Why do you need to get help from Exam4Labs CompTIA 220-1201 Exam Questions?

As a matter of fact, since the establishment, we have won wonderful feedback and ceaseless business, continuously working on developing our 220-1201 test prep. We have been specializing 220-1201 exam dumps many years and have a great deal of long-term old clients, and we would like to be a reliable cooperater on your learning path and in your further development. While you are learning with our 220-1201 Quiz guide, we hope to help you make out what obstacles you have actually encountered during your approach for 220-1201 exam torrent through our PDF version, only in this way can we help you win the 220-1201 certification in your first attempt.

CompTIA A+ Core 1 Exam (2026) Sample Questions (Q175-Q180):

NEW QUESTION # 175

A recently installed printer is incorrectly aligning printed documents. Which of the following should the technician do first to fix this issue?

- A. Reinstall the drivers
- **B. Run the maintenance application.**
- C. Clean the rollers
- D. Upgrade the firmware

Answer: B

Explanation:

A . Run the maintenance application:

Most modern printers include a built-in maintenance application that can calibrate the print heads and correct alignment issues. Running this tool is the first step to address misalignment.

Incorrect Options:

B . Clean the rollers: Cleaning rollers is typically done to resolve paper feed or jamming issues, not alignment problems.

C . Upgrade the firmware: While updating firmware is beneficial for performance improvements, it is not the first step for fixing alignment.

D . Reinstall the drivers: Misaligned printing is usually hardware-related, not a driver issue.

Key Takeaway: The maintenance application should be run first to resolve alignment issues in a newly installed printer.

NEW QUESTION # 176

Users have noticed their devices are frequently disconnecting or experiencing slow speeds in the company lobby, but the Wi-Fi signal is strong. Which of the following is the first step to troubleshoot the issue?

- **A. Inspect the area for possible sources of interference or physical obstructions that could be disrupting the signal.**
- B. Increase the number of access points throughout the building to boost the overall signal strength.
- C. Recommend that all affected users switch to a wired connection to avoid wireless instability.
- D. Change the wireless network frequency from 2.4GHz to 5GHz to enhance the connection stability and speed.

Answer: A

Explanation:

Even with a strong Wi-Fi signal, interference from devices such as microwaves, Bluetooth devices, or nearby access points can cause slow speeds or disconnections. The first step is to inspect for and identify potential interference sources or obstacles affecting signal quality.

NEW QUESTION # 177

A user reports slow internet browsing. The technician finds high CPU and memory usage, and pop-ups occur every minute. Which of the following should the technician do next?

- A. Download and install the latest drivers.
- **B. Update the anti-malware signatures and scan the system.**
- C. Escalate to the network team to check end-to-end connectivity.
- D. Check the wireless settings and validate the DHCP configuration.

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation:

High resource usage along with frequent pop-ups are strong signs of malware infection. The next logical step is to update anti-malware definitions and run a full scan to detect and remove threats.

* Option A: Network performance is likely not the root cause - local system behavior points to malware.

* Option B: Drivers affect hardware functionality; they don't resolve malware-related slowness.

* Option D: DHCP issues usually cause IP conflicts or no network access, not CPU spikes or pop-ups.

CompTIA A+ Core 1 Exam Objective Reference:

* Objective 4.2: Given a scenario, detect, remove, and prevent malware using appropriate tools and methods.

NEW QUESTION # 178

A technician needs to configure a shared multifunction printer to consume the least amount of supplies.

Which of the following settings should the technician change?

- A. Tray settings
- B. User authentication
- C. Sleep timer
- **D. Duplex configuration**

Answer: D

Explanation:

Enabling duplex printing makes the printer use both sides of each sheet of paper, reducing overall paper consumption and minimizing supply usage.

NEW QUESTION # 179

A drive for a RAID 1 array fails. Users are concerned that information could be lost. Which of the following is the best way to manage the situation?

- **A. Replacing the defective disk and syncing the new one so that all files are retained**
- B. Repairing and reinstalling the defective disk to recover any files
- C. Finding the latest backup of the legacy server and restoring it to transfer the files
- D. Discarding the defective disk without further action

Answer: A

Explanation:

In RAID 1 (mirroring), data is duplicated across two drives. If one drive fails, the array continues to function using the remaining drive. Replacing the failed disk and rebuilding (resyncing) the array restores full redundancy without data loss.

NEW QUESTION # 180

.....

In modern society, everything is changing so fast with the development of technology. If you do not renew your knowledge and skills, you will be wiped out by others. Our 220-1201 study materials also keep up with the society. After all, new technology has been applied in many fields. It is time to strengthen your skills. Our 220-1201 Study Materials will help you master the most popular skills in the job market. Then you will have a greater chance to find a desirable job. Also, it doesn't matter whether you have basic knowledge about the 220-1201 study materials.
