Energy-and-Utilities-Cloud認證指南 - Energy-and-Utilities-Cloud熱門證照

在如今人才濟濟的社會中，Salesforce專業人士是很受歡迎的，但競爭也很大。所以很多Salesforce專業人士通過一

些比較難的權威的Energy-and-Utilities-Cloud認證考試來穩固自己，而我們Testpdf是專門為參加Energy-and-Utilities-Cloud認證考試的考生提供便利的。

最新的 Accredited Professional Certification Energy-and-Utilities-Cloud 免費考試真題 (Q65-Q70):

問題 #65

An implementation team has requested an org containing the Energy and Utilities Cloud Large Account Sales Management application. After working with the app, they determine that they need the functionality of the homepage for agents and team leaders. How does the team get the required components into their development environment?

- A. The team should take a look at the application code, and then go and re-type the code into their development environment.
- B. The team needs to copy and paste the required components from their trial environment into their development environment.
- C. The team should request the Energy and Utilities Cloud engineering team to deploy the necessary components into the project development environment.
- **D. The team should follow the documentation and migrate the required components into the* development environment.**

答案： D

解題說明:

When the implementation team requires specific components from the Energy and Utilities Cloud Large Account Sales Management application in their development environment, the recommended approach is to follow the Salesforce documentation on migrating components. This process involves identifying the necessary components and utilizing Salesforce's deployment tools (such as change sets or the Salesforce CLI) to move them from one environment to another. This method ensures a controlled and systematic approach to customization and development, aligning with Salesforce's best practices for environment management and application development. References= Salesforce documentation provides extensive guides on environment management and the migration of components between environments. This includes using deployment tools and following best practices to ensure seamless and efficient development processes: https://developer.salesforce.com/docs/atlas.en-us.dev_lifecycle.meta/dev_lifecycle/

問題 #66

Which are the two essential deployment steps for migrating Utilities Self-Serve Portal from one org to another?
Choose 2 answers

- A. Create customer community user profiles for the Utilities self-serve portal.
- **B. Set up Utilities self-serve templates on your target org.**
- C. Select Self-Serve Portal components from the Energy and Utilities Cloud industry Process Library.
- **D. Create an Experience cloud site to set up a sample digital experience site on your target org.**

答案： B,D

問題 #67

Which two items are necessary before starting a data mapping exercise from the billing system to Energy and Utilities Cloud?
Choose 2 answers

- A. Technical connection details for the billing system
- **B. A high-level object map of the entities and fields used by the billing system**
- **C. Understanding of the Energy and Utilities customer data model**
- D. A decision on the tool or technology that will be used for migrating the data (ETL)
- E. Project team roles and responsibilities

答案： B,C

問題 #68

An energy company wants to show users monthly billed usage information when the user starts the Move Out guided business processes in Energy and Utility Cloud, The usage information is stored in a third-party system with available APIs.

Which three steps must the consultant complete to achieve the required outcome?

Choose 3 answers

- A. Configure integration with Customer Information System
- B. Create a new Move Out process to invoke the Integration Procedure and present the result to the user.
- C. Configure Integration Procedure to fetch the data from the third-party system using available APIs.
- D. Configure integration with Meter Data Management System
- E. Modify the standard Move Out process to invoke the Integration Procedure and present the result to the user,

答案: B,C,E

問題 #69

An energy company wants to accurately price quotes for new, small and medium businesses, which two scenarios would require integration to a third-party system?

- A. Credit ratings are actively used as a pricing input for small and medium business customers
- B. Meter technical data is required from the Distributed System Operator (DSO) in order to confirm supply is possible
- C. Some customers existed on a legacy billing system from previous contracts
- D. The potential customer began their journey using WhatsApp.

答案: A,B

解題說明:

For accurately pricing quotes for new, small, and medium business customers, integration with third-party systems is necessary in scenarios where meter technical data is required from the Distributed System Operator (DSO) to confirm supply capability (B), and where credit ratings are used as a pricing input (D). Integrating with the DSO's systems ensures accurate supply feasibility assessments, while integrating with credit rating agencies provides the necessary financial risk insights to inform pricing decisions effectively. Reference = Salesforce Energy and Utilities Cloud documentation on pricing and quoting emphasizes the need for accurate data, which may require integration with external systems for meter data and credit assessments. Information on integrating Salesforce with external systems for enhanced quoting accuracy can be found in Salesforce's integration and API documentation: <https://developer.salesforce.com/docs/atlas.en-us.api.meta/api/>

問題 #70

.....

對於Energy-and-Utilities-Cloud認證考試，你是怎麼想的呢？作為非常有人氣的Salesforce認證考試之一，這個考試也是非常重要的。但是，當你為了更好地準備考試而尋找參考資料的時候，你會發現找到一本非常優秀的參考書是很難的。那麼，應該怎麼辦才好呢？沒關係。Testpdf很好地體察到了你們的願望，並且為了滿足廣大考生的要求，向你們提供最好的考試考古題。
