

Passing JN0-481 Score Feedback | JN0-481 Mock Exam

BONUS!!! Download part of TroytecDumps JN0-481 dumps for free: <https://drive.google.com/open?id=1pNybLcx1kLRucz1bjOK798BN08CvbUm8>

We have applied the latest technologies to the design of our Juniper JN0-481 test prep not only on the content but also on the displays. As a consequence you are able to keep pace with the changeable world and remain your advantages with our Data Center, Specialist (JNCIS-DC) JN0-481 Training Materials.

Only if you download our software and practice no more than 30 hours will you attend your test confidently. Because our JN0-481 exam torrent can simulate limited-timed examination and online error correcting, it just takes less time and energy for you to prepare the JN0-481 exam than other study materials. As is known to us, maybe you are a worker who is busy in your career. Therefore, purchasing the JN0-481 Guide Torrent is the best and wisest choice for you to prepare your test. If you buy our JN0-481 questions torrent, the day of regretting will not come anymore. It is very economical that you just spend 20 or 30 hours then you have the JN0-481 certificate in your hand, which is typically beneficial for your career in the future.

JN0-481 Mock Exam, JN0-481 Latest Test Answers

Boring learning is out of style. Our JN0-481 study materials will stimulate your learning interests. Then you will concentrate on learning our JN0-481 practice guide for we have professional experts who have been in this career for over ten year apply the newest technologies to develop not only the content but also the displays. Nothing can divert your attention. If you are ready to change yourself, come to purchase our JN0-481 Exam Materials. Never give up your dreams.

Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q16-Q21):

NEW QUESTION # 16

Which two actions are required during Juniper Apstra's deploy phase? (Choose two.)

- A. Assign device profiles to the blueprint.
- B. Assign interlace maps to the blueprint.

- C. Assign resources to the blueprint.
- D. Assign user roles to the blueprint.

Answer: A,C

Explanation:

The deploy phase is the final step in the Juniper Apstra data center fabric design and deployment process. In this phase, you apply the Apstra-rendered configuration to the devices and verify the intent of the blueprint. Based on the web search results, we can infer the following actions are required during the deploy phase:

Assign device profiles to the blueprint. This action associates a specific vendor model to each logical device in the blueprint. Device profiles contain extensive hardware model details, such as form factor, ASIC, CPU, RAM, ECMP limit, and supported features. Device profiles also define how configuration is generated, how telemetry commands are rendered, and how configuration is deployed on a device. Device profiles enable the Apstra system to render and deploy the configuration according to the Apstra Reference Design. Assign resources to the blueprint. This action allocates the physical devices, IP addresses, VLANs, and ASNs to the logical devices, networks, and routing zones in the blueprint. Resources can be assigned manually or automatically by the Apstra system. Assigning resources ensures that the blueprint has all the necessary elements to generate the configuration and deploy the fabric5 . Assign user roles to the blueprint. This action is not required during the deploy phase. User roles are defined at the system level, not at the blueprint level. User roles determine the permissions and access levels of different users in the Apstra system. User roles can be system-defined or custom-defined .

Assign interface maps to the blueprint. This action is not required during the deploy phase.

Interface maps are defined at the design phase, not at the deploy phase. Interface maps are objects that map the logical interfaces of a logical device to the physical interfaces of a device profile. Interface maps enable the Apstra system to generate the correct interface configuration for each device in the fabric.

NEW QUESTION # 17

When editing a device configuration to install some manual changes, which procedure should be followed?

- A. Edit the pristine configuration of the device.
- B. Edit the configuration on the device directly by the CLI; the changes will automatically be adjusted in the Juniper Apstra configuration
- C. Add a persistent change to a device configuration with a configlet.
- D. Delete the device from the Juniper Apstra system, change the configuration, then re-import the device.

Answer: C

Explanation:

A configlet is a small piece of configuration that can be applied to a device or a group of devices to make persistent changes that are not overwritten by Apstra. Configlets can be used to install manual changes that are not part of the Apstra rendered configuration, such as custom commands, scripts, or features. Configlets can be created, edited, and deleted from the Apstra GUI or CLI.

NEW QUESTION # 18

Which statement is correct about an event log?

- A. You can view the configuration of a device.
- B. It stores alerts for anomalies in the event log.
- C. It runs on the worker node.
- D. It can be exported to a PDF file.

Answer: B

Explanation:

The event log in Juniper Apstra captures and stores system-generated events, including alerts for anomalies, device state changes, configuration actions, and other operational activities. It provides visibility into the health and behavior of the fabric, helping operators monitor and troubleshoot effectively.

NEW QUESTION # 19

You have a virtual network that needs controlled access to other virtual networks in the same routing zone. Using the Juniper Apstra UI, which feature would be used to accomplish this task?

- A. security policy
- B. routing policy
- C. anti-affinity policy
- D. interface policy

Answer: A

Explanation:

A security policy is the feature that would be used to accomplish the task of controlling access to other virtual networks in the same routing zone using the Juniper Apstra UI. A security policy allows you to define rules that specify which traffic is allowed or denied between different virtual networks, IP endpoints, or routing zones. A security policy can be applied to one or more virtual networks in the same routing zone, and it can use various criteria to match the traffic, such as source and destination IP addresses, protocols, ports, or tags. A security policy can also support DHCP relay, which enables the forwarding of DHCP requests from one virtual network to another. The other options are incorrect because:

A . interface policy is wrong because an interface policy is a feature that allows you to configure the interface parameters for the devices in a blueprint, such as interface names, speeds, types, or descriptions. An interface policy does not affect the access control between different virtual networks in the same routing zone.

B . anti-affinity policy is wrong because an anti-affinity policy is a feature that allows you to prevent certain devices or logical devices from being placed in the same rack or leaf pair in a blueprint. An anti-affinity policy is used to enhance the availability and redundancy of the network, not to control the access between different virtual networks in the same routing zone.

C . routing policy is wrong because a routing policy is a feature that allows you to configure the routing parameters for the devices in a blueprint, such as routing protocols, autonomous system numbers, route filters, or route maps. A routing policy does not affect the access control between different virtual networks in the same routing zone, unless the routing policy is used to filter or modify the routes exchanged between different routing zones. Reference:

Security Policy

Interface Policy

Anti-Affinity Policy

Routing Policy

NEW QUESTION # 20

How does Intent-Based Analytics align with the principles of intent-based networking in terms of data exploration and analysis?

- A. By providing real-time weather updates for the data center location
- B. By managing employee property allocations in the data center
- C. By facilitating dynamic queries for intent-based data exploration
- D. By predicting future changes in the network environment

Answer: C

NEW QUESTION # 21

.....

The series of JN0-481 measures we have taken is also to allow you to have the most professional products and the most professional services. I believe that in addition to our JN0-481 study materials, you have also used a variety of products. What kind of services on the JN0-481 training engine can be considered professional, you will have your own judgment. But I would like to say that our products study materials must be the most professional of the JN0-481 Exam simulation you have used. And you will find that our JN0-481 exam questions is worthy for your time and money.

JN0-481 Mock Exam: <https://www.troytecdumps.com/JN0-481-troytec-exam-dumps.html>

TroytecDumps' exam-oriented JN0-481 dumps have introduced the easiest and the most workable exam preparatory formula that 100% genuine and the best alternative of your money and time, Positive outcome, Companies providing JN0-481 exam guide have shown his own art and skill just like the eight immortals soaring over the ocean, You will not only get desirable goal with our JN0-481 exam practice but with superior outcomes that others who dare not imagine.

Integration Server Services, If you don't define the character set, or if JN0-481 you define it later in the document, you open up your site to hackers who can manipulate the character set and inject malicious code into the site.
