

Valid CEM Latest Material & Leading Offer in Qualification Exams & Effective AEE Certified Energy Manager (CEM)

What's more, part of that Real4Prep CEM dumps now are free: <https://drive.google.com/open?id=1ar85vGsb98eKHCA1oO1nJZXzs2j4Y7W>

Real4Prep is one of the most reliable platforms to get actual AEE CEM dumps. It offers the latest and valid real Certified Energy Manager (CEM) (CEM) exam dumps. The product of Real4Prep is available in AEE CEM PDF, EXAM CODE desktop practice exam software, and web-based Certified Energy Manager (CEM) (CEM) practice test.

In this era of the latest technology, we should incorporate interesting facts, figures, visual graphics, and other tools that can help people read the Certified Energy Manager (CEM) (CEM) exam questions with interest. Real4Prep uses pictures that are related to the Certified Energy Manager (CEM) (CEM) certification exam and can even add some charts, and graphs that show the numerical values.

Test CEM Price & Valid Test CEM Testking

Do you have tried the CEM online test engine? Here we will recommend the CEM online test engine offered by Real4Prep for all of you. Firstly, CEM online training can simulate the actual test environment and bring you to the mirror scene, which let you have a good knowledge of the actual test situation. Secondly, the CEM online practice allows self-assessment, which can bring you some different experience during the preparation. You can adjust your CEM study plan according to the test result after each practice test.

AEE Certified Energy Manager (CEM) Sample Questions (Q59-Q64):

NEW QUESTION # 59

How can you tell if steam traps in a steam distribution system may NOT be working correctly?

- A. Rapid chattering of disk steam traps
- B. An increase in make-up water requirements relative to steam demand
- C. All of the above
- **D. No sound from inverted bucket steam traps**
- E. Robust flash steam rising from condensate receiver tank vent pipes

Answer: D

NEW QUESTION # 60

In a chilled water thermal energy storage system, chilled water is stored at 4°C and used for supply water. Chilled water return is 14°C. Calculate the storage capacity required to hold 50 GJ of thermal cooling. (The specific heat of water (C) is 4.2 kJ/kg·°C. Assume no system losses.)

- A. 4,180 m³
- **B. 1,191 m³**
- C. 2,618 m³
- D. 766 m³
- E. 1,356 m³

Answer: B

NEW QUESTION # 61

A three phase, 380-volt system, has the following voltage measurements:

V_a = 375 volts

V_b = 380 volts

V_c = 391 volts

Calculate the percent voltage imbalance.

- A. 6.2%
- B. 1.1%
- C. 5.5%
- **D. 2.4%**
- E. 3.4%

Answer: D

NEW QUESTION # 62

When comparing two similar facilities, you see that the facility with newer, higher-efficiency equipment has a higher energy-use index [EUI] (kJ/m²-yr). What might be the cause?

- A. The facility with the lower EUI is in need of commissioning
- B. The facility with the lower EUI requires a performance contract
- C. The facility with the higher efficiency equipment should have a higher EUI
- D. The facility with the higher EUI requires a supervisory control and data acquisition (SCADA) system
- **E. The facility with the higher EUI is in need of commissioning**

Answer: E

Explanation:

1) CEM Principle: Equipment Efficiency # System Performance

The AEE CEM Body of Knowledge stresses that higher-efficiency equipment does not guarantee lower energy use unless systems are:

* Properly commissioned

* Correctly controlled

* Operated as designed

2) Evaluation of Options

* A. The facility with the higher EUI is in need of commissioning #

* Most common cause per CEM case studies: controls, sequences, and integration not optimized.

* B. The facility with the lower EUI is in need of commissioning #

* Lower EUI indicates better performance.

* C. The facility with the lower EUI requires a performance contract #

* No evidence supports this.

* D. The facility with the higher efficiency equipment should have a higher EUI #

* Contradicts energy efficiency principles.

* E. The facility with the higher EUI requires a SCADA system #

* Monitoring alone does not correct poor performance.

CEM Exam Insight

Commissioning ensures that high-efficiency equipment actually delivers expected energy performance.

NEW QUESTION # 63

Using the lumen method, calculate the number of luminaires (fixtures) required to light a room to 200 lux. Each luminaire has 2 fluorescent lamps, 3,000 lumens per lamp. The room is 20 meters by 30 meters. The total light loss factor (LLF) is 0.70 and the luminaire coefficient of utilization (CU) is 0.80.

- A. 12 luminaires
- B. 24 luminaires
- C. 60 luminaires
- **D. 36 luminaires**
- E. 48 luminaires

Answer: D

NEW QUESTION # 64

.....

Fate is not an opportunity but a choice. As long as you choose our CEM exam materials, you will certainly do more with less. Your work efficiency will far exceed others. CEM practice guide has such effects because they have a lot of advantages. Not only our CEM Practice Braindumps can help you study the latest knowledge on the subject but also it will help you achieve the certification for sure so that you will get a better career.
