Salesforce Financial Services Cloud (FSC) Accredited Professional Sample Questions (Q60-Q65):

NEW QUESTION # 60

A financial services company would like its users to be able to relate two business accounts. What should the administrator configure to meet the requirement?

- A. Create a new Contact Reciprocal Role for the required value.
- B. Update the Role picklist on the Account-(?ontact Relationship object with new value.
- C. Create a new Account Reciprocal Role for the required value.
- D. Update the Role picklist on the Account-Account Relationship object with new value.

Answer: D

Explanation:
To configure Financial Services Cloud to allow users to relate two business accounts, the administrator should update the Role picklist on the Account-Account Relationship object with new value. The Role picklist is a field on the Account-Account Relationship object that defines the type of relationship between two accounts, such as Household Member, Business Owner, Trustee, or Friend. The Role picklist is used to filter and display the account-account relationships in the Actionable Relationship Center (ARC). To update the Role picklist, you need to go to Setup > Object Manager > Account-Account Relationship > Fields & Relationships > Role and add or remove values according to your business needs. NEW QUESTION # 61
Agents for an insurance company need to know the current and past weather conditions when creating customer claims. The consultant implements a Flex Card for weather conditions in the console to ensure the agents can access the information. The Flex Card needs to provide fields extracted from a weather API and an account field from Salesforce.
Which method should the consultant use, according to best practices?

- A. Integration Procedure
- B. Data Raptor Extract
- C. Streaming API
- D. APEX classes

Answer: A

Explanation:
Reference: Integration Procedure | Vlocity Developer Docs
Explanation: An Integration Procedure is a feature of Vlocity that allows users to create and execute data integration tasks between Salesforce and external systems. An Integration Procedure can perform various operations, such as extract, transform, load, query, or update data from different sources and targets. An Integration Procedure can also invoke other Vlocity features, such as DataRaptors, OmniScripts, or Calculations.
To implement a Flex Card for weather conditions in the console, the consultant should use an Integration Procedure that can do the following steps:
Query the weather API using an HTTP action and pass the account address as a parameter.
Extract the relevant fields from the weather API response, such as temperature, humidity, precipitation, etc.
Query the account field from Salesforce using a DataRaptor Extract action and pass the account ID as a parameter.
Merge the weather API fields and the account field into a single data set using a List Merge action.
Return the data set to the Flex Card using a Return action.

NEW QUESTION # 62
Jen, the Financial Advisor at Lake Tahoe Wealth Management Company wants to modify a published Action Plan to support an additional task she needs in order to complete an annual review for a client. How should Jen do this?

- A. Use the Action Plan item feature to add an additional task to a published Action Plan.
- B. Create an independent Task not related to original Action Plan
- C. Use the 'task creator' tool to create a new task and associate with the existing Action Plan
- D. Contact her Salesforce Administrator and get her to make the change to the Action Plan for her.

Answer: A

Explanation:
Explanation

To modify a published Action Plan to support an additional task, Jen should use the Action Plan item feature to add an additional task to the published Action Plan. An Action Plan item is a construct in Financial Services Cloud that allows you to add, edit, or delete tasks in an existing Action Plan. You can use Action Plan items to customize your Action Plans according to your specific needs and preferences. Verified References: :

NEW QUESTION # 63

To access Financial Services Cloud Lightning Components "My Domain" must be enabled. How does the System Admin accomplish this?

- **A. Register a subdomam using the My Domain wizard and then deploy it**
- B. Go to Custom Settings and edit the Industries Settings
- C. Open a case with Salesforce Support
- D. Enable Communities

Answer: A

Explanation:

My Domain is a feature in Salesforce that allows you to create a subdomain for your org. You need to enable My Domain to access Financial Services Cloud Lightning Components, such as Actionable Relationship Center, Relationship Map, Life Events & Business Milestones, etc. To enable My Domain, you need to do the following:

Register a subdomain using the My Domain wizard in Setup > My Domain.

Deploy it to your users after testing it in your sandbox or developer org. Verified Reference: : Salesforce Help Article [7]

NEW QUESTION # 64

Which three processes are part of Claims Management?

- A. Underwriting
- **B. Auto Adjudication**
- C. Quoting
- **D. Reserve Management**
- **E. Payment**

Answer: B,D,E

Explanation:

The following processes are part of Claims Management:

Auto Adjudication, which is a process that allows claims to be processed automatically without humanintervention, based on predefined rules and criteria. Auto adjudication can improve the efficiency and accuracy of claims processing and reduce operational costs.

Reserve Management, which is a process that involves estimating and setting aside funds for future claims payments. Reserve management can help insurers manage their cash flow and solvency and comply with regulatory requirements.

Payment, which is a process that involves disbursing funds to claimants or providers after a claim has been approved. Payment can involve different methods, such as check, electronic funds transfer, or debit card.

Payment can affect the customer satisfaction and retention rate of insurers.
