

Quiz Pass-Sure Oracle - 1z0-1046-25 - Detailed Oracle Global Human Resources Cloud 2025 Implementation Professional Answers

2026 Latest Pass4Leader 1z0-1046-25 PDF Dumps and 1z0-1046-25 Exam Engine Free Share: <https://drive.google.com/open?id=1TgbOnRgE--gBP8sS-jVX9lryNf4Nde7u>

Passing 1z0-1046-25 Certification Exam is not an easy task? Choosing Pass4Leader 1z0-1046-25 exam training materials, passing 1z0-1046-25 exam is quite possible. Pass4Leader's 1z0-1046-25 exam training materials is the highly certified IT professionals' collection of experience and innovation results in this field, and have absolute authority. You won't regret to choose Pass4Leader.

So for this reason, our Oracle 1z0-1046-25 are very similar to the actual exam. With a vast knowledge in this field, Pass4Leader always tries to provide candidates with the actual questions so that when they appear in their real Oracle 1z0-1046-25 Exam they do not feel any difference. The Desktop Oracle 1z0-1046-25 Practice Exam Software of Pass4Leader arranges a mock exam for the one who wants to evaluate and improve preparation.

>> Detailed 1z0-1046-25 Answers <<

1z0-1046-25 Reliable Exam Bootcamp | 1z0-1046-25 Certification Practice

Pass4Leader has a strong IT elite team. They use their professional eyes searching the latest 1z0-1046-25 braindumps and 1z0-1046-25 certification training materials. With them, you can save more time to study and pass the 1z0-1046-25 Exam. After you purchase our 1z0-1046-25 exam dumps, we will offer free update service in one year.

Oracle Global Human Resources Cloud 2025 Implementation Professional Sample Questions (Q132-Q137):

NEW QUESTION # 132

When creating your THEN condition, which Approver Types enable you to configure the Automatic Approval Action type?

- A. Users, Representative, Management Hierarchy, Job Level Based Line Manager Hierarchy, Position Hierarchy
- B. Management Hierarchy, Job Level Based Line Manager Hierarchy, Position Hierarchy
- **C. Approval Groups, Representative, Management Hierarchy, Position Hierarchy**
- D. Representative, Management Hierarchy, Position Hierarchy
- E. Application Role, Users, Representative, Approval Groups

Answer: C

Explanation:

In Oracle HCM Cloud's Transaction Console, approval rules are defined with "IF" and "THEN" conditions.

The "THEN" condition specifies the action, such as "Automatic Approval," and the approver type determines who or what approves

the transaction. The Automatic Approval Action type allows a transaction to be approved without human intervention based on predefined rules. According to Oracle documentation, the approver types that support configuring Automatic Approval include Approval Groups (static or dynamic groups of approvers), Representative (e.g., HR or Payroll Representative), Management Hierarchy (based on supervisor hierarchy), and Position Hierarchy (based on position structure). These types can be configured to automatically approve under specific conditions.

Option A omits Approval Groups, which is a valid type for automatic approval. Option B includes "Users" and "Job Level Based Line Manager Hierarchy," but "Users" (individual named users) and "Job Level" are not typically used for automatic approval—they are more suited for manual routing. Option C includes

"Application Role," which is used for role-based access, not automatic approval in workflows. Option D misses Approval Groups and Representative, both critical for this feature. Option E correctly lists Approval Groups, Representative, Management Hierarchy, and Position Hierarchy, aligning with Oracle's supported approver types for automatic approval.

References: Oracle Docs - "Implementing Global Human Resources" (docs.oracle.com, published 2023-12-12), Approval Rules Configuration.

NEW QUESTION # 133

Challenge 2

Manage Legal Entity

Scenario

The newly acquired company that manufactures spring hinges for spectacles in Michigan will be its own legal entity. You need to create a legal entity for this company.

Task

Create a legal entity in the HCM system that will be its own Payroll Statutory Unit, where:

The name of the legal entity is X Cloud vision

The identifier is XCLDVIS

The legal address is, as previously created

The EIN or TIN is 93654213X

The Legal Reporting Unit Registration Number is 1212321X

Answer:

Explanation:

See the solution in Explanation below.

Explanation:

This task requires creating a legal entity in Oracle Global Human Resources Cloud for a newly acquired company, X Cloud Vision, that manufactures spring hinges for spectacles in Michigan. The legal entity must also be its own Payroll Statutory Unit (PSU), with specific details provided: name, identifier, legal address (previously created), EIN/TIN, and Legal Reporting Unit Registration Number. Below is a verified, step-by-step solution based on Oracle's official documentation, ensuring accuracy and compliance with the system's functionality as of the latest releases Step-by-Step Solution Step 1: Log in to Oracle Fusion Applications

* Action: Log in to Oracle Fusion Applications using a user account with privileges such as Application Implementation Consultant or HCM Application Administrator. These roles grant access to the Setup and Maintenance work area.

* Explanation: The Setup and Maintenance work area is the central hub for configuration tasks, including managing legal entities. The user must have permissions to access the Workforce Structures functional area and the Manage Legal Entity task. Roles like Application Implementation Consultant include the necessary privileges (e.g., Manage Legal Entity duty role).

* Verification: Oracle documentation confirms that setup tasks require specific security roles, and the Manage Legal Entity task is restricted to authorized users.

Oracle Global Human Resources Cloud: Implementing Global Human Resources, Section: Security for Setup Tasks.

Step 2: Navigate to Setup and Maintenance

Action:

From the Oracle Fusion Applications home page, click the Navigator icon (hamburger menu) in the top-left corner.

Under the Tools section, select Setup and Maintenance.

Explanation: The Setup and Maintenance work area provides access to all implementation and configuration tasks, organized by functional areas. This is the entry point for accessing the Manage Legal Entity task.

Verification: Oracle's user interface consistently places Setup and Maintenance under the Navigator's Tools section, as confirmed in both Redwood and responsive interfaces.

Reference: Oracle Global Human Resources Cloud: Implementing Global Human Resources, Section: Setup and Maintenance Overview.

Step 3: Select the Workforce Structures Functional Area and Locate the Task Action:

In the Setup and Maintenance work area, click the Functional Area dropdown and select Workforce Structures.

In the task list, locate Manage Legal Entity by scrolling or using the search bar (type "Manage Legal Entity").

Click the Go to Task icon (typically a play button or arrow) next to Manage Legal Entity to open the task.

Explanation: The Workforce Structures functional area includes tasks related to organizations, including legal entities. The Manage Legal Entity task is designed to create and manage legal entities, including their attributes and associations. Using the search bar ensures quick access if the task list is extensive.

Verification: Oracle documentation lists Manage Legal Entity under Workforce Structures, accessible via the Setup and Maintenance UI in both Redwood and responsive interfaces.

Reference: Oracle Global Human Resources Cloud: Using Global Human Resources, Section: Manage Legal Entity.

Step 4: Initiate Creation of a New Legal Entity

Action:

On the Manage Legal Entity page, click the Create button (typically a plus sign (+) or labeled "Create" in the Redwood interface). This opens the Create Legal Entity page for entering the legal entity details.

Explanation: The Manage Legal Entity page displays a searchable list of existing legal entities. The Create action starts the process of adding a new legal entity, opening a form where details like name, identifier, and address can be entered.

Verification: Oracle's UI for managing legal entities includes a Create button, as confirmed in documentation and Redwood interface updates (24C and later).

Reference: Oracle Global Human Resources Cloud: Implementing Global Human Resources, Section: Creating Legal Entities.

Step 5: Enter the Legal Entity Details

Action: On the Create Legal Entity page, enter the following details as provided in the scenario:

Name: Enter X Cloud Vision.

Legal Entity Identifier: Enter XCLDVIS.

Country: Select United States from the dropdown list.

Legal Address: Search for and select the previously created address: 900 Main St, Dearborn Heights, Wayne, Michigan 48127.

Click the Search icon (magnifying glass) in the Legal Address field.

Enter Dearborn Heights or 900 Main St in the search criteria and click Search.

Select the address and click OK.

EIN or TIN: Enter 93654213X.

Legal Reporting Unit Registration Number: Enter 1212321X.

Organization Type: Select Legal Employer (as the legal entity is a company with employees).

Effective Start Date: Enter 04/15/2025 (current date, unless the acquisition date is specified; adjust if a specific date is required).

Payroll Statutory Unit: Check the box for Payroll Statutory Unit or select Yes to designate the legal entity as its own PSU.

Explanation:

Name: The legal entity name must be X Cloud Vision, matching the scenario exactly for identification.

Legal Entity Identifier: XCLDVIS is a unique code for the legal entity, used in system processes and reporting.

Country: United States is required, as the address is in Michigan.

Legal Address: The address (900 Main St, Dearborn Heights, Wayne, Michigan 48127) was created in a previous task (Question 142) and must be selected to link it to the legal entity. The search ensures the correct address is used.

EIN or TIN: 93654213X is the Employer Identification Number or Tax Identification Number, used for tax reporting.

Legal Reporting Unit Registration Number: 1212321X identifies the legal reporting unit for compliance purposes.

Organization Type: Legal Employer is appropriate, as the company employs workers (implied by manufacturing operations).

Effective Start Date: Oracle uses effective dating to track legal entity validity. The current date (04/15/2025) is used unless otherwise specified.

Payroll Statutory Unit: Designating the legal entity as a PSU ensures it handles its own payroll reporting and compliance, as required by the scenario. This creates a PSU automatically tied to the legal entity.

Verification: Oracle documentation specifies mandatory fields (e.g., Name, Country, Address) and optional fields (e.g., EIN/TIN) for legal entity creation. The Payroll Statutory Unit option is explicitly supported, and the provided details align with US legal entity requirements.

Reference: Oracle Global Human Resources Cloud: Using Global Human Resources, Section: Legal Entity Fields.

Step 6: Configure Additional Settings (if prompted)

Action:

Jurisdiction: If prompted, select United States, Michigan as the jurisdiction for compliance with state regulations.

Payroll Statutory Unit Details: If a PSU section appears, confirm the PSU name (defaults to X Cloud Vision) and ensure the EIN or TIN and Registration Number are carried over.

Primary Legal Address: Verify that 900 Main St, Dearborn Heights, Wayne, Michigan 48127 is marked as the primary legal address (typically automatic).

Explanation:

Jurisdiction: Michigan is the appropriate jurisdiction for a US-based company in Dearborn Heights.

PSU Details: Creating a PSU requires minimal additional input, as the legal entity's details (e.g., EIN/TIN) are reused.

Primary Legal Address: Oracle requires at least one primary address for compliance; the selected address fulfills this role.

Verification: Oracle documentation confirms that PSU creation can be integrated with legal entity setup, and jurisdiction and address settings are standard fields.

Reference: Oracle Global Human Resources Cloud: Implementing Global Human Resources, Section:

Payroll Statutory Units.

Step 7: Save the Legal Entity

Action:

After entering all details, click Save and Close (or Save if further edits are needed).

If prompted, confirm the creation of the legal entity and PSU.

Explanation: Saving creates the legal entity and, if selected, the associated PSU in the system. The Save and Close button finalizes the task, while Save allows additional configurations (e.g., adding more addresses).

Oracle validates mandatory fields before saving.

Verification: Oracle's UI includes Save and Save and Close options for legal entity creation, as confirmed in documentation for both responsive and Redwood interfaces.

Reference: Oracle Global Human Resources Cloud: Implementing Global Human Resources, Section: Saving Legal Entities.

Step 8: Verify the Legal Entity Creation

Action:

Return to the Manage Legal Entity page.

In the search criteria, enter X Cloud Vision or XCLDVIS and click Search.

Confirm that the new legal entity appears with the details:

Name: X Cloud Vision

Identifier: XCLDVIS

Legal Address: 900 Main St, Dearborn Heights, Wayne, Michigan 48127

EIN or TIN: 93654213X

Legal Reporting Unit Registration Number: 1212321X

Payroll Statutory Unit: Yes

Effective Start Date: 04/15/2025

Optionally, verify the PSU by navigating to the Manage Payroll Statutory Units task and searching for X Cloud Vision.

Explanation: Verification ensures the legal entity and PSU were created correctly. Searching by name or identifier confirms the record's accuracy and checks for errors. Checking the PSU separately validates its creation if required.

Verification: Oracle documentation emphasizes verifying setup tasks by searching created records, and the Manage Legal Entity page supports detailed searches.

Reference: Oracle Global Human Resources Cloud: Using Global Human Resources, Section: Searching Legal Entities.

Detailed Explanation

Purpose of Legal Entity: A legal entity represents a registered organization for compliance, tax, and payroll purposes. X Cloud Vision as a legal employer and PSU ensures it handles its own workforce and reporting obligations.

Payroll Statutory Unit: Designating the legal entity as a PSU means it acts as the entity responsible for payroll calculations and statutory reporting (e.g., W-2 forms in the US). This aligns with the scenario's requirement for independence.

Legal Address Integration: The address (900 Main St, Dearborn Heights, Wayne, Michigan 48127) links the legal entity to its physical or registered location, critical for compliance. The prior creation of this address (Question 142) ensures it is available for selection.

EIN/TIN and Registration Number: The EIN/TIN (93654213X) and Legal Reporting Unit Registration Number (1212321X) are unique identifiers for tax and reporting, formatted as per US requirements.

Redwood Interface: In the Redwood interface (24C and later), the Manage Legal Entity page may feature enhanced UI elements (e.g., streamlined forms, inline validation), but the core fields and steps remain consistent with the responsive interface.

Effective Dating: The effective start date ensures the legal entity is active from the specified date, supporting future changes (e.g., address updates).

Key Considerations

Accuracy: All details (X Cloud Vision, XCLDVIS, 93654213X, 1212321X) must be entered exactly as provided to avoid errors in reporting or compliance.

Address Availability: The legal address must exist in the system (from Question 142). If not found, revisit the Manage Legal Addresses task to create it first.

PSU Creation: Checking the PSU box automatically creates a PSU linked to the legal entity, reusing the provided EIN/TIN and registration number unless overridden.

Security: Only users with the Manage Legal Entity privilege can perform this task. Role mismatches require administrative intervention.

Jurisdiction: Selecting United States, Michigan ensures compliance with state-specific regulations, though it may be optional in some configurations.

Potential Challenges and Solutions

Access Denied: If the user lacks the Manage Legal Entity privilege, an error occurs. Solution: Assign the Application Implementation Consultant role via Security Console.

Address Not Found: If the address (900 Main St) is missing, the system prevents saving. Solution: Create the address using the Manage Legal Addresses task (as per Question 142) before proceeding.

Duplicate Identifier: If XCLDVIS already exists, an error occurs. Solution: Search for the identifier first; if it exists, coordinate with the implementation team to resolve conflicts.

Redwood UI Variations: The Redwood interface may use different button labels (e.g., Add instead of Create) or layouts. Solution: Follow field prompts and ensure all required fields are completed.

PSU Configuration: If PSU creation prompts additional fields, use default values derived from the legal entity unless specified.

Solution: Confirm EIN/TIN and registration number alignment.

NEW QUESTION # 134

Which task in the Setup and Maintenance work area generates position codes automatically?

- A. Manage Position Codes
- B. Manage Position Synchronization
- C. Manage Legal Entity HCM Information
- **D. Manage Enterprise HCM Information**
- E. Manage Positions

Answer: D

Explanation:

In Oracle Global Human Resources Cloud, position codes are unique identifiers for positions, and their automatic generation is configured at the enterprise level.

Option A: "Manage Legal Entity HCM Information" sets legal employer-specific options (e.g., worker numbers) but not position codes.

Option B: "Manage Position Synchronization" handles position-to-assignment synchronization, not code generation.

Option C: Correct. "Manage Enterprise HCM Information" allows enabling automatic position code generation across the enterprise, typically via the Position Code Generation setting.

Option D: There's no "Manage Position Codes" task; this is a fictitious option.

Option E: "Manage Positions" is for creating/editing positions but doesn't configure automatic code generation.

The correct answer is C, per "Implementing Global Human Resources" on enterprise setup.

References: Oracle Global Human Resources Cloud - Implementing Global Human Resources, Chapter 9:

Position Structures.

NEW QUESTION # 135

The line manager of an employee is also the HR manager for that employee. The Promotion approval rules state that a transaction should be approved by the line manager followed by HR. If this employee receives a promotion, the approval will go to the manager twice. The customer requires that when approvers repeat in the routing chain, only one approval notification should be triggered to such approvers. What step in Business Process Management (BPM) Worklist should you perform to meet this requirement?

- A. Deselect Allow Participants To Edit Future Participants.
- B. Select Allow All Participants To Route Task To Other Participants.
- **C. Change the Task Aggregation configuration to Once Per Task.**
- D. Select Allow Participants To Edit Future Participants.
- E. Change the value of Complete Task Immediately When Participant Chooses to Approve.

Answer: C

Explanation:

In Oracle Global Human Resources Cloud, BPM Worklist manages approval workflows. When an approver (e.g., the same manager as both line and HR) appears multiple times, duplicate notifications can occur unless aggregation is configured.

Option A: Routing to other participants doesn't address duplicate notifications for the same approver.

Option B: Correct. Setting Task Aggregation to "Once Per Task" in BPM ensures that if the same approver appears multiple times in the chain, they receive only one notification to approve the task once, fulfilling the requirement.

Option C: Immediate completion affects task closure timing, not notification frequency.

Option D: Editing future participants doesn't control notification aggregation.

Option E: Allowing edits to future participants is unrelated to duplicate notifications.

The correct answer is B, as per "Using Global Human Resources" on BPM approval configuration.

References: Oracle Global Human Resources Cloud - Using Global Human Resources, Chapter 3: Approvals and Notifications.

NEW QUESTION # 136

Which two options can be directly mapped to the employee record during hiring?

- A. Payroll Statutory Unit
- **B. Business Unit**
- C. Sub-Division
- **D. Legal Employer**
- E. Job Family
- F. Division

Answer: B,D

Explanation:

During the hiring process in Oracle Global Human Resources Cloud, certain workforce structure elements are directly mapped to the employee's record (via Manage Employment or Hire an Employee).

Option A: Division is not directly mapped; it's derived via hierarchy (e.g., department).

Option B: PSU is linked to payroll, not directly to the employee record during hiring.

Option C: Sub-Division is not a standard field or object in Oracle HCM.

Option D: Correct. Legal Employer is a mandatory field assigned during hiring, defining the employing entity.

Option E: Job Family is a categorization, not directly mapped to the record.

Option F: Correct. Business Unit can be directly assigned to an assignment during hiring, reflecting operational structure.

The correct answers are D and F, per "Using Global Human Resources" on hiring processes.

References: Oracle Global Human Resources Cloud - Using Global Human Resources, Chapter 7: Employment Transactions.

NEW QUESTION # 137

.....

There are two big in the 1z0-1046-25 exam questions -- software and online learning mode, these two models can realize the user to carry on the simulation study on the 1z0-1046-25 study materials, fully in accordance with the true real exam simulation, as well as the perfect timing system, at the end of the test is about to remind users to speed up the speed to solve the problem, the 1z0-1046-25 Training Materials let users for their own time to control has a more profound practical experience, thus effectively and perfectly improve user efficiency to pass the 1z0-1046-25 exam.
