CompTIA Project+ Certification Exam certification provides candidates with a competitive advantage in the job market and helps them to enhance their career opportunities.

## **CompTIA Project+ Certification Exam Sample Questions (Q202-Q207):**

### **NEW QUESTION # 202**

During the project execution, the sponsor would like to have a visual representation indicating the progress of the project. The project is being managed using agile methodologies. Which of the following tools would best help the sponsor with the request?

- A. Velocity chart
- B. Milestone chart
- C. Task board
- D. Burndown chart

**Answer: D**

### **NEW QUESTION # 203**

A project manager has decided to wait until all requirements are developed to initiate testing. Which of the following relationship dependencies is the project manager using?

- A. Finish-to-start
- B. Start-to-finish
- C. Finish-to-finish
- D. Start-to-start

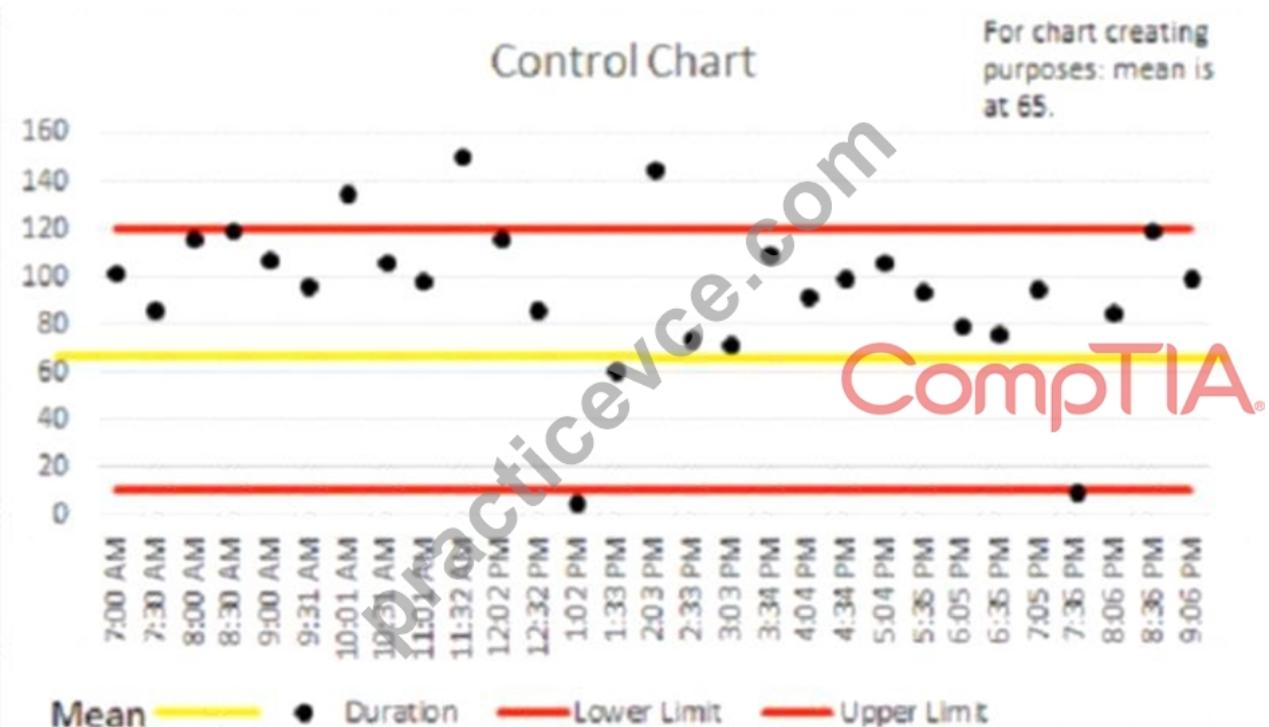

**Answer: A**

Explanation:

A finish-to-start dependency is a type of relationship dependency in project management, where the start of one task depends on the finish of another task<sup>12</sup>. In this case, the project manager is using a finish-to-start dependency, because testing cannot start until requirements development is finished. This implies that testing is a successor task, and requirements development is a predecessor task. A finish-to-start dependency is the most common type of dependency in project management, and it ensures that tasks are performed in a logical sequence<sup>34</sup>. References = CompTIA Project+ Certification Study Guide<sup>5</sup>, CompTIA Project+ Certification Exam Objectives<sup>6</sup>, Understanding Dependencies in Project Management [2023] \* Asana<sup>1</sup>, Dependencies in Project Management | Smartsheet<sup>2</sup>, Understanding Task Dependencies in Project Management<sup>3</sup>, What are Dependencies in Project Management? - KnowledgeHut<sup>4</sup>

### **NEW QUESTION # 204**

A project team evaluated the performance of a new reporting system and the quantity of queries to be processed during predetermined time stamps.

Which of the following is the current status of the process?

- A. The amount of data is insufficient to determine if quality is low.
- B. The goal should be adjusted since most of the data points are close to the lower limit.
- C. Based on the rule of seven, the process is under control
- D. The process is out of control and should be revised.

**Answer: D**

Explanation:

The process is out of control and should be revised. The project manager can use the rule of seven to determine the status of the process based on the control chart. The rule of seven states that if seven or more consecutive measurements fall on one side of the mean that there's an assignable cause that needs investigation. In this case, the last seven data points are all below the mean, which indicates that the process is out of control and in need of adjustment<sup>12</sup>

#### NEW QUESTION # 205

Which of the following would be MOST beneficial to do before a call to ensure all meeting items are addressed and the correct participants attend?

- A. Assign action items to attendees.
- B. Schedule a convenient time.
- C. Distribute an agenda.
- D. Email the minutes from the previous meeting.

**Answer: C**

Explanation:

The project manager should distribute an agenda before a call to ensure all meeting items are addressed and the correct participants attend. An agenda is a document that outlines the purpose, topics, and objectives of a meeting. It also includes information such as date, time, duration, location, attendees, and roles. Distributing an agenda can help to prepare the participants for the meeting, set clear expectations, and facilitate a productive and focused discussion<sup>12</sup>

#### NEW QUESTION # 206

A PM is meeting with the project team to identify the baseline go-live date, the operational training, and the handoff procedures. Which of the following phases is the project team performing?

- A. Execution
- **B. Closing**
- C. Planning
- D. Initiation

**Answer: B**

### Explanation:

The closing phase is when the project manager and the team finalize the project, deliver the outcomes to the customer, obtain formal acceptance, conduct lessons learned, and hand over the project to the operations team. Identifying the baseline go-live date, the operational training, and the handoff procedures are part of the closing activities that ensure a smooth transition and closure of the project.
