

PEGACPRSA22V1 Valid Exam Prep, PEGACPRSA22V1 Dumps Free Download

We all have same experiences that some excellent people around us further their study and never stop their pace even though they have done great job in their surrounding environment. So it is of great importance to make yourself competitive as much as possible. Facing the PEGACPRSA22V1 exam this time, your rooted stressful mind of the exam can be eliminated after getting help from our PEGACPRSA22V1 practice materials. Among voluminous practice materials in this market, we highly recommend our PEGACPRSA22V1 Study Tool for your reference. Their vantages are incomparable and can spare you from strained condition. On the contrary, they serve like stimulants and catalysts which can speed up you efficiency and improve your correction rate of the PEGACPRSA22V1 real questions during your review progress.

The Pegasystems PEGACPRSA22V1 Exam assesses the candidate's ability to design, develop, and deploy robotic automation solutions using the Pega Robotics Platform. PEGACPRSA22V1 exam focuses on topics such as Pega Robotics Runtime, Robot Manager, Pega Robotic Studio, and Pega Runtime configurations. Additionally, the exam covers various advanced topics, such as working with web services, application architectures, and deployment strategies.

Pass Guaranteed Quiz 2026 Pegasystems PEGACPRSA22V1 Updated Valid Exam Prep

The Pegasystems PEGACPRSA22V1 certification is one of the top-rated career advancement certifications in the market. This Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) certification exam has been inspiring candidates since its beginning. Over this long time period, thousands of PEGACPRSA22V1 Exam candidates have passed their Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) certification exam and now they are doing jobs in the world's top brands. You can also be a part of this wonderful community.

Pegasystems PEGACPRSA22V1 Certification Exam is an excellent opportunity for professionals who want to enhance their career in Pega Robotics. Certified Pega Robotics System Architect 22 certification exam validates the candidate's knowledge and skills in Pega Robotics system architecture, design, and implementation, and it provides them with a competitive edge in the job market. Certified Pega Robotics System Architect 22 certification exam is recognized globally, and it is a valuable asset for any candidate seeking a career in Pega Robotics.

Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q73-Q78):

NEW QUESTION # 73

You are designing an automation that adds new customers to an online insurance web site. If a customer exists, a pop-up window is displayed with an error message, which closes automatically after 35 seconds.

While debugging the automation, you notice that you are receiving a control not created exception message in the Add Customer procedure after a page navigation occurs.

How do you resolve the exception?

- A. Add a missing `waitForEvent.Exists` method in the Add Customer procedure.
- B. Add a missing created event in the Add Customer procedure.
- C. Ensure the `isCreated` timeout is longer than 35 seconds in the Add Customer procedure.
- D. Ensure the `waitForCreate` timeout is longer than 35 seconds in the Add Customer procedure.

Answer: A

NEW QUESTION # 74

You have completed your development for the `DisputeTransaction.peg` project. The enterprise installs the Pega Robot Runtime software on the agent's desktop.

The enterprise is ready to unit test your solution but wants the Runtime executable to automatically launch the new project.

What do you configure to fulfill this request?

- A. Edit the setting in the `CommonConfig.xml` by setting the value to the file location of the `.peg` file.
- B. Edit the setting in the `DisputeTransaction.peg` by setting the value to the file location of the `.peg` file.
- C. Edit the setting in the `PegaStudioConfig.xml` by setting the value to the file location of the `.peg` file.
- D. Edit the setting in the `PegaRuntimeConfig.xml` by setting the value to the file location of the `.peg` file.

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

The `PegaRuntimeConfig.xml` file defines environment-specific configurations for the Pega Robot Runtime application.

To automatically launch a robotic solution (`.peg` file) when Runtime starts, you must configure the Startup Project path inside this XML file.

According to the Pega Robotics System Design and Implementation Guide, section "Configuring Pega Robot Runtime for Automatic Project Launch":

"To make Pega Robot Runtime automatically load and execute a robotic solution at startup, modify the `PegaRuntimeConfig.xml` file. Within this file, specify the absolute path of the solution's `.peg` file under the `<StartupProject>` element.

When Pega Robot Runtime is launched, it reads this configuration and automatically opens the specified project." Detailed Reasoning:

* A. `PegaStudioConfig.xml` - Incorrect. This file is specific to Robot Studio, not Runtime.

* B. `PegaRuntimeConfig.xml` - Correct. The `StartupProject` element in this file defines which project (`.peg` file) to load automatically when Runtime starts.

* C. `CommonConfig.xml` - Incorrect. Used for shared server and connection configurations, not for startup settings.

* D. `DisputeTransaction.peg` - Incorrect. This file is a project package and does not contain configuration data.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Runtime Configuration and Project Auto-Launch Setup section (Pega Robotics 19.1 and later).

NEW QUESTION # 75

Which step allows you to add a Watch to an automation variable?

- A. Right-click the incoming/outgoing execution port (yellow dot) of the variable, and select Add Watch.
- B. Right-click the execution link (yellow execution line) coming from the variable, and select Add Watch.
- C. Right-click the data link (blue propagate line) coming from the variable, and select Add Watch.
- D. Right-click the input/output data port (blue dot) of the variable, and select Add Watch.

Answer: C

Explanation:

NEW QUESTION # 76

You created an RDA solution for a company that uses an application bar with various buttons that trigger robotic automations. Some of the users complained that the application bar often locks up during automation processing. Others complained that the automations enter the same data two to three times each iteration.

You suspect that the users are triggering the crashes and duplicate automation behavior by double-clicking the buttons on the application bar.

How do you resolve the situation?

- A. After the initial click, disable the application bar buttons, display an automation progress bar, and then re-enable the buttons once the automation completes.
- B. Modify the automations so that they display a full message using the MessageManifest when the automations complete.
- **C. Talk with the management team about the existing application bar behavior and user error at the company.**
- D. Hide the application bar as soon as the user clicks one of the buttons, and allow the application bar to reappear once the automation completes.

Answer: C

NEW QUESTION # 77

In the Answer Area, drag each use case on the left to the correct Toolbox item.

□
