Our SAP C_SEC_2405 practice test software is the most distinguished source for the SAP C_SEC_2405 Exam all over the world because it facilitates your practice in the practical form of the SAP C_SEC_2405 certification exam.

SAP Certified Associate - Security Administrator Sample Questions (Q13-Q18):

NEW QUESTION # 13

Which limitations apply to restricted users in SAP HANA Cloud? Note: There are 3 correct answers to this question.

- A. They cannot connect via ODBC or JDBC.
- B. They cannot create objects in the database.
- C. They only have full SQL access via the SQL console.
- D. They can only connect to the database using HTTP/HTTPS.
- E. They can only create objects in their own database schema.

Answer: B,D,E

NEW QUESTION # 14

What can be assigned directly to a user when using the SAP Launchpad service in SAP BTP?

- A. Catalogs
- B. Launchpad roles
- C. Spaces
- D. Role collections

Answer: B

NEW QUESTION # 15

What must you do if you want to enforce an additional authorization check when a user starts an SAP transaction?

- A. Assign the authorization object to be checked to the chosen transaction code in the SAP Default authorization data using transaction SU22 and set Check Indicator to "Check".
- B. Assign the authorization object to be checked to the chosen transaction code with transaction SU24 and set Default Status to "Yes".
- C. Assign authorization object S_START to the chosen transaction code with transaction SU24 and specify the Program ID and Object Type.
- D. Assign the authorization object and permissions to the chosen transaction code using transaction SE93.

Answer: C

NEW QUESTION # 16

After you maintained authorization object S_TABU_DIS and ACTVT field value 02 as authorization defaults for transaction SM30 in your development system, what would be the correct option for transporting only these changes to your quality assurance system?

- A. Save your changes to a Workbench transport request and transport using the Transport Management System.
- B. Save your changes and use the transport interface in SU25 to transport the changes using the Transport Management System.
- C. Save your changes to a Customizing transport request and transport using the Transport Management System.
- D. Save tables USOBT_C and USOBX_C to a transport request and transport using the Transport Management System.

Answer: A

Explanation:

When you maintain authorization defaults (e.g., adding authorization object S_TABU_DIS with ACTVT value 02 for transaction SM30) and need to transport these changes:

- * Changes are Cross-Client and Repository-Based:
- * Authorization default changes in SU24 are considered cross-client because they affect all clients in the system.
- * These changes are part of the SAP repository and are treated as Workbench requests.
- * Save Changes to a Workbench Transport Request:
- * Upon saving changes in SU24, the system prompts you to assign them to a transport request.
- * Select or create a Workbench transport request to capture the changes.
- * Use the Transport Management System (TMS):
- * Use TMS to transport the Workbench request from the development system to the quality assurance system.
- * This ensures that the authorization defaults are consistently applied across systems.

Why Other Options Are Incorrect:

- * Option B: Customizing transport requests are client-specific and not suitable for cross-client repository changes.
- * Option C: Manually transporting tables USOBT_C and USOBX_C is not recommended and can lead to inconsistencies.
- * Option D: SU25 is used for post-upgrade authorization adjustments, not for transporting SU24 changes.

SAP Security References:

- * SAP Help Portal: Transporting Authorization Data Changes
- * SAP Documentation: Using Workbench Requests for Cross-Client Objects
- * SAP Note: Best Practices for Transporting SU24 Authorization Defaults

NEW QUESTION # 17

When you maintain authorizations for SAPUI5 Fiori apps, which of the following object types is the front-end authorization object type?

- A. TADIR IWSG - SAP Gateway: Service Groups Metadata
- **B. TADIR IWSV - SAP Gateway Business Suite Enablement-Service**
- C. TADIR G4BA-SAP Gateway Odata V4 Backend Service Group & Assignments
- D. TADIR INA1 InA Service

Answer: B

Explanation:

- * Context: SAPUI5 Fiori apps require front-end authorizations managed via OData services.
- * Solution Explanation:
- * IWSV: Represents the service object type for SAP Gateway Business Suite Enablement.

SAP Security References:

- * SAP Gateway Authorization Documentation
- * SAP Fiori Authorization Maintenance Guide

NEW QUESTION # 18

.....

For the candidates of the exam, you pay much attention to the pass rate. If you can't pass the exam, all efforts you have done will be invalid.
