## NCLEX-RN専門知識内容 & NCLEX-RNテスト資料

君は一回だけでNCLEXのNCLEX-RN認定試験に合格したいなら、或いは自分のIT技能を増強したいなら、Japancertはあなたにとって最高な選択です。長年の努力を通じて、JapancertのNCLEXのNCLEX-RN認定試験の合格率が100パーセントになっていました。うちのNCLEXのNCLEX-RN試験問題集は完全な無制限のダンプが含まれているから、使ったら気楽に試験に合格することができます。

## NCLEX National Council Licensure Examination(NCLEX-RN) 認定 NCLEX-RN 試験問題 (Q200-Q205):

### 質問 # 200

A 27-year-old man was diagnosed with type I diabetes 3 months ago. Two weeks ago he complained of pain, redness, and tenderness in his right lower leg. He is admitted to the hospital with a slight elevation of temperature and vague complaints of "not feeling well." At 4:30 PM on the day of his admission, his blood glucose level is 50 mg. dinner will be served at 5:00 PM. The best nursing action would be to:

- A. Have him drink 4 oz of orange juice
- B. Ask him to dissolve three pieces of hard candy in his mouth
- C. Monitor him closely until dinner arrives
- D. Give him 3 tbsp of sugar dissolved in 4 oz of grape juice to drink

正解: A

解説:

Section: Questions Set A

Explanation:

(A) The combination of sugar and juice will increase the blood sugar beyond the normal range. (B) Concentrated sweets are not absorbed as fast as juice; consequently, they elevate the blood sugar beyond the normal limit. (C) Four ounces of orange juice will act immediately to raise the blood sugar to a normal level and sustain it for 30 minutes until supper is served. (D) There is an increased potential for the client's blood sugar to decrease even further, resulting in diabetic coma.

### 質問 # 201

A violent client remains in restraints for several hours. Which of the following interventions is most appropriate while he is in restraints?

- A. Release restraints every 2 hours for client to exercise.
- B. Give fluids if the client requests them
- C. Measure vital signs at least every 4 hours.
- D. Assess skin integrity and circulation of extremities before applying restraints and as they are removed.

正解: A

解説:

Explanation/Reference:

Explanation:

(A) Fluids (nourishment) should be offered at regular intervals whether the client requests (or refuses) them or not. (B) Skin integrity and circulation of the extremities should be checked regularly while the client is restrained, not only before restraints are applied and after they are removed. (C) Vital signs should be checked at least every 2 hours. If the client remains agitated in restraints, vital signs should be monitored even more closely, perhaps every 1-2 hours. (D) Restraints should be released every 2 hours for exercise, one extremity at a time, to maintain muscle tone, skin and joint integrity, and circulation.

### 質問 # 202

The mother of a 7-year-old mental health center client reports that the client has refused to attend gymnastics for the past 2 weeks. Prior to that time, the child liked going to this class and was attending 3 times a week. In talking with the client, the nurse would:

- A. Ask her to describe how things were at gymnastics before she started refusing to go
- B. Tell her that it is OK to be afraid of this activity
- C. Reassure her that things will get better once she begins the classes again
- D. Ask her why she doesn't like gymnastics anymore

正解: A

解説:

Explanation

(A) The child has not said that she dislikes gymnastics. (B) The nurse will be able to obtain information on what events occurred at gymnastics prior to her refusal to attend. The nurse will also gain information about the child's perception of the problem. (C) The

child has not said she is afraid to go to gymnastics. (D) False reassurance is inappropriate.

#### 質問 # 203

A 22-year-old client is 16 weeks pregnant. She and her husband are expecting their first baby. The client tells the nurse that her last normal menstrual period was February 16, with 3 days of spotting on February 17, 18, and 19. The nurse calculates her expected date of delivery to be:

- A. November 23rd
- B. December 26th
- C. December 9th
- D. September 14th

正解: A

解説:

Explanation/Reference:

Explanation:

(A) Naele's rule is as follows: add 7 days to the 1st day of the last menstrual period, subtract 3 months, and then add 1 year. (B) Naele's rule presumes that the woman has a 28-day menstrual cycle, with conception occurring on the 14th day of the cycle. Slight vaginal spotting may occur in early gestation for unknown reasons but is insignificant in the calculation of Naele's rule. (C) Naele's rule presumes that the woman has a 28-day menstrual cycle, with conception occurring on the 14th day of the cycle. Slight vaginal spotting may occur in early gestation for unknown reasons but is insignificant in the calculation of Naele's rule. (D) Naele's rule presumes that the woman has a 28-day menstrual cycle, with conception occurring on the 14th day of the cycle. Slight vaginal spotting may occur in early gestation for unknown reasons but is insignificant in the calculation of Naele's rule.

#### 質問 # 204

A 26-year-old client is diagnosed with an astrocytoma, a benign brain tumor. From the nurse's knowledge of the central nervous system, the nurse knows that benign tumors:

- A. Grow more rapidly than malignant tumors
- B. Can be just as dangerous as malignant tumors
- C. Can be removed surgically
- D. Do not warrant concern because they do not become malignant tumors

正解: B

解説:

Explanation

(A) Both a benign and a malignant tumor can displace or destroy nearby structures or increase intracranial pressure. (B) Benign or malignant brain tumors grow at different rates depending on the type of tumor. (C) Some benign tumors do become malignant tumors. (D) Whether or not a tumor is operable depends on its location and the amount of damage its removal will cause.
