GitHub GitHub-Copilot Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Developer Use Cases for AI: This section of the exam measures skills of Full-Stack Developers and Cloud Engineers and covers how AI enhances developer productivity across various tasks such as learning new programming languages, debugging, writing documentation, and refactoring code. It discusses how GitHub Copilot integrates with the Software Development Lifecycle (SDLC) and its role in modernizing legacy applications. It also highlights the use of AI for personalized responses, sample data generation, and improving overall efficiency in software development.

Topic 2	<ul style="list-style-type: none"> How GitHub Copilot Works and Handles Data: This section of the exam measures the skills of Data Security Specialists and DevOps Engineers and covers how GitHub Copilot processes data, handles code suggestions and manages privacy concerns. It explains the data pipeline for Copilot's suggestions, how it gathers context, and how prompts are processed through its AI model. The section also discusses the limitations of AI-generated code, the effects of historical data on suggestions, and the role of prompt crafting. Best practices for improving prompt effectiveness and optimizing AI-generated responses are included.
Topic 3	<ul style="list-style-type: none"> Responsible AI: This section of the exam measures the skills of AI Ethics Analysts and AI Developers and covers the principles of responsible AI usage, the risks associated with AI, and the limitations of generative AI tools. It includes the importance of validating AI-generated outputs and operating AI systems responsibly. It also explores potential harms such as bias, privacy concerns, and fairness issues, along with methods to mitigate these risks. The ethical considerations of AI development and deployment are also discussed.
Topic 4	<ul style="list-style-type: none"> Testing with GitHub Copilot: This section of the exam measures skills of QA Engineers and Test Automation Specialists and covers AI-assisted testing methodologies, including the generation of unit tests, integration tests, and edge case detection. It explains how GitHub Copilot improves test effectiveness by suggesting relevant assertions and boilerplate test cases. The section also discusses privacy considerations, organizational code suggestion settings, and best practices for configuring GitHub Copilot's testing features.
Topic 5	<ul style="list-style-type: none"> GitHub Copilot Plans and Features: This section of the exam measures the skills of Software Engineers and IT Administrators and covers different GitHub Copilot plans, including Individual, Business, and Enterprise editions. It explains the integration of GitHub Copilot within IDEs and discusses key features such as inline chat, multiple suggestions, and exception handling. The section details the policies for managing GitHub Copilot within organizations, including auditing logs and API management. It also highlights advanced functionalities like knowledge bases for improved code quality and best practices for Copilot Chat usage.

GitHub Copilot Certification Exam Sample Questions (Q12-Q17):

NEW QUESTION # 12

Which of the following statements best describes the impact of GitHub Copilot on the software development process?

- A. It reduces overhead by automating testing workflows.
- B. It decreases software vulnerabilities from third party dependencies.
- C. It replaces the need for developers in the software development process.
- D. It increases productivity by automating repetitive coding tasks.

Answer: D

Explanation:

GitHub Copilot primarily impacts the software development process by increasing productivity through automating repetitive coding tasks.

NEW QUESTION # 13

Which Copilot Individual features are available when using a supported extension for Visual Studio, VS Code, or JetBrains IDEs? (Each correct answer presents part of the solution. Choose two.)

- A. Code suggestions
- B. Knowledge Base
- C. Pull Request Diff Analysis
- D. Chat

Answer: A,D

Explanation:

GitHub Copilot Individual provides code suggestions and chat features when used with supported IDE extensions like Visual Studio, VS Code, and JetBrains IDEs.

NEW QUESTION # 14

Which of the following GitHub Copilot Business related activities can be tracked using the organization audit logs?

- A. Code suggestions made by GitHub Copilot
- B. Suggestions blocked by duplication detection filtering
- C. Accepted chat suggestions
- D. Changes to content exclusion settings

Answer: D

NEW QUESTION # 15

How do you generate code suggestions with GitHub Copilot in the CLI?

- A. Describe the project's architecture -> Use the copilot generate command -> Accept the generated suggestion.
- B. Write code comments -> Press the suggestion shortcut -> Select the best suggestion from the list.
- C. Type out the code snippet -> Use the copilot refine command to enhance it -> Review the suggested command.
- D. Use copilot suggest -> Write the command you want -> Select the best suggestion from the list.

Answer: B

Explanation:

In the CLI, GitHub Copilot generates code suggestions by analyzing code comments. You write comments describing what you want, and Copilot provides relevant code suggestions. You then select the best suggestion from the list.

NEW QUESTION # 16

How can you use GitHub Copilot to get inline suggestions for refactoring your code? (Select two.)

- A. By running the gh copilot fix command.
- B. By adding comments to your code and triggering a suggestion.
- C. By using the "/fix" command in GitHub Copilot in-line chat.
- D. By highlighting the code you want to fix, right-clicking, and selecting "Refactor using GitHub Copilot."
- E. By highlighting the code you want to fix, right-clicking, and selecting "Fix using GitHub Copilot."

Answer: B,D

Explanation:

You can use GitHub Copilot for inline refactoring suggestions by adding comments to your code to trigger suggestions and by highlighting the code and selecting "Refactor using GitHub Copilot" from the context menu.

NEW QUESTION # 17
