

# Pass Guaranteed Quiz Trustable Juniper - JN0-336 - Valid Security, Specialist (JNCIS-SEC) Test Book

## Security, Specialist (JNCIS-SEC) JN0-335 Practice Test Questions

What's more, part of that ValidVCE JN0-336 dumps now are free: <https://drive.google.com/open?id=1TMS-8JatYwX-7sX7B9pgb8wJs9f0Gvj8>

The JN0-336 PDF is the collection of real, valid, and updated Security, Specialist (JNCIS-SEC) (JN0-336) practice questions. The Juniper JN0-336 PDF dumps file works with all smart devices. You can use the JN0-336 PDF questions on your tablet, smartphone, or laptop and start JN0-336 Exam Preparation anytime and anywhere. The JN0-336 dumps PDF provides you with everything that you must need in JN0-336 exam preparation and enable you to crack the final JN0-336 exam quickly.

Work hard and practice with our Juniper JN0-336 dumps till you are confident to pass the Juniper JN0-336 exam. And that too with flying colors and achieving the Juniper JN0-336 Certification on the first attempt. You will identify both your strengths and shortcomings when you utilize Security, Specialist (JNCIS-SEC) practice exam software.

## Valid Juniper JN0-336 Exam Simulator & Online JN0-336 Lab Simulation

In order to meet the different need from our customers, the experts and professors from our company designed three different versions of our JN0-336 exam questions for our customers to choose, including the PDF version, the online version and the software version. Now I want to introduce the online version of our JN0-336 learning guide to you. The most advantage of the online version is that this version can support all electronic equipment. If you choose the online version of our JN0-336 study materials, you can use our products by your any electronic equipment.

## Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q67-Q72):

### NEW QUESTION # 67

What are two benefits of using a vSRX in a software-defined network? (Choose two.)

- A. no required software license
- B. scalability
- C. granular security
- D. infinite number of interfaces

**Answer: B,C**

Explanation:

- Scalability: vSRX instances can be easily added or removed as the needs of the network change, making it a flexible option for scaling in a software-defined network.
- Granular Security: vSRX allows for granular security policies to be enforced at the virtual interface level, making it an effective

solution for securing traffic in a software-defined network.

The two benefits of using a vSRX in a software-defined network are scalability and granular security.

Scalability allows you to increase the number of resources available to meet the demands of network traffic, while granular security provides a level of control and flexibility to your network security that is not possible with a traditional firewall. With a vSRX, you can create multiple levels of security policies, rules, and access control lists to ensure that only authorized traffic can enter and exit your network.

Additionally, you would not require a software license to use the vSRX, making it an economical solution for those looking for increased security and flexibility.

#### NEW QUESTION # 68

Click the Exhibit button.

You have implemented SSL client protection proxy. Employees are receiving the error shown in the exhibit. How do you solve this problem?

- A. Load a known good, but expired. CA certificate onto the SRX Series device.
- B. Reboot the SRX Series device.
- C. Import the existing certificate to each client device.
- D. Install a new SRX Series device to act as the client proxy

**Answer: C**

Explanation:

SSL client protection proxy is a feature that allows you to decrypt and inspect the SSL traffic from clients to servers. To do this, you need to install a certificate authority (CA) certificate on the SRX Series device and import the same certificate to each client device. This way, the SRX Series device can act as a proxy between the client and the server and perform security checks on the decrypted traffic. If the client device does not have the certificate installed, it will receive an error message like the one shown in the exhibit.

#### NEW QUESTION # 69

Which solution enables you to create security policies that include user and group information?

- A. NETCONF
- B. JIMS
- C. Network Director
- D. ATP Appliance

**Answer: B**

Explanation:

The solution that enables you to create security policies that include user and group information is JIMS (Juniper Identity Management Service). JIMS collects and maintains a large database of user, device, and group information from Active Directory domains or syslog sources, and enables SRX Series devices to rapidly identify thousands of users in a large, distributed enterprise. With JIMS, you can create security policies that include user and group information, and enforce user-based access control policies to protect network resources.

#### NEW QUESTION # 70

Which two statements are true about Juniper ATP Cloud? (Choose two.)

- A. If the cache lookup determines that a file contains malware, static analysis is not performed to verify the results.
- B. If the cache lookup determines that a file contains malware, performed to verify the results.
- C. Dynamic analysis is not always necessary to determine if a file contains malware.
- D. Dynamic analysis is always performed to determine if a file contains malware.

**Answer: A,C**

Explanation:

Dynamic analysis is not always necessary to determine if a file contains malware, as the ATP Cloud uses a cache lookup to quickly identify known malicious files. If the cache lookup determines that a file contains malware, static analysis is not performed to verify

the results. This information can be found on the Juniper website here: [https://www.juniper.net/documentation/en\\_US/release-independent/security/jnpr-security-srx-series/inform](https://www.juniper.net/documentation/en_US/release-independent/security/jnpr-security-srx-series/inform)

#### NEW QUESTION # 71

After JSA receives external events and flows, which two steps occur? (Choose two.)

- A. After formatting the data, the data is stored in an asset database.
- B. Before formatting the data, the data is analyzed for relevant information.
- C. After the information is filtered, JSA responds with active measures
- D. Before the information is filtered, the information is formatted

**Answer: A,D**

Explanation:

When JSA (Juniper Secure Analytics) receives external events and flows, the typical processing steps are:

Option C. Before the information is filtered, the information is formatted.

Data formatting is an initial step in the process where raw data from events and flows is converted into a standard format that can be more easily processed and analyzed by JSA.

Option A. After formatting the data, the data is stored in an asset database.

Once the data is formatted, it is stored in an asset database. This database acts as a repository for all the formatted data, enabling JSA to perform further analysis, correlation, and eventually, to maintain a comprehensive view of the network assets and activities. These steps are part of JSA's comprehensive approach to security event management, which involves collecting, normalizing, and analyzing data to identify potential security threats and vulnerabilities efficiently.

#### NEW QUESTION # 72

.....

Do not postpone seeking help from our extraordinary Juniper JN0-336 dumps to get the crucial Juniper JN0-336 certification exams. This platform allows you to self-assess your progress with a performance score. You can also customize your Juniper JN0-336 mock tests according to the time and kinds of practice queries. It imitates the exact pattern of the actual Juniper JN0-336 certification exam.

**Valid JN0-336 Exam Simulator:** <https://www.validvce.com/JN0-336-exam-collection.html>

Juniper Valid JN0-336 Test Book We aim to 100% pass exam if users pay attention to our products, By using our JN0-336 preparation materials: Security, Specialist (JNCIS-SEC), your preparation will be full of joyful feelings, We warmly welcome every customer to select our JN0-336 learning questions, After you purchase ValidVCE JN0-336 dumps, you will get Security, Specialist (JNCIS-SEC) JN0-336 exam dumps in 10 minutes in our working time, and in 12 hours in non-working time, Juniper Valid JN0-336 Test Book There is a linkage given by our e-mail, and people can begin their study right away after they have registered in.

To decide that title is part of title, author) it needs JN0-336 to look past title to the author element, Our aftersales service agents are online waiting for your questions with sincerity 24/7, if you have any problems with JN0-336 Test Questions: Security, Specialist (JNCIS-SEC), go ahead and ask us directly through Email or other aftersales platforms.

### Free PDF Juniper - JN0-336 Useful Valid Test Book

We aim to 100% pass exam if users pay attention to our products, By using our JN0-336 preparation materials: Security, Specialist (JNCIS-SEC), your preparation will be full of joyful feelings.

We warmly welcome every customer to select our JN0-336 learning questions, After you purchase ValidVCE JN0-336 dumps, you will get Security, Specialist (JNCIS-SEC) JN0-336 exam dumps in 10 minutes in our working time, and in 12 hours in non-working time.

There is a linkage given by our e-mail, Online JN0-336 Lab Simulation and people can begin their study right away after they have registered in.
