UiPath Specialized AI Associate Exam (2023.10) Sample Questions (Q166-Q171):

NEW QUESTION # 166
What is one of the purposes of the Config file in the UiPath Document Understanding Template?

- A. It contains the configuration settings for the UiPath Robot and Orchestrator integration.
- B. It defines the input document types and formats supported by the template.
- C. It stores the API keys and authentication credentials for accessing external services.
- D. It specifies the output file path and format for the processed documents.

Answer: C

Explanation:
The Config file in the UiPath Document Understanding Template is a JSON file that contains various parameters and values that control the behavior and functionality of the template. One of the purposes of the Config file is to store the API keys and authentication credentials for accessing external services, such as the Document Understanding API, the Computer Vision API, the Form Recognizer API, and the Text Analysis API. These services are used by the template to perform document classification, data extraction, and data validation tasks. The Config file also allows the user to customize the template according to their needs, such as enabling or disabling human-in-the-loop validation, setting the retry mechanism, defining the custom success logic, and specifying the taxonomy of document types.

NEW QUESTION # 167
To determine the number of characters scraped from a website in an "ExtractedText" String variable, excluding leading and trailing white-space characters, what should a developer use?

- A. ExtractedText.Trim.Chars
- B. ExtractedText.Chars
- C. ExtractedText.Length
- D. ExtractedText.Trim.Length

Answer: D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
To get the character count excluding leading and trailing spaces, .Trim() is used to remove whitespace and .
Length provides the character count. So the correct expression is ExtractedText.Trim.Length.
* Trim:Removes all leading and trailing white-space characters.
* Length:Returns the number of characters in the string.

NEW QUESTION # 169
What function in the train.py file is responsible for persisting the trained model?

- A. __init_(self)
- B. save(self)
- C. evaluate(self, evaluation_directory)
- D. train(setf. trainmg_directory}

Answer: B

Explanation:
In the context of a machine learning pipeline, specifically within the train.py file in UiPath AI models, the function responsible for persisting the trained model is typically named save(self). This function is invoked after the model has been trained, and it ensures that the model's state, weights, and configurations are saved to disk or another persistent storage medium. The saved model can then be reused for inference or further fine- tuning in future executions.
