessment? Note: There are 2 correct answers to this question.

- A. Target customer go-live date
- B. SAP Fiori application extensions
- C. Known integration requirements
- D. Business role permission requirements

Answer: C,D

NEW QUESTION # 14

What is the correct release code for the second feature delivery in February 2025?

- A. 2502.2
- B. 0
- C. 2025.2
- D. 2025.2.2

Answer: A

Explanation:

The release code for SAP S/4HANA Cloud Public Edition follows the format YYYY.MM.X, where YYYY is the year, MM is the month, and X is the feature delivery number. The first feature delivery is always in February, and the second feature delivery is always in May. Therefore, the release code for the second feature delivery in February 2025 is 2502.2. References = Navigating Release Upgrades, SAP S/4HANA Cloud, Public Edition 2308 Release

NEW QUESTION # 15

.....

To deliver on the commitments of our C_S4CPB_2508 test prep that we have made for the majority of candidates, we prioritize the research and development of our C_S4CPB_2508 test braindumps, establishing action plans with clear goals of helping them get the C_S4CPB_2508 certification. You can totally rely on our products for your future learning path. In fact, the overload of learning seems not to be a good method, once you are weary of such a studying mode, it's difficult for you to regain interests and energy. Therefore, we should formulate a set of high efficient study plan to make the C_S4CPB_2508 Exam Dumps easier to operate.
