Valid Oracle 1Z1-771 Exam Testking - 1Z1-771 Practice Tests

Once you purchase the 1Z1-771 exam dumps from 2Pass4sure you can use it in three forms Oracle PDF Questions format, web-based software, and desktop Oracle 1Z1-771 practice test. Candidates can use Oracle APEX Cloud Developer Professional pdf questions file on their mobiles, laptop tablets, or any other device. Candidates can install the 1Z1-771 Practice Exam software on their desktops to attempt the Oracle 1Z1-771 practice test even when they are offline.

Oracle 1Z1-771 Exam Syllabus Topics:

Topic	Details
Topic 1	• Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.
Topic 2	• Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.
Topic 3	• Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.
Topic 4	• Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.
Topic 5	• Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.

Topic 6	• Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.
Topic 7	• Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.
Topic 8	• Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.
Topic 9	• Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.
Topic 10	• Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.
Topic 11	• Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.
Topic 12	• Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.
Topic 13	• Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.
Topic 14	• Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.
Topic 15	• Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.
Topic 16	• Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.

1Z1-771 Practice Tests | Original 1Z1-771 Questions

For candidates who have little time to prepare for the exam, our 1Z1-771 exam dumps will be your best choice. With experienced professionals to edit, 1Z1-771 training materials are high-quality, they have covered most of knowledge points for the exam, if you choose, you can improve your efficiency. In addition, we have a professional team to collect and research the latest information for the 1Z1-771 Exam Materials. Free update for one year is available, and the update version for 1Z1-771 material will be sent to your email automatically.

Oracle APEX Cloud Developer Professional Sample Questions (Q31-Q36):

NEW QUESTION # 31
Which two actions are performed by using the Object Browser?

- A. Create a lookup table based on a column in the current table.
- B. Create and run SQL scripts.
- C. Browse database objects of the current schema.
- D. Restore dropped database objects.

Answer: A,C

Explanation:
Object Browser in SQL Workshop is a GUI for managing schema objects:
B . Browse database objects of the current schema: Displays tables, views, procedures, etc., in a tree view, allowing inspection of definitions (e.g., columns, constraints) and data previews.
D . Create a lookup table based on a column in the current table: From a table's column (e.g., DEPTNO), you can generate a lookup table (e.g., DEPT_LOOKUP) with unique values, automating reference table creation.
A . Restore dropped objects: Not supported; this requires DBA tools (e.g., FLASHBACK TABLE).
C . Create and run SQL scripts: This is a SQL Scripts feature, not Object Browser.
Practical tip: Use "Create Lookup Table" to normalize data efficiently.

NEW QUESTION # 32
What happens when you regenerate credentials for Push Notifications in Oracle APEX?

- A. Existing Push Subscriptions for the application will be invalidated.
- B. Push Notifications will be disabled for the application.
- C. A new notification server must be created.

Answer: A

Explanation:
Regenerating Push Notification credentials updates the VAPID keys (public/private pair) in the PWA settings:
A . Existing Push Subscriptions invalidated: Subscriptions (in APEX_APPL_PUSH_SUBSCRIPTIONS) are tied to the old keys. New keys break this link, requiring users to re-subscribe (e.g., via browser prompts), as the push service (e.g., Firebase) can't authenticate old subscriptions.
B . New notification server: False; the server configuration remains; only credentials change.
C . Disabled for the app: False; notifications remain enabled but won't work for old subscriptions until re-established.
Technical Insight: Regeneration updates APEX_PWA_VAPID_PUBLIC_KEY and APEX_PWA_VAPID_PRIVATE_KEY, triggering a subscription refresh cycle.
Use Case: Security breach requires key rotation.
Pitfall: Users must re-opt-in, potentially losing some subscribers.

NEW QUESTION # 33
Which three Theme Components are available out-of-the-box with the Universal Theme?

- A. Calendar
- B. Comments
- C. REST Data Sources
- D. Badge

Answer: A,B,D

Explanation:
The Universal Theme (Theme 42) provides pre-built components:
A . Calendar: A region type for date-based displays (e.g., events), styled with Universal Theme templates (e.g., FullCalendar integration).
B . Comments: A region type for user feedback or notes, with built-in styling and moderation options.
C . Badge: A UI component for displaying counts or statuses (e.g., "5 New"), often in navigation or lists, styled via CSS classes.
D . REST Data Sources: A data feature, not a theme component; it's a Shared Component, not a UI element tied to Universal

Theme.
Technical Insight: These components leverage Universal Theme's CSS (e.g., t-Badge, t-Calendar) and JavaScript for interactivity, reducing custom coding.
Use Case: A dashboard with a Calendar for schedules, Comments for feedback, and Badges for unread alerts.
Pitfall: Customizing requires Theme Roller or CSS overrides.

NEW QUESTION # 34

What are two reasons to enable the "Used by App Builder" option while creating a Generative AI Server?

- A. To create a REST-enabled database object
- B. To create a Working Copy of your application
- C. To build applications using natural language powered by Generative AI
- D. To author SQL powered by Generative AI

Answer: C,D

Explanation:
Enabling "Used by App Builder" for a Generative AI Server allows:
Author SQL powered by Generative AI: Integrates AI-driven SQL generation in App Builder.
Build applications using natural language: Enables natural language prompts to create app components.
Options A and B are unrelated to this setting, as it's specific to AI integration in App Builder.

NEW QUESTION # 35

Which two layout modes are available for Page Designer under Utilities?

- A. Single Pane
- B. Three Pane
- C. Two Pane
- D. Four Pane

Answer: B,C

Explanation:
Page Designer's layout modes under Utilities adjust the workspace:
A . Two Pane: Splits into two vertical sections (e.g., tree and properties), ideal for focused editing.
B . Three Pane: Adds a third section (e.g., tree, grid, properties), offering a balanced view for complex pages.
C . Four Pane: Not available; APEX limits to three for usability.
D . Single Pane: Not an option; the minimum is two panes.
Developers toggle these via the Utilities menu to optimize screen real estate based on task complexity.

NEW QUESTION # 36

......

As old saying goes, all roads lead to Rome. If you are still looking for your real interests and have no specific plan, our 1Z1-771 exam questions can be your new challenge. Now, people are blundering. Few people can calm down and ask what they really want. You live so tired now. Learning of our 1Z1-771 practice materials is the best way to stop your busy life. And you will have a totally different life if you just get the 1Z1-771 certification.
