And we will send them to you in 5 to 10 minutes after your purchase.

Salesforce Data Cloud Accredited Professional Exam Sample Questions (Q30-Q35):

NEW QUESTION # 30

What is a unique requirement of a Streaming Insight query?

- **A. A window function**
- B. A measurement
- C. A dimension
- D. A WHERE clause

Answer: A

Explanation:

A window function is a unique requirement of a Streaming Insight query. It defines the time interval for the query to run on the streaming data and the frequency of the query execution.

NEW QUESTION # 31

Which three components of Data Cloud can be bundled within a Data Kit?

- A. Calculated Insights
- B. Data Models
- C. Data Streams
- D. Segments
- E. Identity Resolution Rulesets

Answer: B,C,D

Explanation:

These three components of Data Cloud can be bundled within a Data Kit. A Data Kit is a package that contains data model objects, segments, and data streams that can be installed in another Data Cloud org. References: https://help.salesforce.com/s/articleView?id=sf.c360_a_data_cloud_data_kit.htm&type=5

NEW QUESTION # 32

When performing Segmentation or Activation, which timezone is used to publish and refresh data?

- A. Timezone is explicitly specified when creating a segment or activation
- B. Timezone set by the Salesforce Data Cloud org
- C. Timezone of the Data Cloud Admin user
- D. Timezone of the user defining the activity

Answer: B

Explanation:

According to the Salesforce Data Cloud documentation¹, the timezone used for Segmentation and Activation is the one set by the Salesforce Data Cloud org, not by the individual user or admin. This ensures consistency and accuracy across different users and regions.

NEW QUESTION # 33

Cumulus Financial wants to be able to track the daily transaction volume of each of its customers in real time and send out a notification as soon as it detects volume outside a customer's normal range.

What should a consultant do to accommodate this request?

- A. Use streaming data transform combined with a data action.
- B. Use a calculated insight paired with a flow.
- C. Use a streaming insight paired with a data action
- D. Use streaming data transform with a flow.

Answer: C

Explanation:

A streaming insight is a type of insight that analyzes streaming data in real time and triggers actions based on predefined conditions. A data action is a type of action that executes a flow, a data action target, or a data action script when an insight is triggered. By using a streaming insight paired with a data action, a consultant can accommodate Cumulus Financial's request to track the daily transaction volume of each customer and send out a notification when the volume is outside the normal range. A calculated insight is a type of insight that performs calculations on data in a data space and stores the results in a data extension. A streaming data transform is a type of data transform that applies transformations to streaming data in real time and stores the results in a data extension. A flow is a type of automation that executes a series of actions when triggered by an event, a schedule, or another flow. None of these options can achieve the same functionality as a streaming insight paired with a data action. NEW QUESTION # 34

A user needs permissions to access Data Cloud to create, manage, and publish segments. However, the user should not be allowed to create reports or manage data sources. Which permission set should an administrator assign?

- **A. Customer Data Cloud for Marketing Specialist**
- B. Customer Data Cloud for Marketing Manager
- C. Customer Data Cloud for Marketing Admin
- D. Customer Data Cloud for Marketing Data Aware Specialist

Answer: A

Explanation:

This permission set should be assigned to a user who needs permissions to access Data Cloud to create, manage, and publish segments, but not to create reports or manage data sources. This permission set allows the user to create and edit segments, calculated insights, streaming insights, and activations, but not to access data streams, data model, identity resolution, or reports.
