## HP HPE0-J68 for the latest training materials

The learners' learning conditions are varied and many of them may have no access to the internet to learn our HPE0-J68 study materials. If the learners leave home or their companies they can't link the internet to learn our HPE0-J68 study materials. But you use our APP online version you can learn offline. If only you use the HPE0-J68 study materials in the environment of being online for the first time you can use them offline later. So it will be very convenient for every learner because they won't worry about when they go out or go to the remote area that they can't link the internet to learn our HPE0-J68 Study Materials, and they can use our APP online version to learn at any place or time. That's the great merit of our APP online version and the learners who have difficulties in linking the internet outside their homes or companies can utilize this advantage, they can learn our HPE0-J68 study materials at any place.

## HPE Storage Solutions Sample Questions (Q228-Q233):

### NEW QUESTION # 228

Which 3PAR storeServ feature allow to host to continue I/O uninterrupted during a firmware update?

- A. Persistent port (96)
- B. Peer persistenceD Persistent Cache
- C. Persistent Memory

**Answer: A**

Explanation:

The HPE 3PAR StoreServ Persistent Port feature allows a host to continue I/O operations uninterrupted during a firmware update.

It achieves this by automatically failing over the ports of the storage system to a peer port on another node, ensuring continuous data availability and service delivery. This feature is crucial during firmware upgrades or any maintenance activity where minimal disruption is desired.

#### NEW QUESTION # 229

Which data resiliency technology still provides data in case a whole node in a cluster fails?

- **A. RAIN**
- B. Hot-plug drives
- C. RAID
- D. JBOD

**Answer: A**

Explanation:

RAIN (Redundant Array of Independent Nodes) provides data resiliency even if an entire node in a cluster fails by distributing and protecting data across multiple nodes.

#### NEW QUESTION # 230

A customer has a large deployment of HPE Synergy compute modules, HPE 3PAR StoreServ storage, and HPE StoreOnce systems in a single data center. They are concerned about the risk of data loss due to site disaster.

What is the reason to propose HPE CloudBank?

- A. To easily move workloads to AWS or Azure in the event of site disaster.
- **B. To regularly send backups to the cloud for the purposes of DR protection.**
- C. To leverage 3PAR snapshots and utilize StoreOnce recovery capabilities to minimize data loss and downtime.
- D. To improve RPO/RTO objectives by automating snapshot-based integrating between 3PAR and StoreOnce.

**Answer: B**

Explanation:

HPE CloudBank is a feature of the HPE StoreOnce system that enables cloud-based backup and disaster recovery (DR) solutions. It integrates with HPE 3PAR StoreServ and HPE StoreOnce systems to send backups securely to public cloud services like AWS, Azure, or private cloud environments. The primary benefit of CloudBank in the context of disaster recovery is that it ensures off-site storage of backups, protecting against site disasters by storing data in geographically dispersed locations.

By sending backups regularly to the cloud, CloudBank ensures that data is protected and can be restored in the event of a disaster, minimizing potential data loss and downtime.

#### NEW QUESTION # 231

Which statement is true regarding optimizing HPE StoreOnce backup configuration?

- A. Configure a single multiplexed backup stream in the backup application
- **B. Configure a large block size (min 256 KB) in backup application**
- C. Schedule multiple backup/replication/housekeeping activities to run in parallel
- D. Add optional RAM upgrade kit and enable it in Hardware section of UI

**Answer: B**

#### NEW QUESTION # 232

A customer with restricted budget has an existing HPE 3PAR storeserver 8200 using 10kfast class and near line drives because of

the implementation of new application .the workload has shifted to be read intensive therefore ,they want to increase the read I/O performance What should they add to their environment ?

- A. A tier with 15k fast class drive and implement thin provisioned deduplicated virtual volumes
- B. A tier of SSD and implement thin provisioned virtual volume
- C. Two 400 GB SSD drives and enable adaptive flash cache (page 173) need to check
- D. A tier with 15k fast class 600 GB drive for new CPG, configure AO policy to advantage of new resources

**Answer: C**

## NEW QUESTION # 233

.....

Do you want to pass your exam with the least time? If you do, then we will be your best choice. HPE0-J68 training materials are edited and verified by experienced experts in this field, therefore the quality and accuracy can be guaranteed. Besides HPE0-J68 exam materials contain both questions and answers, and it's convenient for you to have a check after practicing. We have online and offline chat service, if you have any questions about HPE0-J68 Training Materials, you can consult us, we will give you reply as quickly as possible.
