

# Top Reliable NSE4\_FGT\_AD-7.6 Exam Review 100% Pass | Pass-Sure NSE4\_FGT\_AD-7.6 Valid Test Labs: Fortinet NSE 4 - FortiOS 7.6 Administrator

We strongly recommend using our NSE4\_FGT\_AD-7.6 exam dumps to prepare for the Fortinet NSE 4 - FortiOS 7.6 Administrator. It is the best way to ensure success. With our NSE4\_FGT\_AD-7.6 practice questions, you can get the most out of your studying and maximize your chances of passing your NSE4\_FGT\_AD-7.6 Exam. RealExamFree Fortinet NSE 4 - FortiOS 7.6 Administrator is the answer if you want to score higher in the NSE4\_FGT\_AD-7.6 exam and achieve your academic goals.

In order to meet all demands of all customers, our company has employed a lot of excellent experts and professors in the field to design and compile the NSE4\_FGT\_AD-7.6 test dump with a high quality. It has been a generally accepted fact that the NSE4\_FGT\_AD-7.6 exam reference guide from our company are more useful and helpful for all people who want to pass exam and gain the related exam. We believe this resulted from our constant practice, hard work and our strong team spirit. With the high class operation system, the NSE4\_FGT\_AD-7.6 study question from our company has won the common recognition from a lot of international customers for us. If you decide to buy our NSE4\_FGT\_AD-7.6 test dump, we can assure you that you will pass exam in the near future.

## NSE4\_FGT\_AD-7.6 Valid Test Labs - NSE4\_FGT\_AD-7.6 Reliable Exam Dumps

The simplified information in NSE4\_FGT\_AD-7.6 certification dumps makes your exam preparation immensely easier for you. All the NSE4\_FGT\_AD-7.6 exam questions answers are self-explanatory and provide the best relevant and authentic information checked and approved by the industry experts. No key point of the NSE4\_FGT\_AD-7.6 Exam is left unaddressed. The complex portions have been explained with the help of real life based examples. In case, you don't follow and NSE4\_FGT\_AD-7.6 dumps, you can contact our customer's service that is operational 24/7 for your convenience.

## Fortinet NSE 4 - FortiOS 7.6 Administrator Sample Questions (Q70-Q75):

### NEW QUESTION # 70

Refer to the exhibit. What can you conclude from the log shown in the exhibit?

```
date=2025-02-4 time=09:07:59 logid=0100022700 type=event subtype=system level=critical
vd= "root" logdesc= "IPS session scan paused" action= "drop" msg= "IPS session scan,
enter fail open mode"
```

- A. The IPS socket buffer is full and IPS engine needs more memory to create new sessions.
- B. The IPS socket buffer is full and IPS engine cannot decode a packet.
- C. The IPS scan is paused by the IPS diagnostic command with bypass mode option 5.
- D. The IPS session scan is paused and reevaluating the packet because of a dirty flag.

**Answer: A**

Explanation:

The log message IPS session scan paused, enter fail open mode indicates that the IPS socket buffer is full, meaning the IPS engine does not have enough memory to process new sessions.

As a result, FortiGate switches to fail-open mode, allowing traffic to pass (or temporarily dropping it) without full IPS scanning.

### NEW QUESTION # 71

An administrator configures FortiGuard servers as DNS servers on FortiGate using default settings.

What is true about the DNS connection to a FortiGuard server?

- A. It uses UDP 8888.
- B. It uses DNS over HTTPS.
- C. It uses UDP 53.
- D. It uses DNS over TLS.

**Answer: C**

Explanation:

When FortiGuard servers are configured as DNS servers on FortiGate with default settings, the DNS queries are sent using the standard DNS protocol over UDP port 53.

### NEW QUESTION # 72

Refer to the exhibit. Which two statements about the FortiGuard connection are true? (Choose two.)

```
FortiGate # diagnose debug rating
Locale      : English

Service     : Web-filter
Status:     : Enable
License     : Contract
\
Num. of servers : 1
Protocol    : https
Port       : 8888
Anycast    : Disable
Default servers : Not included

--- Server List (Wed Sep 20 09:22:42 2023) ---
```

IP	Weight	RTT	Flags	TZ	FortiGuard-requests	Curr	Lost	Total	Lost	Updated	Time
10.0.1.241	-244	2	I	0	122	0	0	0	0	Wed Sep 20 09:21:55 2023	

- A. You can configure unreliable protocols to communicate with FortiGuard Server.
- B. FortiGate identified the FortiGuard Server using DNS lookup.
- C. FortiGate is using the default port for FortiGuard communication.
- D. The weight increases as the number of failed packets rises.

**Answer: B,D**

Explanation:

FortiGate identified the FortiGuard Server using DNS lookup → The server is shown with a private IP (10.0.1.241), which indicates FortiGate resolved it via DNS or explicit override rather than using default FortiGuard anycast servers.

The weight value reflects server reliability. It decreases with good performance and increases as packet loss or failures rise, meaning higher weight indicates more failures.

### NEW QUESTION # 73

A network administrator is reviewing firewall policies in both Interface Pair View and By Sequence View. The policies appear in a different order in each view.

Why is the policy order different in these two views?

- A. Interface Pair View sorts policies based on matching interfaces, while By Sequence View shows the actual processing order of rules.
- B. By Sequence View groups policies based on rule priority, while Interface Pair View always follows the order of traffic logs.
- C. The firewall dynamically reorders policies in Interface Pair View based on recent traffic patterns, but By Sequence View remains static.
- D. Policies in Interface Pair View are prioritized by security levels, while By Sequence View strictly follows the administrator's manual ordering.

**Answer: A**

Explanation:

Interface Pair View organizes policies grouped by source and destination interfaces, whereas By Sequence View displays policies in the exact order they are processed by the firewall.

### NEW QUESTION # 74

Refer to the exhibits. An administrator configured both members of an HA cluster at the same time. After one week of monitoring, the administrator wants to verify the HA failover performance.

How can the administrator force a failover?

**HQ-NGFW-1 HA configuration**

```
HQ-NGFW-1 # config system ha

HQ-NGFW-1 (ha) # show
config system ha
    set group-id 5
    set group-name "Training"
    set mode a-p
    set password ENC nmk7zGYiRrux1
    set hbdev "port7" 0
    set session-pickup enable
    set override disable
    set priority 200
    set monitor "port1"
end
```

## Fortinet HQ-NGFW-2 HA configuration

```
HQ-NGFW-2 (ha) # show
config system ha
    set group-id 5
    set group-name "Training"
    set mode a-p
    set password ENC n40G3dmn0K50s
    set hbdev "port7" 0
    set session-pickup enable
    set override disable
    set priority 100
    set monitor "port1"
end
```

- A. The administrator must set the parameter override to enable on HQ-NGFW-2.
- **B. The administrator must set the monitored port to down on HQ-NGFW-1.**
- C. The administrator must increase the HA priority on HQ-NGFW-2.
- D. The administrator must reset the HA uptime on HQ-NGFW-1.

**Answer: B**

Explanation:

Both FortiGates are in an active-passive (a-p) HA cluster with override disabled. This means failover is triggered only if the primary (HQ-NGFW-1) becomes unavailable or monitored interfaces fail. To test failover performance, the administrator can set the monitored interface (port1) down on HQ-NGFW-1, which will force a failover to HQ-NGFW-2.

### NEW QUESTION # 75

.....

Do you still have the ability to deal with your job well? Do you think whether you have the competitive advantage when you are compared with people working in the same field? If your answer is no, you are a right place now. Because our NSE4\_FGT\_AD-7.6 exam torrent will be your good partner and you will have the chance to change your work which you are not satisfied with, and can enhance your ability by our NSE4\_FGT\_AD-7.6 Guide questions, you will pass the exam and achieve your target.
