

# Oracle 1Z0-1170 Exam is Easy with Our High-quality 1Z0-1170 Reliable Test Pattern: Oracle Linux Virtualization Manager Associate Surely

Everything will be changed if you buy our 1Z0-1170 actual study guide, and you will be surprised with not only high grades but also the certification that you got for the help of our 1Z0-1170 exam questions. As you know, salaries are commensurate to skills while certificates represent skills. Therefore, you are sure to get high salaries with certification after using our 1Z0-1170 Test Torrent. Last but not the least, after you enter into large companies with 1Z0-1170 certification, you can get to know more competent people, which can certainly enlarge your circle of friends.

## Oracle 1Z0-1170 Exam Syllabus Topics:

| Section                                                 | Objectives                                                                                                                                                                                                                                                                                                                                                                                                                    |

## Test 1Z0-1170 Dumps Demo | 1Z0-1170 Valid Examcollection

Each of us expects to have a well-paid job, with their own hands to fight their own future. But many people are not confident, because they lack the ability to stand out among many competitors. Now, our 1Z0-1170 learning material can help you. It can let users in the shortest possible time to master the most important test difficulties, improve learning efficiency. Also, by studying hard, passing a qualifying examination and obtaining a Oracle certificate is no longer a dream. With these conditions, you will be able to stand out from the interview and get the job you've been waiting for.

## Oracle Linux Virtualization Manager Associate Sample Questions (Q174-Q179):

### NEW QUESTION # 174

What is a risk of aggressive memory overcommit without proper monitoring?

- A. Improved performance in every case
- B. Permanent disabling of host fencing
- C. Automatic elimination of all storage bottlenecks
- D. Host memory pressure and VM performance degradation

**Answer: D**

Explanation:

Memory overcommitment must be balanced with monitoring because excessive pressure can degrade VM and host performance.

### NEW QUESTION # 175

Which port is commonly associated with PostgreSQL database access?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: C**

Explanation:

The Engine database uses PostgreSQL, which commonly uses port 5432 where network database access is required.

#### NEW QUESTION # 176

What does the internal@sys profile represent in OLVM user management?

- A. An external Active Directory forest
- B. A storage domain reserved for templates
- C. A cluster scheduling policy
- D. The internal authentication domain used for built-in OLVM users

**Answer: D**

Explanation:

The internal@sys profile is used for internal OLVM users, while external profiles can be added for enterprise directory sources.

#### NEW QUESTION # 177

What is the main purpose of an OLVM Data Domain?

- A. Store only network bonding configuration
- B. Store only legacy exported VM backups
- C. Store virtual machine disks and related VM data
- D. Store only installation ISO images

**Answer: C**

Explanation:

A Data Domain is the primary storage domain used for active VM disk storage.

#### NEW QUESTION # 178

Which feature directly helps a VM restart on another host after failure when configured as highly available?

- A. Console proxy
- B. Quota
- C. High Availability
- D. KSM

**Answer: C**

Explanation:

High Availability is the OLVM feature that supports VM restart on healthy hosts after certain host failures.

#### NEW QUESTION # 179

.....
