

# Pass Guaranteed Quiz 2026 Cisco 300-620: Unparalleled Implementing Cisco Application Centric Infrastructure Free Pdf Guide

DOWNLOAD the newest DumpTorrent 300-620 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1WYJhi0I5xmpG6S8GkwKvS86l-m\\_rC3xo](https://drive.google.com/open?id=1WYJhi0I5xmpG6S8GkwKvS86l-m_rC3xo)

Our 300-620 study materials have enough confidence to provide the best 300-620 exam torrent for your study to pass it. With many years work experience, we have fast reaction speed to market change and need. In this way, we have the latest 300-620 guide torrent. You don't worry about that how to keep up with the market trend, just follow us. We can say that our 300-620 Test Questions are the most suitable for examinee to pass the 300-620 exam, you will never regret to buy it.

The Cisco 300-620 exam also tests the candidate's ability to integrate ACI with other data center services, such as load balancers, firewalls, and virtualization platforms. Candidates must understand how to configure ACI to work with these services and troubleshoot any issues that may arise.

Cisco 300-620 (Implementing Cisco Application Centric Infrastructure) certification exam is a popular exam among IT professionals who are interested in pursuing a career in networking. Implementing Cisco Application Centric Infrastructure certification exam is designed to test the candidate's knowledge and skills in implementing and managing Cisco's Application Centric Infrastructure (ACI) technology. Passing this certification exam demonstrates that the candidate has the necessary skills and knowledge to implement and manage ACI in a real-world environment.

Cisco 300-620 Exam covers a range of topics, including ACI architecture and components, fabric discovery and initialization, tenant

and endpoint configuration, policy management, and troubleshooting. Candidates are also expected to have a good understanding of the latest industry trends and best practices related to data center networking. Passing 300-620 exam not only helps professionals demonstrate their skills and knowledge but also opens up new career opportunities, such as ACI consultant, network engineer, and data center architect.

## 300-620 Valid Exam Papers & 300-620 Latest Examprep

The 300-620 training prep you see on our website are definitely the highest quality learning products on the market. Of course, the correctness of our 300-620 learning materials is also very important, after all, you are going to take the test after studying. And a lot of our worthy customers praised our accuracy for that sometimes they couldn't find the 300-620 Exam Braindumps on the other websites or they couldn't find the updated questions and answers. Just buy our 300-620 study guide and you won't regret!

### Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q289-Q294):

#### NEW QUESTION # 289

Refer to the exhibit, An engineer is deploying a Cisco ACI environment but experiences a STP loop between switch1 and switch2. Which configuration step is needed to break the STP loop?

- A. Enable the native VLAN on the interfaces facing the MST switches using static ports in a dedicated EPG.
- B. Configure the STP instance to VLAN mapping under the switch STP policy.
- C. Configure a Layer 2 external bridged network on the interfaces facing the MST switches.
- D. Enable BPDU filter under the STP interface policy on the Interfaces facing the MST switches.

**Answer: A**

#### NEW QUESTION # 290

A Solutions Architect is asked to design two data centers based on Cisco ACI technology that can extend L2/ L3, VXLAN, and network policy across locations. ACI Multi-Pod has been selected. Which two requirements must be considered in this design? (Choose two.)

- A. Multi-Pod requires multiple APIC Controller Clusters, one per pod. Make sure those clusters can communicate to each other through a highly available connection.
- B. A single APIC Cluster is required in a Multi-Pod design. It is important to place the APIC Controllers in different locations in order to maximize redundancy and reliability.
- C. ACI underlay protocols, i.e. COOP, IS-IS and MP-BGP, spans across pods. Create QoS policies to make sure those protocols have higher priority.
- D. ACI Multi-Pod does not support Firewall Clusters across Pods. Firewall Clusters should always be local.
- E. ACI Multi-Pod requires an IP Network supporting PIM-Bidir.

**Answer: A,C**

Explanation:

Section: ACI Anywhere

Explanation/Reference:

#### NEW QUESTION # 291

An engineer configured Layer 2 extension from the ACI fabric and changed the Layer 2 unknown unicast policy from Flood to Hardware Proxy. How does this change affect the flooding of the L2 unknown unicast traffic?

- A. It is forwarded to one of the APICs to perform as a proxy.
- B. It is dropped by the leaf when the destination endpoint is not present in the endpoint table.
- C. It is forwarded to one of the spines to perform as a spine proxy.
- D. It is flooded within the whole fabric.

**Answer: C**

#### NEW QUESTION # 292

An engineer must limit management access to the Cisco ACI fabric that originates from a single subnet where the NOC operates. Access should be limited to SSH and HTTPS only. Where should the policy be configured on the Cisco APIC to meet the requirements?

- A. ACL on the console interface
- B. ACL on the management interface of the APIC
- C. policy on the management VLAN
- **D. policy in the management tenant**

**Answer: D**

Explanation:

#### NEW QUESTION # 293

What is MP-BGP used for in Cisco ACI fabric?

- A. MP-BGP VPNv4 AF is used as protocol on L3Out between a border leaf and an external router
- B. MP-BGP VPNv4 AF is used between spines in an ACI Multi-Pod fabric to propagate the endpoint
- C. MP-BGP Layer 2 VPN EVPN AF is used to propagate L3Out routes that are received from a border leaf.
- **D. MP-BGP VPNv4 AF is used to propagate L3Out routes that are received from a border leaf to the fabric.**

**Answer: D**

Explanation:

In Cisco ACI fabric, MP-BGP (Multi-Protocol Border Gateway Protocol) is utilized for several purposes, one of which includes the propagation of L3Out (Layer 3 Out) routes within the fabric. Specifically, MP-BGP with VPNv4 address family (AF) is used in the ACI infra VRF (overlay-1 VRF) to distribute external routes from a border leaf to other leaf switches. This allows for the efficient dissemination of routing information and ensures that all relevant leaf switches are aware of the routes necessary to reach external networks.
