**New CDPSE Practice Questions, Reliable CDPSE Exam Labs**

Now you don't need to spend too much time and money preparing for the ISACA CDPSE test. Just get the latest CDPSE exam dumps from PracticeVCE and prepare the CDPSE test in a very short time. These Customer Experience (ISACA) CDPSE updated dumps will eliminate your risk of failing and enhance your chance of success in the PracticeVCE test. Using ISACA CDPSE Exam study material you will gain the best ISACA CDPSE exam knowledge and you will attempt the final CDPSE certification test with confidence.

## ISACA Certified Data Privacy Solutions Engineer Sample Questions (Q123-Q128):

### NEW QUESTION # 123

To ensure effective management of an organization's data privacy policy, senior leadership MUST define:

- A. the scope and responsibilities of the data owner.
- B. metrics and outcomes recommended by external agencies.
- C. roles and responsibilities of the person with oversight.
- D. training and testing requirements for employees handling personal data.

**Answer: C**

Explanation:

Senior leadership must define the roles and responsibilities of the person with oversight, who is responsible for ensuring compliance with the data privacy policy and applicable laws and regulations. This person may also be known as the data protection officer, the privacy officer, or the chief privacy officer, depending on the organization and jurisdiction. The person with oversight should have the authority, resources, and independence to perform their duties effectively.

### NEW QUESTION # 124

Which encryption method encrypts and decrypts data using two separate yet mathematically connected cryptographic keys?

- A. Asymmetric
- B. Symmetric
- C. Hashing
- D. Private key

**Answer: A**

Explanation:

Explanation

Asymmetric encryption, also known as public-key encryption, encrypts and decrypts data using two separate yet mathematically connected cryptographic keys. One key is called the public key and can be shared with anyone, while the other key is called the private key and must be kept secret. The public key is used to encrypt the data, and only the corresponding private key can decrypt it. Likewise, the private key can be used to sign the data, and only the corresponding public key can verify it. This method provides confidentiality, integrity, authentication and non-repudiation for data.

### NEW QUESTION # 125

An organization want to develop an application programming interface (API) to seamlessly exchange personal data with an application hosted by a third-party service provider. What should be the FIRST step when developing an application link?

- A. Data hashing
- B. Data normalization
- C. Data mapping
- D. Data tagging

**Answer: C**

### NEW QUESTION # 126

Which of the following MOST effectively protects against the use of a network sniffer?

- A. An intrusion detection system (IDS)
- **B. Transport layer encryption**
- C. A honeypot environment
- D. Network segmentation

**Answer: B**

Explanation:

Reference:

Transport layer encryption is the most effective way to protect against the use of a network sniffer, because it encrypts the data packets that are transmitted over a network, making them unreadable and useless for anyone who intercepts them. Transport layer encryption can be implemented using protocols such as Secure Sockets Layer (SSL), Transport Layer Security (TLS), or Secure Shell (SSH), which provide end-to-end encryption and authentication between the sender and the receiver of the data. By using transport layer encryption, the data can only be decrypted by the intended recipient, who has the proper key or certificate to do so. Therefore, even if a network sniffer captures the data packets, they cannot access or modify the sensitive information contained in them.

What is Packet Sniffing Attack in Network Sniffing?, EC-Council

Packet Sniffing Meaning, Methods, Examples and Best Practices, Spiceworks  
What is a packet sniffing attack? + how to prevent it, Norton

### NEW QUESTION # 127

Which of the following is the PRIMARY benefit of implementing policies and procedures for system hardening?

- **A. It reduces external threats to data.**
- B. It eliminates attack motivation for data.
- C. It increases system resiliency.
- D. It reduces exposure of data.

**Answer: A**

### NEW QUESTION # 128

.....

PracticeVCE is one of the leading platforms that has been helping Certified Data Privacy Solutions Engineer (CDPSE) exam candidates for many years. Over this long time period we have helped CDPSE exam candidates in their preparation. They got help from PracticeVCE Certified Data Privacy Solutions Engineer practice questions and easily got success in the final CDPSE Certification Exam. You can also trust PracticeVCE CDPSE exam dumps and start preparation with complete peace of mind and satisfaction.
