

Plat-Dev-301 Reliable Dumps - Valid Plat-Dev-301 Learning Materials

Plat-Dev-301

Correct Answer: D

QUESTION: 7

An environment has two Apex Triggers: an after-update trigger on Account and an after-update trigger on Contact. The Account after-update trigger fires whenever an Account's address is updated, and it updates every associated Contact with that address. The Contact after-update trigger fires on every edit, and it updates every Campaign Member record related to the Contact with the Contact's state. Consider the following: A mass update of 200 Account records' addresses, where each Account has 50 Contacts. Each Contact has 1 Campaign Member. This means there are 10,000 Contact records across the Accounts and 10,000 Campaign Member records across the contacts. What will happen when the mass update occurs?

- Option A : The mass update will fail, since the two triggers fire in the same context, thus exceeding the number of records processed by DML statements.
Option B : There will be no error, since each trigger fires within its own context and each trigger does not exceed the limit of the number of records processed by DML statements.
Option C : There will be no error, since the limit on the number of records processed by DML statements is 50,000.
Option D : The mass update of Account address will succeed, but the Contact address updates will fail due to exceeding number of records processed by DML statements.

Correct Answer: B

QUESTION: 8

Which type of controller is best suited when you want all of the basic DML functions from an object's normal new/edit page and want to include multiple records?

- Option A : Standard Controller
Option B : Standard List/Set Controller
Option C : Controller Extensions
Option D : Custom Controller

Correct Answer: B

QUESTION: 9

A company wants to implement a new call center process for handling customer service calls. It requires service reps to ask for the caller's account number before proceeding with the rest of their call script. Following best practices, what should a developer use to meet this requirement?

- Option A : Approvals
Option B : Flow Builder
Option C : Apex Trigger
Option D : Process Builder

In modern society, innovation is of great significance to the survival of a company. The new technology of the Plat-Dev-301 study materials is developing so fast. So the competitiveness among companies about the study materials is fierce. Luckily, our company masters the core technology of developing the Salesforce Certified Platform Developer II - Multiple Choice study materials. No company in the field can surpass us. So we still hold the strong strength in the market. At present, our Plat-Dev-301 study materials have applied for many patents. We attach great importance on the protection of our intellectual property. What is more, our research center has formed a group of professional experts responsible for researching new technology of the Plat-Dev-301 Study Materials. The technology of the Plat-Dev-301 study materials will be innovated every once in a while. As you can see, we never stop innovating new version of the Plat-Dev-301 study materials. We really need your strong support.

To be successful in your social life and own a high social status you must own good abilities in some area and plenty of knowledge. Passing the test Plat-Dev-301 exam can make you achieve those goals and prove that you are competent. Buying our Plat-Dev-301

practice test can help you pass the exam fluently and the learning costs you little time and energy. The questions and answers of our Plat-Dev-301 Test Question are chosen elaborately and to simplify the important information to make your learning relaxing and efficient.

Valid Plat-Dev-301 Learning Materials & Plat-Dev-301 Valid Test Book

The Salesforce Certified Platform Developer II - Multiple Choice prep torrent that we provide is compiled elaborately and highly efficient. You only need 20-30 hours to practice our Plat-Dev-301 exam torrent and then you can attend the exam. For most of our customers, who are busy with their jobs or other things. But if they use our Plat-Dev-301 test prep, they won't need so much time to prepare the exam and master exam content in a short time. What they need to do is just to spare 1-2 hours to learn and practice every day and then pass the exam with Plat-Dev-301 Test Prep easily. It costs them little time and energy to pass the exam.

Salesforce Certified Platform Developer II - Multiple Choice Sample Questions (Q172-Q177):

NEW QUESTION # 172

A company has a custom component that allows users to search for records of a certain object type by invoking an Apex Controller that returns a list of results based on the user's input. When the search is completed, a searchComplete event is fired, with the results put in a results attribute of the event. The component is designed to be used within other components and may appear on a single page more than once.

What is the optimal code that should be added to fire the event when the search has completed?

- A)
- ☐ B)
- ☐ C)
- ☐ D)

- A. Option C
- B. Option D
- **C. Option B**
- D. Option A

Answer: C

Explanation:

The correct code to fire the event when the search has completed in a Lightning component is option B.

`$A.get("e.c.searchComplete")` is the syntax used to get the event, `setParams` is used to set the parameters, and `fire` is used to dispatch the event.

NEW QUESTION # 173

A developer created a JavaScript library that simplifies the development of repetitive tasks and features and uploaded the library as a static resource called `rsutils` in Salesforce. Another developer is coding a new Lightning web component (LWC) and wants to leverage the library. Which statement properly loads the static resource within the LWC?

- A. `const jsUtiliv = SA.get{'SResource.isUtils'};`
- B. `import jsUtilities from '@salesforce/resourceUrl/jaUtiles';`
- **C. `import {jsUtilities} from '@salasforce/resourceUrl/jsUtils';`**
- D. `<lightning-require scripts="{|$Resource.jaUtils}" />`

Answer: C

Explanation:

To load a static resource within a Lightning web component, you should use an import statement with the `@salesforce/resourceUrl` module. This statement correctly refers to the static resource by its name.

NEW QUESTION # 174

Refer to the exhibit

Users of this Visualforce page complain that the page does a full refresh every time the Search button is pressed. What should the developer do to ensure that a partial refresh is made so that only the section identified with opportunity List is re-drawn on the screen?

- A. Implement the `<apex:actionfunction>` tag with `immediate = true`.
- B. Enclose the DATA table within the `<apex:actionRegion>` tag.
- C. Implement the render attribute on the `<apex:commandButton>` tag.
- D. Ensure the action method search returns null.

Answer: C

Explanation:

To ensure that only a part of the Visualforce page is refreshed, developers can use the `reRender` attribute of the `<apex:commandButton>` tag. This attribute specifies the IDs of the components that should be re-rendered as a result of the action method being completed. In this case, setting the `reRender` attribute to the ID of the `<apex:pageBlockSection>` that contains the opportunity list will cause only that section to be updated on the page, resulting in a partial page refresh.

The correct answer is B because it uses the `reRender` attribute correctly to update only the specific part of the page (opportunityList) without a full page refresh.

Salesforce Developer Documentation on Visualforce AJAX Components: Visualforce Developer Guide - CommandButton

NEW QUESTION # 175

There are user complaints about slow render times of a custom data table within a Visualforce page that loads thousands of Account records at once.

What can a developer do to help alleviate such issues?

- A. Use the standard Account List controller and implement pagination.
- B. Use the transient keyword in the Apex code when querying the Account records.
- C. Use JavaScript remoting to query the accounts.
- D. Upload a third-party data table library as a static resource.

Answer: A

Explanation:

Implementing pagination using the standard Account List controller in Visualforce is a proven method to improve performance when displaying large sets of data. Pagination allows only a subset of records to be fetched and displayed at a time, thereby reducing the load time of the page.

NEW QUESTION # 176

When developing a Lightning web component, which setting displays lightning-layout-items in one column on small devices, such as mobile phones, and in two columns on tablet-size and desktop-size screens?

- A. Set `size="12"` `medium-device-size="6"`
- B. Set `size="6"` `small-device-size="12"`
- C. Set `size="6"` `mobile-device-size="12"`
- D. Set `size="12"` `tablet-device-size="6"`

Answer: A

Explanation:

To display lightning-layout-items in one column on small devices and in two columns on larger devices, you should set the `size` attribute to "12" for small devices and the `medium-device-size` attribute to "6". This ensures that on small devices each item takes the full width, and on medium or larger devices, items take up half the width.

NEW QUESTION # 177

.....

Under the hatchet of fast-paced development, we must always be cognizant of social long term goals and the direction of the development of science and technology. Adapt to the network society, otherwise, we will take the risk of being obsoleted. Our Salesforce Certified Platform Developer II - Multiple Choice qualification test help improve your technical skills and more importantly, helping you build up confidence to fight for a bright future in tough working environment. Our professional experts devote plenty of time and energy to developing the Plat-Dev-301 Study Tool. You can trust us and let us be your honest cooperators in your future development. Here are several advantages about our Salesforce Certified Platform Developer II - Multiple Choice exam for your reference. We sincerely suggest you to spare some time to have a glance over the following items.

Valid Plat-Dev-301 Learning Materials: https://www.dumpkiller.com/Plat-Dev-301_braindumps.html

Salesforce Plat-Dev-301 exam dumps are available in PDF with instant download, Plat-Dev-301 training materials contain about several hundred exam questions which is made by past original test questions and forecast test questions, We ensure that it is your last time to prepare for the Salesforce Valid Plat-Dev-301 Learning Materials exam, Each questions & answers from Plat-Dev-301 practice questions are all refined and summarized from a large number of technical knowledge, chosen after analysis of lots of datum.

Validating Your Sites for Accessibility, The Rules of Initializers, Salesforce Plat-Dev-301 Exam Dumps are available in PDF with instant download, Plat-Dev-301 training materials contain about several Plat-Dev-301 hundred exam questions which is made by past original test questions and forecast test questions.
