JN0-105資料勉強、JN0-105テスト参考書

JN0-105学習教材があれば、あなたは自分の夢を叶えます。JN0-105学習教材はすごく人気があります。全世界のお客様からいい評価をもらいました。なんといっても、自分はJN0-105学習教材を利用したら、その資料のよさを感じることができます。大切なのは、JN0-105学習教材の合格率が高いので、多くのお客様はJN0-105認定試験資格証明書を取得したということです。

Juniper Junos, Associate (JNCIA-Junos) 認定 JN0-105 試験問題 (Q61-Q66):

質問 # 61

Which process in the Junos OS is responsible for maintaining routing protocols and tables?

- A. mgd
- B. dcd

- C. rpd
- D. chassisd

正解: C

解説:

The Routing Protocol Daemon (rpd) in Junos OS is responsible for maintaining routing protocols and tables. It handles all routing information, including the calculation of routes and the population of the routing table, making it crucial for dynamic routing operations.

質問 # 62

Which two actions happen when multiple users issue the configure exclusive command to enter configuration mode on a Junos device? (Choose two.)

- A. The candidate configuration is locked.
- B. The candidate configuration is unlocked.
- C. Other users can enter configuration mode.
- D. Other users cannot enter configuration mode.

正解: D

解説:

When a user enters configuration mode using the configure exclusive command on a Junos device, the candidate configuration is locked for that user, preventing other users from making concurrent configuration changes. This exclusive lock ensures that only one user can make changes at a time, preventing conflicts and potential errors from simultaneous modifications. Other users attempting to enter configuration mode while it is locked will receive a notification that the configuration is currently being edited by another user.

質問 # 63

Which statement is correct when multiple users are configuring a Junos device using the configure private command?

- A. A commit by any user will commit changes made by all active users.
- B. Each user shares the same candidate configuration.
- C. A commit will not succeed until there is only a single user in configuration mode.
- D. Each user gets their own candidate configuration.

正解: D

解説:

When multiple users are configuring a Junos device using the "configure private" command, each user gets their own candidate configuration (C). This allows for isolated configuration sessions, where changes made by one user do not impact or interfere with the changes made by another user in their private session.

質問 # 64

Which two statements are correct about Junos traceoptions? (Choose two.)

- A. Traceoptions are enabled by default.
- B. Traceoptions cannot be enabled in a production environment.
- C. Traceoptions are enabled through configuration.
- D. Traceoption output, by default, is stored in /var/log/<file-name>.

正解: C、D

質問 # 65

You are configuring a firewall filter on a Juniper device. In this scenario, what are two valid terminating actions? (Choose two.)

- A. 2discarD
