SAP web-based practice software is supported by all well-known browsers like Chrome, Firefox, Opera, Internet Explorer, etc.

SAP Certified Associate - Positioning WalkMe Sample Questions (Q24-Q29):

NEW QUESTION # 24

Which feature of WalkMe helps enterprises maintain consistent branding across tools to improve user adoption?

- A. WalkMe Shield
- B. Discovery

- C. Multi-Language
- D. Theming

Answer: D

NEW QUESTION # 25

What is one of WalkMe's differentiators when compared to other Digital Adoption Platforms (DAP)?

- A. Exclusive focus on customer experience workflows
- B. Ability to operate without integrating into other software
- C. Limited scalability for smaller businesses
- D. Offering a combination of guidance tools and actionable analytics

Answer: D

Explanation:

The correct answer is:

A . Offering a combination of guidance tools and actionable analytics ☐ Why this matters WalkMe stands out among Digital Adoption Platforms (DAPs) by not only providing in-app guidance-such as walkthroughs, tooltips, and task lists-but also delivering actionable insights through analytics. This powerful combination empowers organizations to both guide users and continuously optimize adoption using real-world usage data.

Why the other options don't apply

* B. Limited scalability for smaller businesses

☐ This is a limitation, if anything-not a differentiator or benefit.

* C. Exclusive focus on customer experience workflows

☐ WalkMe supports a wide array of use cases, including employee onboarding, IT, finance, and more- not just customer workflows.

* D. Ability to operate without integrating into other software

☐ WalkMe overlays onto existing applications and integrates deeply-it doesn't operate in isolation.

☐ Final Answer: A. Offering a combination of guidance tools and actionable analytics.

NEW QUESTION # 26

Why do organizations invest in Digital Adoption Platforms (DAP) like WalkMe?

- A. To reduce the need for IT support during software rollouts
- B. To automate payroll and HR processes for efficiency
- C. To improve user adoption and ensure maximum ROI on technology investments
- D. To replace outdated hardware systems with modern alternatives

Answer: A,C

Explanation:

From insights on learning.sap.com, organizations invest in Digital Adoption Platforms (DAPs) like WalkMe primarily to:

☐ A. To improve user adoption and ensure maximum ROI on technology investments WalkMe addresses low adoption rates, streamlines workflows, and helps customers fully realize the value of their digital tools-all contributing to improved ROI

☐ B. To reduce the need for IT support during software rollouts

WalkMe provides in-app guidance and self-service options like Smart Walk-Thrus and SmartTips that empower users to learn independently and reduce reliance on IT support

☐ Not the primary reasons:

* C. To replace outdated hardware systems with modern alternatives

WalkMe focuses on software adoption and usage optimization-not on hardware refreshes.

* D. To automate payroll and HR processes for efficiency

While WalkMe can guide users through HR software, its mission isn't centered on HR automation itself

☐ In Summary:

Objective WalkMe's Role

Improve user adoption & maximize ROI Guided adoption, analytics, and reducing friction Reduce IT support during rollouts Self-service walkthroughs and contextual help So, the correct answers are A and B.

NEW QUESTION # 27

How does WalkMe empower enterprises to recover productivity losses?

- **A. By offering proactive, contextual guidance through AI-powered tools**
- B. By replacing enterprise tools with simpler solutions
- C. By automating recruitment processes
- D. By outsourcing workflow management to third-party providers

Answer: A

Explanation:

The WalkMe feature that best helps enterprises recover productivity losses is:

B. By offering proactive, contextual guidance through AI-powered tools ☐ WalkMe empowers users by delivering real-time, in-app guidance tailored to individual workflows. Specifically, their contextual AI tools-like the new "Action Bar"-proactively suggest next steps, remind users of critical tasks, and offer support based on ongoing context across applications. This reduces disruptions, closes adoption gaps, and accelerates productivity recovery Why the other options don't apply:

* A. By automating recruitment processes

☐ WalkMe focuses on user productivity and adoption, not HR or recruiting workflows.

* C. By outsourcing workflow management to third-party providers

☐ WalkMe provides in-house software tools and guidance-not workflow outsourcing

* D. By replacing enterprise tools with simpler solutions

☐ WalkMe enhances existing enterprise tools rather than replacing them

In summary: WalkMe recovers lost productivity by embedding AI-powered, proactive guidance directly into enterprise software workflows-helping users avoid friction and work smarter in the moment.

NEW QUESTION # 28

What is the primary purpose of WalkMe's Digital Adoption Platform (DAP)?

- A. To implement advanced hardware solutions
- B. To manage payroll systems efficiently
- C. To automate recruitment processes
- **D. To reduce digital friction and guide users through complex software**

Answer: D

Explanation:

The primary purpose of WalkMe's Digital Adoption Platform (DAP) is:

B. To reduce digital friction and guide users through complex software ☐

☐ Why This Is Correct

WalkMe DAP is an intelligence-driven overlay that sits on top of your existing applications and provides contextual guidance and automation to users at the exact moment they're facing friction. This minimizes errors, accelerates digital proficiency, and relieves support bottlenecks.

☐ Why the Other Options Aren't Correct

* A. To manage payroll systems efficiently - WalkMe doesn't handle backend processes like payroll.

* C. To implement advanced hardware solutions - Its focus is purely on software adoption and user interaction.

* D. To automate recruitment processes - WalkMe supports adoption across software, not HR operations like recruitment.

☐ Final Answer:

B. To reduce digital friction and guide users through complex software.
