Region and Regionalism

The region is a large area with boundaries set by various cultural and natural criteria. It is widely divided by physical geography, human geography, and environmental aspects like the interaction between the environment and humanity.

Regionalism is occurred because of the monotonous building of the International Style in all over the world. Apart from the vernacular architecture, regionalism has a conscious in design.

KarakAŞ Mosque, Antalya, Turkey, 2003

Salesforce Arch-301試験対応、Arch-301受験対策

効果的な勤勉さが結果に正比例することは誰もが知っているので、長年の勤勉な作業によって、専門家は頻繁にテストされた知識を参考のためにArch-301実践資料に集めました。したがって、Arch-301トレーニング資料

は、彼らの努力の成果です。Arch-301の実践教材を使用することで、以前に想像していた以上の成果を絶対に得ることができます。Arch-301の実際のテストを選択した顧客から収集された明確なデータがあり、合格率は98~100%です。したがって、成功を収めるチャンスは、当社の資料によって大幅に向上します。

Salesforce Certified B2B Solution Architect 認定 Arch-301 試験問題 (Q24-Q29):

質問 # 24

UniversalContainers (UC) needs to support its customers via email, phone, and chat. Service agents are only scheduled to support one communication channel for each shift. UC has implemented a service-focused community but only wants customers to inquire about service in the community through chat.

Which three options should a Solution Architect recommend to meet the requirements defined above?

Choose 3 answers

- A. Omni-Channel with defined presence, routing configurations, and Service Channels
- B. Experience Cloud, web-to-case, and a CTI integration
- C. CTI adaptor with Omni-Channel integration
- D. Customer Community with ability to create a new support Case
- E. Customer Community with Live Agent

正解: A、B、E

解説:

* Experience Cloud2. This way, you can create a service-focused community for your customers using Experience Cloud Sites. You can also customize the look and feel of your community and integrate it with other Salesforce products and features.

* Omni-Channel with defined presence, routing configurations, and Service Channels3. This way, you can manage your service agents' availability and workload across different communication channels such as email, phone, and chat. You can also use service channels to define which objects and records are routed to your agents using Omni-Channel.

* Customer Community with Live Agent23. This way, you can enable chat support for your customers in the community using Live Agent. You can also configure chat buttons, invitations, pre-chat forms, and other settings for Live Agent.

質問 # 25

Universal Containers (UC) has a global support model and would like to open up a text message channel to support maintenance supervisors in countries around the world. UC also wants to leverage messaging to market to its business partners, and be able to track open and click-through rates just like it does with email campaigns.

What should a Solution Architect recommend to UC?

- A. Utilize Service Cloud Email to Text Message.
- B. Embed third-party messenger tools.
- C. Utilize Marketing Cloud and MobileConnect.
- D. Utilize Service Cloud and LiveMessage.

正解: C

解説:

Marketing Cloud, with its MobileConnect application, is the recommended solution for sending text messages at scale, tracking open and click-through rates, and integrating with marketing campaigns. MobileConnect provides SMS capabilities that can support UC's global support model and marketing needs, offering features similar to those available for email campaigns. Salesforce Marketing Cloud documentation describes how MobileConnect can be used for such requirements.

質問 # 26

At Custom Cabinets LLC, the service appointments often span over multiple days but are 2 to 4 hours in duration per day. The company would like to optimize the service resource's day and have them see as many customers as possible. Additionally, Custom Cabinets LLC would like a customer service representative to follow up with the customer once the field work has been completed. Which approach should the Solution Architect take to meet these requirements?

- A. Leverage declarative automata to done Service Appointments for multiple days. Like declarative automation to send a follow-up email to the customer.

- B. Leverage out-of-the-box Salesforce Field Service Multiday Service Appointments. Use declarative automation to send a follow-up email to the customer.
- C. Leverage out-of-the-box Salesforce Field Service Work Types and out-of-the-box Multiday Service Appointments. Use declarative automation to create a follow-up Case for customer service.
- D. Leverage out-of-the-box Salesforce Field Service Work Types and declarative automation to clone Service Appointments for multiple days. Use declarative automation to create a follow-up Case for customer service.

正解: B

解説:

Salesforce Field Service's out-of-the-box functionality for Multiday Service Appointments efficiently handles appointments spanning multiple days. Using declarative automation for follow-up emails ensures personalized customer engagement post-service, enhancing customer satisfaction and operational efficiency without the need for extensive custom development.

質問 #27

Universal Containers (UC) has implemented a new ecommerce site for its resellers. UC is leveraging a multi- cloud architecture, B2B Commerce, for building the storefront and Service Cloud Web2Case for offering case management functionality to its resellers. UC notices that the case volume is extremely high and a number of resellers are raising cases for trivial issues on the B2B Commerce site.

Which two recommendations should a Solution Architect make to help resellers use the site more efficiently and lower the case volume?

Choose 2 answers

- A. Offload the number of cases received via Web2Case by using Email2Case.
- B. Implement Case Deflection.
- C. Plan and conduct User Adoption Trainings for resellers on how to use the site.
- D. Disable anonymous users on the site.

正解: B、C

解説:

Option B would help resellers find answers to their questions by showing them relevant articles or discussions before they create a case. This way, they can resolve their issues without contacting support13.

Option D would help resellers learn how to use the site effectively and avoid common pitfalls. This way, they can reduce errors and confusion that might lead to unnecessary cases2.

To help resellers use the site more efficiently and lower the case volume, the Solution Architect should recommend:

- * B. Implement Case Deflection. This feature helps users find answers to their questions and resolve issues before submitting a case, thereby reducing case volume.
- * D. Plan and conduct User Adoption Trainings for resellers on how to use the site. Training ensures that resellers are comfortable with the ecommerce site and understand how to use it effectively, which can lead to reduced case volume.

Salesforce's best practices for service cloud implementation recommend these strategies to improve user efficiency and reduce case volumes, as detailed in Service Cloud documentation and training materials.

質問 #28

A team at Universal Containers (UC) is currently working on an initial release of Service Cloud. However, UC's management team is very enthusiastic about new features of the platform and wants to go to market with the new Service Cloud solution as soon as possible. The current objective of their initial Service Cloud release is mostly about managing their case workload and case assignment processes. A Solution Architect is called into a management meeting and asked when UC can go live with automated chatbots, Einstein case classification, and CRM Analytics for data insights.

How should a Solution Architect respond to the management team considering their request for these new capabilities?

- A. Agree that the new features are crucial to the success of the initiative and swap parts of the current scope for the most innovative feature.
- B. Explain the long-term vision and roadmap, and then propose a logical phasing in which the planned minimum viable product (MVP) is the first step on the journey that will eventually include the desired features.
- C. Explain to the management team that these features are still evolving and that it is best to wait a few releases so that they are stable before starting to use them in production.
- D. Agree with the management team to postpone the go-live and increase the scope to include the desired features.

正解: B

解説:

* Explaining the long-term vision and roadmap, and then proposing a logical phasing in which the planned minimum viable product (MVP) is the first step on the journey that will eventually include the desired features2. This option can help UC align their expectations with their business goals and priorities, while also demonstrating how they can achieve incremental value from their Service Cloud solution over time. The Solution Architect can also highlight the benefits of delivering an MVP first, such as validating assumptions, testing functionality, gathering feedback, and reducing risks.
