HPE Storage Fundamentals Sample Questions (Q51-Q56):

NEW QUESTION # 51

A healthcare organization wants a storage solution that balances enterprise storage functionality with budget-conscious purchasing decisions. Which characteristic best aligns with this requirement?

- A. Large-scale object repository
- **B. Cost-effective shared storage**
- C. Global content distribution
- D. Hyperscale cloud architecture

Answer: B

Explanation:

Cost-effective shared storage delivers enterprise-grade storage capabilities while keeping costs manageable, aligning with a budget-conscious purchasing approach.

NEW QUESTION # 52

A company needs to migrate a large volume of data to a new storage array with minimal application downtime. Which approach best supports this goal?

- A. Manual file copy during a scheduled outage window only
- B. Rebuilding all applications from scratch on the new array
- **C. Online, non-disruptive data migration tools**
- D. Exporting all data to tape before migration

Answer: C

Explanation:

Online, non-disruptive migration tools move data to the new array while applications remain running, minimizing or eliminating downtime during the transition.

NEW QUESTION # 53

What is the main purpose of a storage area network (SAN) zoning configuration?

- A. To increase the physical capacity of storage arrays
- B. To automatically deduplicate stored data
- **C. To control and restrict which devices can communicate with each other on the fabric**
- D. To convert block storage into object storage

Answer: C

Explanation:

SAN zoning restricts visibility and communication paths between host initiators and storage targets on the fabric, improving security and reducing congestion.

NEW QUESTION # 54

What is the impact of HPE Data Fabric on analytics workloads?

- **A. By providing a unified global namespace and supporting multiple protocols, it simplifies data access and enhances real-time analytics performance.**
- B. By centralizing all data in private data centers, it increases reliability and streamlines cloud operations.
- C. By isolating data types in silos, it improves security and accelerates batch processing tasks.
- D. By requiring data migrations and refactoring, it optimizes data storage and reduces analytics complexity.

Answer: A

Explanation:

HPE Data Fabric provides a single global namespace with multi-protocol access, eliminating silos and improving performance for real-time analytics.

NEW QUESTION # 55

When planning a disaster recovery strategy, why is it essential to conduct a Business Impact Analysis, especially in relation to recovery objectives?

- A. To identify the intersection of acceptable data loss and software glitches.
- B. To evaluate the effectiveness of single-point-of-failure solutions.
- C. To ensure the cost of downtime is aligned with recovery time objectives.
- D. To determine which backup methods protect against hardware failures.

Answer: C

Explanation:

A Business Impact Analysis quantifies the cost of downtime and data loss, which informs realistic RTO/RPO targets that align with business priorities.
