EC Council
312-50v11
Exam Key
Points

* Certified Ethical Hacker CEH v11 will teach you the latest commercial-grade hacking tools, techniques, and methodologies used by hackers and information security professionals to lawfully hack an organization.

* As EC-Council states, "to catch a hacker, you need to think as one." A CEH must apply the same knowledge and tools as malicious hackers, but in a lawful and legitimate manner. The CEH credential can help professionals pinpoint and refresh the know-how required to do just that.

* If you choose to forgo official training, you'll pay the \$100 non-refundable application fee and \$950 for the voucher at ECC centers. The Pearson Vue voucher will cost \$1,199. Online boot camps and training courses often include the price of the exam voucher in the training cost.

Vouchers are valid for one year but can be renewed once for an additional three months for \$35 if the voucher is still valid and unused.

EC-COUNCIL Computer Hacking Forensic Investigator (CHFI-v11) Sample Questions (Q786-Q791):

NEW QUESTION # 786

You have been called in to help with an investigation of an alleged network intrusion. After questioning the members of the company IT department, you search through the server log files to find any trace of the intrusion. After that you decide to telnet into one of the company routers to see if there is any evidence to be found. While connected to the router, you see some unusual activity and believe that the attackers are currently connected to that router. You start up an ethereal session to begin capturing traffic on the router that could be used in the investigation. At what layer of the OSI model are you monitoring while watching traffic to and from the router?

- A. Network
- B. Data Link
- C. Transport

- D. Session

Answer: A

NEW QUESTION # 787

What is the "Best Evidence Rule"?

- A. It states that the court only allows the original evidence of a document, photograph, or recording at the trial rather than a copy
- B. It contains information such as open network connection, user logout, programs that reside in memory, and cache data
- C. It contains system time, logged-on user(s), open files, network information, process information, process-to-port mapping, process memory, clipboard contents, service/driver information, and command history
- D. It contains hidden files, slack space, swap file, index.dat files, unallocated clusters, unused partitions, hidden partitions, registry settings, and event logs

Answer: A

NEW QUESTION # 788

A Computer Hacking Forensics Investigator is analyzing a malware sample named "payload.exe".

They have run the malware on a test workstation, and used a tool named WhatChanged Portable to monitor host integrity by capturing the system state before and after the malware execution.

After comparing these two snapshots, the investigator observes that an entry named CjNWWyUJ has been created under the Run registry key with value C:\Users\\AppData\Local\Temp\xKNkeLQI.vbs. Given this information, what conclusion can the investigator draw?

- A. The malware has deleted system files on the workstation
- B. The malware creates a persistent connection with the machine on startup
- C. The malware has corrupted the Windows registry
- D. The malware is performing a denial of service attack

Answer: B

NEW QUESTION # 789

During the course of an investigation, you locate evidence that may prove the innocence of the suspect of the investigation. You must maintain an unbiased opinion and be objective in your entire fact finding process. Therefore you report this evidence. This type of evidence is known as:

- A. mandatory evidence
- B. Terrible evidence
- C. exculpatory evidence
- D. Inculpatory evidence

Answer: C

NEW QUESTION # 790

This law sets the rules for commercial email, establishes requirements for commercial messages, gives recipients the right to have you stop emailing them, and spells out tough penalties for violations.

- A. Telemarketing act
- B. Federal Spam act
- C. The CAN-SPAM act
- D. European Anti-Spam act

Answer: C
