We are dedicated to providing an updated AZ-204 practice test material with these three formats: PDF, Web-Based practice exam, and Desktop practice test software. With our AZ-204 practice exam (desktop and web-based), you can evaluate and enhance your knowledge essential to crack the test. This step is critical to the success of your Microsoft AZ-204 Exam Preparation, as these practice tests help you identify your strengths and weaknesses.

The Microsoft AZ-204 Exam is intended for developers who have experience in developing cloud-based applications using programming languages such as C#, Java, Node.js, or Python. The candidates should have knowledge of developing solutions using Azure services such as Azure App Service, Azure Functions, Azure Storage, Azure Event Grid, and Azure Service Bus. They should also have experience in using Azure DevOps for continuous integration and deployment.

100% Pass Microsoft - High Pass-Rate AZ-204 - Valid Developing Solutions for Microsoft Azure Test Blueprint

After successful competition of the Microsoft AZ-204 certification, the certified candidates can put their career on the right track and achieve their professional career objectives in a short time period. For the recognition of skills and knowledge, more career opportunities, professional development, and higher salary potential, the Microsoft AZ-204 Certification Exam is the proven way to achieve these tasks quickly.

Passing the AZ-204 Exam is a great way to showcase your expertise in developing Azure solutions and advance your career in cloud computing. It is also a prerequisite for earning the Microsoft Certified: Azure Developer Associate certification. Developing Solutions for Microsoft Azure certification validates the candidate's skills in designing and developing cloud applications using Azure services and technologies. It is a valuable credential for developers who want to demonstrate their proficiency in Azure development and increase their earning potential in the job market.

Microsoft Developing Solutions for Microsoft Azure Sample Questions (Q326-Q331):

NEW QUESTION # 326

You develop a web app that uses tier D1 app service plan by using the Web Apps feature of Microsoft Azure App Service. Spikes in traffic have caused increases in page load times.

You need to ensure that the web app automatically scales when CPU load is about 85 percent and minimize costs.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Answer:

Explanation:

- 1 - Configure the web app to the Standard App Service Tier.
- 2 - Enable autoscaling on the web app
- 3 - Add a scale rule
- 4 - Add a Scale condition

NEW QUESTION # 327

You need to ensure that PolicyLib requirements are met.

How should you complete the code segment? To answer, drag the appropriate code segments to the correct locations. Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 328

You develop an application that sells AI generated images based on user input. You recently started a marketing campaign that displays unique ads every second day.

Sales data is stored in Azure Cosmos DB with the date of each sale being stored in a property named 'whenFinished'.

The marketing department requires a view that shows the number of sales for each unique ad.

You need to implement the query for the view.

How should you complete the query? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 329

You need to configure Azure Cosmos DB.

Which settings should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Graphical user interface, application, table Description automatically generated

Box 1: Strong

When the consistency level is set to strong, the staleness window is equivalent to zero, and the clients are guaranteed to read the latest committed value of the write operation.

Scenario: Changes to the Order data must reflect immediately across all partitions. All reads to the Order data must fetch the most recent writes.

Note: You can choose from five well-defined models on the consistency spectrum. From strongest to weakest, the models are:
