VCEPrep is a very good website for Google certification Professional-Cloud-Database-Engineer exams to provide convenience. According to the research of the past exam exercises and answers, VCEPrep can effectively capture the content of Google Certification Professional-Cloud-Database-Engineer Exam. VCEPrep's Google Professional-Cloud-Database-Engineer exam exercises have a very close similarity with real examination exercises.

Google Cloud Certified - Professional Cloud Database Engineer Sample Questions (Q96-Q101):

NEW QUESTION # 96

You have a large Cloud SQL for PostgreSQL instance. The database instance is not mission-critical, and you want to minimize operational costs. What should you do to lower the cost of backups in this environment?

- A. Select a different region to store your backups.
- **B. Reduce the number of automated backups that are retained to two (2).**
- C. Change the storage tier of the automated backups from solid-state drive (SSD) to hard disk drive (HDD).
- D. Set the automated backups to occur every other day to lower the frequency of backups.

Answer: B

Explanation:

By default, for each instance, Cloud SQL retains seven automated backups, in addition to on-demand backups. You can configure how many automated backups to retain (from 1 to 365). We charge a lower rate for backup storage than for other types of instances. <https://cloud.google.com/sql/docs/mysql/backup-recovery/backups>

NEW QUESTION # 97

You need to perform a one-time migration of data from a running Cloud SQL for MySQL instance in the us-central1 region to a new Cloud SQL for MySQL instance in the us-east1 region. You want to follow Google-recommended practices to minimize performance impact on the currently running instance. What should you do?

- A. Create two Datastream connection profiles, and use them to create a stream from one Cloud SQL instance to another.
- **B. Create a SQL dump file in Cloud Storage using a temporary instance, and then use that file to import into a new instance.**
- C. Create a CSV file by running the SQL statement SELECT...INTO OUTFILE, copy the file to a Cloud Storage bucket, and import it into a new instance.
- D. Create and run a Dataflow job that uses JdbcIO to copy data from one Cloud SQL instance to another.

Answer: B

NEW QUESTION # 98

Your company wants you to migrate their Oracle, MySQL, Microsoft SQL Server, and PostgreSQL relational databases to Google Cloud. You need a fully managed, flexible database solution when possible. What should you do?

- A. Migrate the MySQL, Microsoft SQL Server, and PostgreSQL databases to Compute Engine, and migrate the Oracle databases to Bare Metal Solution for Oracle.
- B. Migrate all the databases to Cloud SQL.
- C. Migrate the Oracle, MySQL, and Microsoft SQL Server databases to Cloud SQL, and migrate the PostgreSQL

databases to Compute Engine.

- **D. Migrate the MySQL, Microsoft SQL Server, and PostgreSQL databases to Cloud SQL, and migrate the Oracle databases to Bare Metal Solution for Oracle.**

Answer: D

NEW QUESTION # 99

You are choosing a new database backend for an existing application. The current database is running PostgreSQL on an on-premises VM and is managed by a database administrator and operations team. The application data is relational and has light traffic. You want to minimize costs and the migration effort for this application. What should you do?

- **A. Migrate the existing database to Cloud SQL for PostgreSQL.**
- B. Migrate the existing database to Cloud Spanner.
- C. Migrate the existing database to PostgreSQL running on Compute Engine.
- D. Migrate the existing database to Firestore.

Answer: A

NEW QUESTION # 100

Your team is building an application that stores and analyzes streaming time series financial data. You need a database solution that can perform time series-based scans with sub-second latency. The solution must scale into the hundreds of terabytes and be able to write up to 10k records per second and read up to 200 MB per second. What should you do?

- A. Use Cloud Spanner.
- B. Use Firestore.
- C. Use Bigtable
- **D. Use BigQuery.**

Answer: D

NEW QUESTION # 101

.....

In today's society, there are increasingly thousands of people put a priority to acquire certificates to enhance their abilities. With a total new perspective, Professional-Cloud-Database-Engineer study materials have been designed to serve most of the office workers who aim at getting a Professional-Cloud-Database-Engineer certification. The Professional-Cloud-Database-Engineer test guide offer a variety of learning modes for users to choose from, which can be used for multiple clients of computers and mobile phones to study online, as well as to print and print data for offline consolidation. We sincere hope that our Professional-Cloud-Database-Engineer Exam Questions can live up to your expectation.
