SSM考試資訊 - 您值得信賴的合作伙伴SSM (6.0) - SAFe® Scrum Master

VCESoft的專業及高品質的產品是提供IT認證資料的行業佼佼者，選擇了VCESoft就是選擇了成功，VCESoft Scrum的SSM考試培訓資料是保證你通向成功的法寶，有了它你將取得優異的成績，並獲得認證，走向你的理想之地。

最新的 SAFe Scrum Master SSM 免費考試真題 (Q81-Q86):

問題 #81

What is the recommended timeframe for cadence-based PI Planning?

- A. 4-6 weeks
- **B. 8-12 weeks**
- C. 6-8 weeks
- D. 12-16 weeks

答案：B

問題 #82

What are three Team Retrospective anti-patterns? (Choose three.)

- **A. When only part of the team attends**
- **B. When the Scrum Master decides what the Retrospective topic(s) will be and directs the team on specific improvement items to work on**
- C. When the team reviews their interactions during the last Iteration and identifies 1-2 improvement items to work on as a team
- D. When the team commits to working on 1-2 improvement items and adds them to the next Iteration Backlog
- E. When the team reviews their interactions during the last Iteration and identifies 1-2 improvement items for the Product Owner to work on
- **F. When the team's people manager comes in to observe**

答案：A,B,F

解題說明:

問題 #83

What is one anti-pattern of the Inspect and Adapt?

- A. No actionable improvement Features are created
- B. Not enough team members attend the PI System demo
- C. Too many ideas enter the problem-solving workshop
- D. Only one problem is identified by each team in the retrospective

答案: A

解題說明:

One anti-pattern of the Inspect and Adapt (I&A) is to have no actionable improvement Features created as a result of the problem-solving workshop. This is considered an anti-pattern because the main goal of the I&A workshop is to identify and address the systemic issues that are limiting the effectiveness of the Agile Release Train (ART). The workshop should produce one or more improvement Features that are added to the ART backlog and prioritized for the next PI Planning event. These Features should be SMART (Specific, Measurable, Achievable, Relevant, and Time-bound) and aligned with the ART vision and goals. Without actionable improvement Features, the ART will miss the opportunity to learn and improve from the feedback and data collected during the PI.

based on SAFe 60 methodology What is one antipattern of the

問題 #84

What is one issue that can occur without DevOps?

- A. Challenges between teams that build Solutions and those who operate the Solutions
- B. Challenges between teams that talk with customers daily and those that meet with customers for research
- C. Challenges between teams that deploy products and those that collect customer feedback
- D. Challenges between teams that design functionality and those that test the functionality

答案: A

解題說明:

Without DevOps, organizations often face significant disconnects between development and operations teams. In traditional setups, developers build the software and then "hand it off" to operations teams for deployment and maintenance. This siloed approach creates delays, quality issues, and feedback gaps.

DevOps bridges this divide by integrating development and operations into a continuous delivery pipeline that promotes automation, collaboration, and shared responsibility for outcomes. SAFe emphasizes DevOps as a key enabler of the Continuous Delivery Pipeline, ensuring faster delivery of value, higher quality, and improved customer satisfaction.

From SAFe guidance:

"Without DevOps, organizations experience challenges between teams that build solutions and those who operate them. DevOps practices close this gap, fostering collaboration and accelerating the flow of value." Therefore, the correct answer is B. Challenges between teams that build Solutions and those who operate the Solutions.

問題 #85

(Select 2) What applies to the Portfolio Backlog?

- A. The Portfolio Kanban holds Capabilities that are ready for implementation.
- B. It provides a low-cost holding area for approved Business and Enabler Epics.
- C. WSJF is used to prioritize Epics in the Portfolio Backlog.
- D. Programs plan PIs so that they exhaust the Portfolio Backlog and only then work on their local priorities.

答案: B,C
