NEW QUESTION # 86

Which two statements are true regarding the Intercompany Reconciliation Report? (Choose two.)

- A. The report includes Ledger balancing lines generated when the primary balancing segment value (BSV) is in balance, but either the second or third BSVs are not.
- B. The report displays all clearing company balancing lines for a period.
- C. The report can be run using an additional currency and conversion rate that converts all amounts into a common currency for comparison.
- D. The report displays the intercompany receivables and intercompany payables balances in summary for a period.
- E. You can only drill down to the general ledger journal and then from there to the subledger journal entry.

Answer: A,C

Explanation:

According to the Oracle documentation¹², the Intercompany Reconciliation Report can be run using an additional currency and conversion rate that converts all amounts into a common currency for comparison (option C). The report also includes ledger balancing lines generated when the primary balancing segment value is in balance, but either the second or third balancing segment values are not (option B). Option A is incorrect because you can drill down to the general ledger journal, subledger accounting entry, and source receivables or payables transaction². Option D is incorrect because the report displays the intercompany receivables and intercompany payables balances in summary for a period, and any differences between them¹. Option E is incorrect because the report does not display clearing company balancing lines².

NEW QUESTION # 87

Which two allow access to the BI Catalog for creating an Oracle Transactional Business Intelligence analysis? (Choose two.)

- A. Scheduled Processes
- B. Enterprise Performance Management Workspace
- C. Business Process Management Workspace
- D. Reports and Analytics
- E. Universal Content Management Workspace

Answer: B,D

Explanation:

The two options that allow access to the BI Catalog for creating an Oracle Transactional Business Intelligence analysis are Reports and Analytics and Enterprise Performance Management Workspace. Reports and Analytics is a tool that allows users to access, create, edit, and share reports and analyses using data from various sources, including Oracle Transactional Business Intelligence. Users can access Reports and Analytics from various pages in Oracle Fusion Applications or from Oracle Fusion Cloud Service Console. Enterprise Performance Management Workspace is a tool that allows users to access, create, edit, and share reports and analyses using data from various sources, including Oracle Transactional Business Intelligence. Users can access Enterprise Performance Management Workspace from Oracle Fusion Cloud Service Console or from a web browser. Universal Content Management Workspace is not an option that allows access to the BI Catalog for creating an Oracle Transactional Business
