API Pressure Vessel Inspector Sample Questions (Q14-Q19):

NEW QUESTION # 14

When a corroded area of considerable size is encountered and the circumferential stresses govern, what is maximum length over which the thickness can be averaged for a vessel with an inside diameter of 48 inches?

- A. 20 inches
- B. 24 inches
- C. 20 percent of the vessel diameter
- D. 25 percent of the vessel diameter

Answer: A

NEW QUESTION # 15

Discuss how API-510 standards can be effectively communicated and implemented across an organization with multiple international locations.

Answer:

Explanation:

Effectively communicating and implementing API-510 standards across multiple international locations requires a centralized approach to standardization. This can be achieved by developing a comprehensive training program that is consistent across all locations, supported by digital tools such as webinars and e-learning modules that cover API-510 standards. Regular audits and reviews should be conducted to ensure compliance, and findings should be shared across the network to promote best practices. Additionally, appointing dedicated compliance officers or teams within each region can help address specific local compliance challenges and ensure the standards are applied uniformly.

NEW QUESTION # 16

The surface remote from a welded joint is defined as:

- A. 2 inches on either side of the weld
- B. 1 inch on either side of the weld or twice the minimum thickness whichever is less
- C. For vessels with inside diameters less than 60 inches 20 inches or ½ the vessel diameter
- D. 1 inch on either side of the weld or twice the minimum thickness whichever is greater

Answer: D
