Official Analytics-DA-201 Practice Test & Analytics-DA-201 Reasonable Exam Price

Passing the Analytics-DA-201 exam has never been so efficient or easy when getting help from our Analytics-DA-201 training materials. This way is not only financially accessible, but time-saving and comprehensive to deal with the important questions emerging in the real exam. All exams from different suppliers will be easy to handle. Actually, this Analytics-DA-201 Exam is not only practical for working or studying conditions, but a manifest and prestigious show of your personal ability.

Salesforce Certified Tableau Data Analyst Sample Questions (Q170-Q175):

NEW QUESTION # 170

In a dataset, you have a string field named Name that contains unnecessary semicolons. Which function should you use to remove the semicolons from the Name field?

- A. REPLACE
- B. SPLIT
- C. CONTAINS
- D. TRIM

Answer: A

Explanation:

The REPLACE function is used to replace all occurrences of a substring within a string with another substring. In this case, it can be used to remove the semicolons from the Name field by replacing them with an empty string. For example, REPLACE ("John;Doe", ";", "") = "JohnDoe". References: The information is based on the following sources:

* String Functions - Tableau

* Remove special characters and add a semi colon in a word - Tableau

NEW QUESTION # 171

A Data Analyst needs to develop a Sales Dashboard that users can access through a computer or by phone and tablet using the same URL link.

How should the analyst create dashboards that are formatted for specific devices?

- A. Set the dashboard size to Automatic and let Tableau adjust the layout automatically for each device size.
- B. Use floating containers on the dashboard so that the content shifts responsively to adjust for each device.
- C. Create a workbook for each device type and let the users know which one to open on which device.
- D. Add device layouts for the dashboard so that appropriate layouts are shown based on the device.

Answer: D

NEW QUESTION # 172

You have the following dataset.

Region	Profit	Sales
Central	39706	501240
East	671523	678781
South	46749	391722
West	100000	725458

You need to create the following worksheet.

Region	Profit	Sales
Central	501,240	
East	671,523	
South	391,722	
West	725,458	

Parameter 1

- sales
- Sales
- profit

The table must show either profit or sales based on the selection from the Parameter 1 menu.

Which three actions should you perform in order

(Place the three correct options in order Use the arrows to move Options to Answer Area Use Answer Area arrows to reorder the options)

Options	Answer Area
Drag the calculated field to Detail on the Marks card and add Region to the Columns shelf	
Create a calculated field that uses the following formula <pre>IF [Sales]=[Parameter 1] THEN 'sales' ELSEIF [Profit]=[Parameter 1] THEN 'profit' END</pre>	
Create a parameter that has list string values of profit and sales. Select Show Parameter	
Create a calculated field that uses the following formula: <pre>IF [Parameter 1]='sales' THEN [Sales] ELSEIF [Parameter 1]='profit' THEN [Profit] END</pre>	
Drag the calculated field to Text on the Marks card and add Region to the Rows shelf	

Answer:

Explanation:

Options	Answer Area

Drag the calculated field to Text on the Marks card and add Region to the Rows shelf

NEW QUESTION # 173

You have the following dashboard that contains two sheets.

Region	2018	2019	2020	2021	Consumer	Corporate	Home Office
Central	103,838	102,874	147,419	147,098	252,031	157,996	91,213
East	128,680	134,330	180,686	213,083	350,508	200,409	127,464
South	103,846	71,360	93,619	127,906	195,581	121,886	74,255
West	147,883	139,966	187,480	250,128	362,881	225,855	136,722

You want to minimize the whitespace between the sheets.
What should you configure?

- A. The size
- **B. The padding**
- C. The position
- D. The background
- E. The border

Answer: B

Explanation:

To minimize the whitespace between the sheets, you should configure the padding of the sheets and the dashboard. Padding is the amount of space between the edge of a sheet or dashboard and its content. You can adjust the padding by using the Layout tab in the Format pane. You can reduce the padding for each sheet by selecting the sheet and changing the values for the inner and outer padding. You can also reduce the padding for the dashboard by selecting the dashboard and changing the values for the outer padding. Reducing the padding will make the sheets and the dashboard more compact and eliminate unnecessary whitespace.

- * Format Dashboards - Tableau
- * Tableau Certified Data Analyst Study Guide

NEW QUESTION # 174

You have the following Map.

You need the map to appear as shown in the following visualization.

What should you do?

- A. Drag Location to Size on the Marks card.
- B. Change the mark type to Map.
- C. Drag Population to Size on the Marks card.
- D. Change the opacity to 75%.
- E. Change the mark type to Density.

Answer: E

Explanation:

To create a map visualization that shows the concentration of data points in different locations, you need to change the mark type to Density. This will create a heatmap that uses color and size to indicate the density of the data points. You can also adjust the intensity and transparency of the density marks to suit your needs. References: The information is based on the following sources:

* Create Heatmaps that Show Trends or Density in Tableau

* Build a Simple Map - Tableau

NEW QUESTION # 175

.....

All these three Analytics-DA-201 real dumps formats contain the actual and updated Salesforce Certified Tableau Data Analyst Analytics-DA-201 exam questions that will surely repeat in the upcoming Analytics-DA-201 exam and you can easily pass it with good scores. Today is the best time to learn new in-demand skills and upgrade your knowledge. Yes, you can do this easily.
