

# Latest GCP-DE Test Materials | Free GCP-DE Download

BTW, DOWNLOAD part of Actual4dump GCP-DE dumps from Cloud Storage: [https://drive.google.com/open?id=119J94IB\\_u97GebmwHlRysnS0cIcrBePZ](https://drive.google.com/open?id=119J94IB_u97GebmwHlRysnS0cIcrBePZ)

Google is one of the international top companies in the world providing wide products line which is applicable for most families and companies, and even closely related to people's daily life. Passing exam with GCP-DE valid exam lab questions will be a key to success; will be new boost and will be important for candidates' career path. Google offers all kinds of certifications, GCP-DE valid exam lab questions will be a good choice.

The result of your exam is directly related with the GCP-DE learning materials you choose. So our company is of particular concern to your exam review. Getting the GCP-DE certificate of the exam is just a start. Our GCP-DE practice materials may bring far-reaching influence for you. Any demands about this kind of exam of you can be satisfied by our GCP-DE training quiz. So our GCP-DE practice materials are of positive interest to your future. Such a small investment but a huge success, why are you still hesitating?

## Data Engineer exam simulators & GCP-DE exam torrent

The Actual4dump is a leading and trusted platform that has been assisting the GCP-DE exam candidates since its beginning. Over this long time period, Actual4dump has helped countless candidates in their preparation and enabled them to pass the final GCP-DE Exam easily. The Actual4dump offers real, valid, and updated Google Exam Questions.

## Google Data Engineer Sample Questions (Q46-Q51):

### NEW QUESTION # 46

You are operating a Cloud Dataflow streaming pipeline. The pipeline aggregates events from a Cloud Pub/Sub subscription source, within a window, and sinks the resulting aggregation to a Cloud Storage bucket. The source has consistent throughput. You want to monitor an alert on behavior of the pipeline with Cloud Stackdriver to ensure that it is processing data. Which Stackdriver alerts should you create?

- A. An alert based on an increase of subscription/num\_undelivered\_messages for the source and a rate of change decrease of instance/storage/used\_bytes for the destination
- B. An alert based on a decrease of subscription/num\_undelivered\_messages for the source and a rate of change increase of instance/storage/used\_bytes for the destination
- C. An alert based on an increase of instance/storage/used\_bytes for the source and a rate of change decrease of subscription/num\_undelivered\_messages for the destination
- D. An alert based on a decrease of instance/storage/used\_bytes for the source and a rate of change increase of subscription/num\_undelivered\_messages for the destination

Answer: A

#### NEW QUESTION # 47

You are running a pipeline in Cloud Dataflow that receives messages from a Cloud Pub/Sub topic and writes the results to a BigQuery dataset in the EU. Currently, your pipeline is located in europe-west4 and has a maximum of 3 workers, instance type n1-standard-1. You notice that during peak periods, your pipeline is struggling to process records in a timely fashion, when all 3 workers are at maximum CPU utilization. Which two actions can you take to increase performance of your pipeline? (Choose two.)

- A. Use a larger instance type for your Cloud Dataflow workers
- B. Create a new step in your pipeline to write to this table first, and then create a new pipeline to write from Cloud Spanner to BigQuery
- C. Change the zone of your Cloud Dataflow pipeline to run in us-central1
- D. Create a temporary table in Cloud Bigtable that will act as a buffer for new data
- E. Create a new step in your pipeline to write to this table first, and then create a new pipeline to write from Cloud Bigtable to BigQuery
- F. Create a temporary table in Cloud Spanner that will act as a buffer for new data
- G. Increase the number of max workers

**Answer: A,E**

#### NEW QUESTION # 48

For the best possible performance, what is the recommended zone for your Compute Engine instance and Cloud Bigtable instance?

- A. Have both the Compute Engine instance and the Cloud Bigtable instance to be in different zones.
- B. Have the Cloud Bigtable instance to be in the same zone as all of the consumers of your data.
- C. Have both the Compute Engine instance and the Cloud Bigtable instance to be in the same zone.
- D. Have the Compute Engine instance in the furthest zone from the Cloud Bigtable instance.

**Answer: C**

Explanation:

It is recommended to create your Compute Engine instance in the same zone as your Cloud Bigtable instance for the best possible performance. If it's not possible to create an instance in the same zone, you should create your instance in another zone within the same region. For example, if your Cloud Bigtable instance is located in us-central1-b, you could create your instance in us-central1-f. This change may result in several milliseconds of additional latency for each Cloud Bigtable request.

It is recommended to avoid creating your Compute Engine instance in a different region from your Cloud Bigtable instance, which can add hundreds of milliseconds of latency to each Cloud Bigtable request.

Reference: <https://cloud.google.com/bigtable/docs/creating-compute-instance>

#### NEW QUESTION # 49

You need to deploy additional dependencies to all of a Cloud Dataproc cluster at startup using an existing initialization action. Company security policies require that Cloud Dataproc nodes do not have access to the Internet so public initialization actions cannot fetch resources. What should you do?

- A. Copy all dependencies to a Cloud Storage bucket within your VPC security perimeter
- B. Use an SSH tunnel to give the Cloud Dataproc cluster access to the Internet
- C. Deploy the Cloud SQL Proxy on the Cloud Dataproc master
- D. Use Resource Manager to add the service account used by the Cloud Dataproc cluster to the Network User role

**Answer: D**

#### NEW QUESTION # 50

What Dataflow concept determines when a Window's contents should be output based on certain criteria being met?

- A. Sessions
- B. Triggers
- C. Windows
- D. OutputCriteria

**Answer: B**

Explanation:

Triggers control when the elements for a specific key and window are output. As elements arrive, they are put into one or more windows by a Window transform and its associated WindowFn, and then passed to the associated Trigger to determine if the Windows contents should be output.

## NEW QUESTION # 51

.....

To stand in the race and get hold of what you deserve in your career, you must check with all the Google GCP-DE Exam Questions that can help you study for the Google GCP-DE certification exam and clear it with a brilliant score. You can easily get these Google GCP-DE Exam Dumps from Google that are helping candidates achieve their goals.

**Free GCP-DE Download:** <https://www.actual4dump.com/Google/GCP-DE-actualtests-dumps.html>

With the assistance of our GCP-DE study torrent you will be more distinctive than your fellow workers, because you will learn to make full use of your fragment time to do something more useful in the same amount of time, Actual4dump Free GCP-DE Download products have a validity of 120 days from the date of purchase, When you decide to buy our Free GCP-DE Download - Data Engineer real practice torrent, you will find our price is very reasonable and affordable.

I've been probably talking about the book too much, but many people, Exam GCP-DE Revision Plan like Michael, believe that viruses can do things that are beyond their grasp, Learn More and Preview Sample Content.

With the assistance of our GCP-DE study torrent you will be more distinctive than your fellow workers, because you will learn to make full use of your fragment time to do something more useful in the same amount of time.

## Quiz 2026 Updated Google GCP-DE: Latest Data Engineer Test Materials

Actual4dump products have a validity of 120 days from the date of Exam GCP-DE Revision Plan purchase, When you decide to buy our Data Engineer real practice torrent, you will find our price is very reasonable and affordable.

It's a practical and flexible way, You can test GCP-DE on soft version like the real scene time to time and keep you good exam condition.
