従来の試験によってJPNTest が今年のCyber ABのCMMC-CCA認定試験を予測してもっとも真実に近い問題集を研究し続けます。JPNTestは 100%でCyber ABのCMMC-CCA「Certified CMMC Assessor (CCA) Exam」認定試験に合格するのを保証いたします。

Cyber AB CMMC-CCA 認定試験の出題範囲：

トピック	出題範囲
トピック 1	• CMMC Assessment Process (CAP): This section of the exam measures skills of compliance professionals and tests knowledge of the full assessment lifecycle. It covers the steps needed to plan, prepare, conduct, and report on a CMMC Level 2 assessment, including the phases of execution and how to document and follow up on findings in alignment with DoD and CMMC-AB expectations.
トピック 2	• Assessing CMMC Level 2 Practices: This section of the exam measures skills of cybersecurity assessors in evaluating whether organizations meet the required practices of CMMC Level 2. It emphasizes applying CMMC model constructs, understanding model levels, domains, and implementation, and using evidence to determine compliance with established cybersecurity practices.
トピック 3	• CMMC Level 2 Assessment Scoping: This section of the exam measures skills of cybersecurity assessors and revolves around determining the proper scope of a CMMC assessment. It involves analyzing and categorizing Controlled Unclassified Information (CUI) assets, interpreting the Level 2 scoping guidelines, and making accurate judgments in scenario-based exercises to define what assets and systems fall within assessment boundaries.
トピック 4	• Evaluating Organizations Seeking Certification (OSC) against CMMC Level 2 Requirements: This section of the exam measures skills of cybersecurity assessors and focuses on evaluating the environments of organizations seeking certification at CMMC Level 2. It covers understanding differences between logical and physical settings, recognizing constraints in cloud, hybrid, on-premises, single, and multi-site environments, and knowing what environmental exclusions apply for Level 2 assessments.

クライアントの時間を節約するために、CMMC-CCA実践ガイドを購入してから5〜10分後にクライアントに製品をメール形式で送信し、情報を簡素化して学習と学習に数十時間しか必要としないようにします。テストの準備をします。CMMC-CCAガイド資料の使用過程で発生する問題をクライアントが解決できるように、クライアントはいつでも学習資料に関する問題について相談できます。したがって、当社のCMMC-CCAトレーニング資料は人を対象としたものであり、クライアントの経験を重要な地位に置いていると言えます。

Cyber AB Certified CMMC Assessor (CCA) Exam 認定 CMMC-CCA 試験問題 (Q141-Q146):

質問 # 141

A CCA is conducting a CMMC assessment and notices that the OSC's evidence includes a policy document that is outdated by two years. The OSC insists that the policy is still in effect, but staff interviews indicate that newer, undocumented procedures are being followed. How should the CCA handle this situation?

- A. Document the discrepancy between the policy and actual procedures and assess based on all available evidence.
- B. Request the OSC to update the policy document before proceeding with the assessment.
- C. Accept the outdated policy as evidence since the OSC claims it is still in effect.
- D. Reject the policy document outright and score the practice as "NOT MET."

正解：A

解説：
Comprehensive and Detailed in Depth Explanation:
The CAP requires documenting discrepancies and assessing all evidence (Option B). Option A ignores reality, Option C is premature, and Option D involves consulting, which is prohibited.
Extract from Official Document (CAP v1.0):
* Section 2.2 - Conduct Assessment (pg. 25):"Document discrepancies between policy and practice as evidence gaps and assess based on all findings." References:
CMMC Assessment Process (CAP) v1.0, Section 2.2.

質問 # 142

During an assessment, it is uncovered that a CCA worked as a consultant for the OSC through their RPO.
Unfortunately, the CCA didn't disclose this when their C3PAO appointed them to participate in the assessment. Did the CCA behave professionally? If not, what issues are likely to arise?

- A. No, lack of objectivity.
- B. No, assessor bias.
- C. No, breach of confidentiality.
- D. Yes, the CCA behaved professionally.

正解：B

解説：
Comprehensive and Detailed in Depth Explanation:
The CoPC prohibits CCAs from assessing an OSC they consulted for, due to potential bias, not objectivity (Option B) or confidentiality (Option D). Option A is incorrect as this is unprofessional. Option C (assessor bias) is the precise issue.
Extract from Official Document (CoPC):
* Paragraph 3.1 - Professionalism (pg. 6):"Under no circumstances shall credentialed individuals conduct a certified assessment if they have served as a consultant to prepare the organization, due to assessor bias." References:
CMMC Code of Professional Conduct, Paragraph 3.1.

質問 # 143

During an assessment, the Lead Assessor determines certain assets to be in-scope which the OSC had considered out-of-scope. The CCA should reply that for assets to be considered out-of-scope they:

- A. Do not provide security protections for CUI assets.

- B. Can, but are not intended to, process, store, or transmit CUI.
- C. Provide security protections to CUI assets.
- D. Are not required to be physically or logically separated from CUI assets.

正解：A

解説：
The CMMC Scoping Guidance specifies that Out-of-Scope Assets are those that neither process, store, nor transmit CUI, and do not provide security protections for CUI assets.
Extract:
"Out-of-Scope assets are those that cannot process, store, or transmit CUI, and do not provide security protections for CUI assets." Thus, the correct answer is B.
Reference: CMMC Scoping Guidance, Asset Categories.

質問 # 144

A Lead Assessor and the OSC have been reviewing the scope. In preparing the final assessment scope, they disagree on some areas. After several days of attempting various solutions, they cannot find common ground.
What should the CCA recommend to the C3PAO?

- A. The C3PAO formally writes to the OSC to start CMMC scoping afresh.
- B. Inform the C3PAO that the OSC has failed the assessment.
- C. The assessment continues as they address the areas of contention.
- D. Halt the assessment until the assessment scope is verified.

正解：D

解説：
Comprehensive and Detailed Explanation:
The CMMC Assessment Process (CAP) requires the Lead Assessor to validate the OSC's proposed scope before proceeding to Phase 2 (Conduct Assessment). Disagreements must be resolved to ensure accuracy and completeness, and the CAP stipulates halting the process if consensus cannot be reached. Option A is an escalation but not the immediate step. Option C risks an invalid assessment. Option D is premature, as scope disputes do not equate to failure. B is the correct recommendation per the CAP.
Reference:
CMMC Assessment Process (CAP) v1.0, Section 2.2 (Scope Validation), p. 9: "The assessment halts if the scope cannot be verified."

質問 # 145

An OSC employs guards to protect the manufacturing shop where the magnetic radar-absorbing coating is manufactured. The Army uses this specific coating for a particular fleet of unmanned aerial vehicles (UAVs).
The facility is under constant surveillance with the help of HD CCTVs. Within the OSC's facilities is a Vector Network Analyzer (VNA) that measures the reflection and transmission properties of the coating over a range of frequencies. Guards protect the OSC's anechoic chamber, and anyone entering must use an iris scanner and sign a physical form detailing their name and reason for being there. At the door is a huge sign reading "Authorized Personnel Only." The OSC has implemented the following physical separation methods to secure its facilities, EXCEPT?

- A. Monitoring
- B. Signage
- C. Biometric locks
- D. Guards

正解：A

解説：
Comprehensive and Detailed Explanation:
Physical separation methods physically restrict access, per NIST SP 800-171 and CMMC guidance. Signage (Option A), biometric locks (Option C), and guards (Option D) directly prevent entry. Monitoring via HD CCTVs (Option B) detects and records but does not physically separate, making it a security control, not a separation method. B is the exception.
Reference:
CMMC Assessment Scope - Level 2, Section 2.2 (Physical Security), p. 4: "Physical separation includes locks and guards, not

monitoring alone."

質問＃146
