Therefore, our customers can save their limited time and energy to stay focused on their study as we are in charge of the updating of our HPE7-A06 test training. It is our privilege and responsibility to render a good service to our honorable customers.

HPE Campus Access Switching Expert Written Exam Sample Questions (Q45-Q50):

NEW QUESTION # 45

What is the most secure way to configure HPE Aruba Networking access points for employee/guest access?

- **A. Use separate SSIDs for employee and guest access and configure an HPE Aruba Networking ClearPass Policy Manager for guest authentication.**
- B. Use WPA2 Enterprise encryption with a RADIUS server but use a weak pre-shared key (PSK) for the RADIUS server.
- C. Configure VLANs to segregate employee and guest traffic but use the same default password for all VLANs.
- D. Use a single SSID for employee and guest access and configure a captive portal for guest access.

Answer: A

Explanation:

Separate SSIDs ensure traffic segregation between employees and guests.

Employees can use 802.1X with WPA2/WPA3-Enterprise for secure authentication via RADIUS.

Guests can be directed to ClearPass Guest Captive Portal for secure onboarding and controlled access.

This provides the highest level of security and policy enforcement compared to the other options.

NEW QUESTION # 46

An OSPF router has learned a path to an external network by both an E1 and E2 advertisement, both routes having the same path cost.

Which path will the router prefer?

- A. The router will prefer the E1 path.
- B. Both routes will be suppressed until the path conflict has been resolved.
- C. The router will prefer the E2 path.
- D. The router will use both paths equally by means of ECMP.

Answer: A

Explanation:

When both OSPF E1 (External Type 1) and E2 (External Type 2) routes exist to the same destination with equal cost, the router always prefers the E1 path. This is because E1 routes include both the external cost and the internal OSPF cost to reach the ASBR, making them more accurate for path selection.

NEW QUESTION # 47

Ever since a recent firewall change at your WAN/Internet edge, the BGP state in your VSX pair has not returned to Established.

What should you check to restore BGP functionality at this site?

- A. Confirm that BGP Peer AS has not changed.
- B. Restart the routing service so that BGP auto-discovers its neighbors.
- C. Restart NAT service for the BGP interface.
- D. Confirm that appropriate TCP ports are still allowed.

Answer: D

Explanation:

BGP uses TCP port 179 for peer communication. A firewall change could have blocked this port, preventing BGP from establishing its sessions. Always confirm TCP port 179 is permitted between BGP peers.

NEW QUESTION # 48

Which log level on HPE switches records events that could lead to serious operational issues if not addressed?

- A. Error
- B. Warning
- C. Debug
- D. Notice

Answer: A

NEW QUESTION # 49

An engineer finds that a specific HPE switch interface has high error rates. Which two parameters are most likely causing this issue?

- A. Duplex mismatch
- B. Port speed
- C. VLAN misconfiguration
- D. LACP mode

Answer: A,B

NEW QUESTION # 50

.....
