

2V0-11.25 Real Brain Dumps, 2V0-11.25 Free Exam

2026 Latest ITExamReview 2V0-11.25 PDF Dumps and 2V0-11.25 Exam Engine Free Share: https://drive.google.com/open?id=1wYpinkkSLbuBLqf_AV7cFBI9n409zfZq

Now, the test syllabus of the 2V0-11.25 exam is changing every year. More and more people choose to prepare the exam to improve their ability. So the 2V0-11.25 exam becomes more difficult than before. For our experts, they are capable of seizing the tendency of the real exam. The questions and answers of our 2V0-11.25 Guide materials will change every year according to the examination outlines. And we always keep them to be the latest and accurate.

Although at this moment, the pass rate of our VMware 2V0-11.25 exam braindumps can be said to be the best compared with that of other exam tests, our experts all are never satisfied with the current results because they know the truth that only through steady progress can our VMware 2V0-11.25 Preparation materials win a place in the field of exam question making forever.

2V0-11.25 Exam Real Brain Dumps- Updated 2V0-11.25 Free Exam Pass Success

The desktop-based practice exam is customizable, tracks your progress, and creates a real VMware Cloud Foundation 5.2 Administrator (2V0-11.25) exam environment. This software works offline on Windows computers. The web-based practice exam is similar to the desktop-based practice exam and can be taken on any browser without needing to install separate software. Moreover, the web-based VMware Cloud Foundation 5.2 Administrator (2V0-11.25) practice exam is also compatible with all operating systems.

VMware Cloud Foundation 5.2 Administrator Sample Questions (Q134-Q139):

NEW QUESTION # 134

While troubleshooting a vSphere HA cluster issue, an administrator observes that a host is in the Network Isolated state. The host is unable to ping the configured isolation address and cannot access any other vSphere HA agents.

Which step would resolve this issue while minimizing downtime for running virtual machines (VMs)?

- A. Reconfigure the isolation addresses to ensure the host can ping the default gateway or other configured IPs.
- B. Reconfigure the host's HA agent to bypass the isolation check and allow VM operations to continue.
- C. Power off all VMs on the isolated host, remove the host from the cluster, and add it back after the network is fixed.
- D. Restart the vSphere HA services on the isolated host to trigger the election of a new primary agent.

Answer: A

Explanation:

Ensuring the host's isolation addresses include reachable targets (such as the default gateway) allows the HA agent to detect network

connectivity correctly without taking action on running VMs, resolving the isolation state with minimal disruption.

NEW QUESTION # 135

An organization requires a private cloud with robust availability and disaster recovery capabilities.

Which three VMware Cloud Foundation components should be considered for integration to meet these requirements? (Choose three.)

- A. Aria Operations for Logs for enhanced logging and monitoring.
- B. vSAN for hyper-converged storage and downtime avoidance.
- C. NSX for secure and isolated networking.
- D. vSphere Replication for VM-level data replication.
- E. VMware Live Site Recovery (VLSR) for orchestrated disaster recovery.

Answer: C,D,E

Explanation:

NSX provides network virtualization, offering secure, isolated networking that is crucial for ensuring robust availability and disaster recovery. It supports micro-segmentation and advanced network management features.

VMware Live Site Recovery (VLSR) provides orchestrated disaster recovery capabilities, enabling the organization to efficiently recover workloads and applications in case of a disaster.

vSphere Replication enables VM-level data replication, allowing for recovery and continuity of business operations by ensuring data is replicated across sites for high availability and disaster recovery.

NEW QUESTION # 136

An organization is implementing a downtime avoidance solution and wants to ensure continuous availability of applications across separate sites that are connected via a high bandwidth/low latency link.

Which two VMware Cloud Foundation components support this capability with stretched clusters? (Choose two.)

- A. vVOL
- B. vSphere Replication
- C. NSX Firewall
- D. vSAN
- E. vSphere

Answer: D,E

Explanation:

vSAN: vSAN supports stretched clusters, allowing data to be mirrored across multiple sites to ensure continuous availability and enable high availability for virtual machines in case of a site failure.

vSphere: vSphere also supports stretched clusters, enabling the high availability of applications across multiple sites by allowing virtual machines to be run on either site in the event of a failure.

NEW QUESTION # 137

An administrator has been tasked with updating the version of VMware Tools on virtual machines that have been migrated into a VMware Cloud Foundation (VCF) instance so that they are compliant with the company's security policies. The following information is shared with the administrator about this task:

The VMs have been migrated from environments running earlier releases of vSphere.

The VMs are spread across multiple clusters within a single workload domain in the VCF instance.

The upgrade must not initiate a reboot of the VMs to avoid downtime to the business.

Which three steps should the administrator perform in order to complete this task? (Choose three.)

- A. Select the Set Auto Update option and set its value to On.
- B. Select the cluster hosting the VMs to upgrade.
- C. Use vSphere Lifecycle Manager in the VI workload domain vCenter to initiate the upgrade.
- D. Select the VI workload domain so that all VMs across all clusters are automatically selected.
- E. Use SDDC Manager in the management domain to initiate the upgrade.
- F. Select the Upgrade to Match Host option.

Answer: A,C,F

Explanation:

Use vSphere Lifecycle Manager in the VI workload domain's vCenter to handle the VMware Tools upgrade across all clusters. Choose the "Upgrade to Match Host" option so that each VM's tools version is updated to the host's bundled version. Enable the "Set Auto Update" setting to On, which performs the tools upgrade without requiring a VM reboot.

NEW QUESTION # 138

An organization is integrating VMware vCenter with Active Directory (AD) to streamline user authentication.

As part of this process, the administrator needs to add AD as an identity source in vCenter.

Which three steps must be performed to successfully add AD as an identity source? (Choose three.)

- **A. Select 'Identity Sources' and choose 'Active Directory Domain'.**
- **B. Enter the Domain Name and the credentials of an AD user with a minimum of read-only access to Base DN for users and groups.**
- C. Create an Active Directory object for the vCenter Server Appliance.
- D. Reboot the vCenter to apply the identity source settings.
- **E. Navigate to the vCenter Single Sign-On configuration in the vSphere Client.**
- F. Configure DNS settings on all ESXi hosts to point to the AD DNS servers.

Answer: A,B,E

Explanation:

You must provide the AD domain name plus credentials (read-only is sufficient) to bind and query the Base DN for users and groups.

In the vSphere Client's Identity Sources section, choose "Active Directory Domain" when adding a new source.

These options are found under Administration # Single Sign-On # Configuration # Identity Sources in the vSphere Client.

NEW QUESTION # 139

.....

As we all know, it is difficult for you to prepare a 2V0-11.25 exam by yourself. You will feel confused about some difficult knowledge. Now, you are fortunate enough to purchase our 2V0-11.25 study questions. Our study materials are compiled by professional experts. They have researched the annual Real 2V0-11.25 Exam for many years. So once you buy our study materials, you will save a lot of troubles.

2V0-11.25 Free Exam: <https://www.itexamreview.com/2V0-11.25-exam-dumps.html>

Software version of the features are very practical, I think you can try to use our 2V0-11.25 test prep software version, VMware 2V0-11.25 Real Brain Dumps They are quite convenient, VMware 2V0-11.25 Real Brain Dumps In addition, there are no customers complain about this problem, The VMware Cloud Foundation 5.2 Administrator 2V0-11.25 exam questions are the real 2V0-11.25 Exam Questions that will surely repeat in the upcoming 2V0-11.25 exam and you can easily pass the challenging VMware Cloud Foundation 5.2 Administrator 2V0-11.25 certification exam, So you will find that the unique set of our 2V0-11.25 practice guide is the easiest and containing the most rewarding content, you can never found on any other website.
