## AD0-E725 Certified & AD0-E725 Authorized Test Dumps

It is not a time to get scared of taking any difficult certification exam such as AD0-E725. The excellent study guides, practice

questions and answers and dumps offered by Free4Dump are your real strength to take the test with confidence and pass it without facing any difficulty. Passing an AD0-E725 exam rewards you in the form of best career opportunities. A profile rich with relevant credentials opens up a number of career slots in major enterprises. Free4Dump's AD0-E725 Questions and answers based study material guarantees you career heights by helping you pass as many exams as you want.

## Adobe Commerce Developer Expert Sample Questions (Q15-Q20):

### NEW QUESTION # 15

A Developer working on an Adobe Commerce Cloud project encounters an issue with the database service that requires investigation. To troubleshoot the issue, the Developer decides to securely access the cloud services from the local machine to directly interact with the services and run diagnostic commands.

Which command step is required to achieve this?

- A. Use the magento-cloud service:connect command to access the cloud services.
- B. Use the php bin/magento cloud:tunnel:connect command to access the cloud services.
- **C. Use the magento-cloud tunnel:open command to access the cloud services.**

**Answer: C**

### NEW QUESTION # 16

A third-party company wants to integrate into Adobe Commerce by using webhooks; they would like to emulate the webhook endpoint. As part of this process, they will send payload data to a Developer for testing.

What format should the payload be as part of the webhook test command?

- A. Plain text
- **B. JSON**
- C. XML

**Answer: B**

### NEW QUESTION # 17

A Developer is working on an Adobe Commerce store, and the security team has flagged certain inline scripts in the store as vulnerable to potential attacks. The Developer decides to implement Content Security Policies (CSP) to secure the store's environment.

What will the Developer achieve by taking this action?

- A. Prevent users from accessing certain areas of the website based on their IP address.
- **B. Restrict which resources (scripts, styles, images) are allowed to load on the website.**
- C. Ensure that all user input is sanitized before being processed by the application.

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation (with official references):

The correct answer is C. Restrict which resources (scripts, styles, images) are allowed to load on the website.

Adobe Commerce supports Content Security Policy (CSP), a browser-level security feature that mitigates certain types of attacks such as Cross-Site Scripting (XSS) and data injection attacks.

By defining a CSP in Adobe Commerce, developers can control:

- \* Which scripts can be executed (script-src).
- \* Which stylesheets can be applied (style-src).
- \* Which images and media can be loaded (img-src, media-src).
- \* Whether inline scripts or styles are allowed.

This does not sanitize user input (A) nor restrict user access based on IP addresses (B). Instead, it focuses on restricting the sources of content that the browser can load.

Official Documentation Extracts:

\* "Content Security Policy (CSP) is an added layer of security that helps to detect and mitigate certain types of attacks, including Cross-Site Scripting (XSS) and data injection attacks. CSP works by restricting the sources from which content can be loaded." - Adobe Commerce DevDocs: Content Security Policy

\* "A CSP allows developers to define approved sources of content that browsers can load. These policies help reduce the risk of

malicious content injection in Magento storefronts."- Adobe Commerce Security Guide

### NEW QUESTION # 18

In an Adobe Commerce store, there is a product attribute called `external_service_id`. A Developer must ensure the attribute is only available for specific users via the API.

How should the Developer achieve the required permissions?

- A. Configure the access control list (ACL) resource for the `external_service_id` attribute via `etc/extension_attributes.xml`.
- B. Implement an `afterGet` plugin and exclude the attribute for non-authorized users.
- C. **Setup a custom permission control at the attribute level because it is not supported out of the box.**

**Answer: C**

### NEW QUESTION # 19

A client recently started using the new Adobe Live Search functionality. They report an issue with content from the website, such as CMS blocks, not returning with the search result.

A Developer is asked to investigate because the client wants this content to be part of the data pool of Live Search.

How should the Developer respond to the client?

- A. Advise the client to enable content for Live Search from the admin panel.
- B. **Share documentation regarding the limitations of Live Search.**
- C. Extend the class `Magento\LiveSearchAdapter\Model\Attribute\Metadata`.

**Answer: B**

Explanation:

Adobe Live Search is designed to handle catalog product data only. It does not index or return CMS content such as blocks or pages. This is a known limitation of Live Search.

B is invalid because there is no admin setting to enable CMS content in Live Search.

C is not a supported solution; extending Live Search classes will not include CMS content.
