

# Mule-Arch-201 Demo Test - Mule-Arch-201 Free Study Material

## Midterm Studying

- From the Introduction to Synthesis 9:
  - What is a "Frame of Reference" with respect to the organization of Synthesis 9?

A "Frame of Reference" is a general concept to pay close attention to during the design process. They are factors to base design choice around along each step of the process, and the 9 frames outlined in Synthesis 9 work together to make a setting functional, beautiful, usable, and practical. The frames of reference aren't something to be tied down by, but rather a guide to get one started or even re-center focus throughout design.

- What does Kleinsasser mean by a "Design Principle"?

Design principles are somewhat of a subcategory of each frame of reference. With each frame of reference comes a set of design principles that break down their frames and serve as more specific indicators for focus. For example, the frame of reference "responding to context" is accompanied by the design principle of "responding to sunlight," since this is one of the ways one can respond to context. Design principles can be seen as a tentative checklist, or a point of checking your work with certain properties that add to a building's life.

- From Paul Goldberger's "Meaning, Culture, and Symbol" be prepared to talk about the idea of an [redacted]

Goldberger's "Meaning, Culture, and Symbol" brings forth the idea of building for a greater purpose. He claims that building's primary function should be to provide space for people and activities, and that it is not purely aesthetic like other forms of art. The idea of "ethical architecture" stems from creating spaces for people and for the future, and he says that great spaces are a necessity rather than a luxury.

- From the Frame of Reference "Responding to Context":
  - Be ready to list and discuss 5 principles (your choice)

- 1) Respond to sunlight, let it in, dramatize it, use it, control it
  - The designer should have a keen eye for the sunlight around the structure, how the light appears during different parts of the day, and how to use natural light to enhance their design whether by embracing it or minimizing it.
- 2) Respond to topography and vegetation

The Salesforce world is changing its dynamics at a fast pace. This trend also impacts the Salesforce Mule-Arch-201 certification exam topics. The new topics are added on regular basis in the Salesforce Mule-Arch-201 exam syllabus. You need to understand these updated Mule-Arch-201 exam topics or any changes in the syllabus. It will help you to not miss a single Salesforce Certified MuleSoft Platform Architect (Mule-Arch-201) exam question in the final exam. The Pass4sures understands this problem and offers the perfect solution in the form of Pass4sures Mule-Arch-201 updated exam questions.

I just want to share with you that here is a valid Mule-Arch-201 exam cram file with 100% pass rate and amazing customer service. If you are not sure about your exam, choosing our Mule-Arch-201 exam cram file will be a good choice for candidates. We sell products by word of mouth. We are famous for our high pass-rate Mule-Arch-201 Exam Cram. If you try to use our study materials one time, you will know how easy to pass exam with our Mule-Arch-201 exam cram file. Our business policy is "products win by quality, service win by satisfaction".

## Free PDF Quiz 2026 High-quality Salesforce Mule-Arch-201: Salesforce Certified MuleSoft Platform Architect Demo Test

Under the instruction of our Mule-Arch-201 exam torrent, you can finish the preparing period in a very short time and even pass the exam successful, thus helping you save lot of time and energy and be more productive with our Salesforce Certified MuleSoft Platform Architect prep torrent. In fact the reason why we guarantee the high-efficient preparing time for you to make progress is mainly attributed to our marvelous organization of the content and layout which can make our customers well-focused and targeted

during the learning process with our Mule-Arch-201 Test Braindumps. The high pass rate of our Mule-Arch-201 exam prep is 99% to 100%.

## Salesforce Certified MuleSoft Platform Architect Sample Questions (Q87-Q92):

### NEW QUESTION # 87

What is typically NOT a function of the APIs created within the framework called API-led connectivity?

- A. They reduce the dependency on the underlying backend systems by helping unlock data from backend systems in a reusable and consumable way.
- B. They allow for innovation at the user interface level by consuming the underlying assets without being aware of how data is being extracted from backend systems.
- C. They can compose data from various sources and combine them with orchestration logic to create higher level value.
- D. **They provide an additional layer of resilience on top of the underlying backend system, thereby insulating clients from extended failure of these systems.**

### Answer: D

Explanation:

Correct Answer: They provide an additional layer of resilience on top of the underlying backend system, thereby insulating clients from extended failure of these systems.

\*\*\*\*\*

In API-led connectivity,

>> Experience APIs - allow for innovation at the user interface level by consuming the underlying assets without being aware of how data is being extracted from backend systems.

>> Process APIs - compose data from various sources and combine them with orchestration logic to create higher level value

>> System APIs - reduce the dependency on the underlying backend systems by helping unlock data from backend systems in a reusable and consumable way.

However, they NEVER promise that they provide an additional layer of resilience on top of the underlying backend system, thereby insulating clients from extended failure of these systems.

### NEW QUESTION # 88

What Anypoint Platform Capabilities listed below fall under APIs and API Invocations/Consumers category? Select TWO.

- A. API Operations and Management
- B. **API Design and Development**
- C. API Consumer Engagement
- D. API Runtime Execution and Hosting

### Answer: B

Explanation:

Correct Answers: API Design and Development and API Runtime Execution and Hosting

\*\*\*\*\*

>> API Design and Development - Anypoint Studio, Anypoint Design Center, Anypoint Connectors

>> API Runtime Execution and Hosting - Mule Runtimes, CloudHub, Runtime Services

>> API Operations and Management - Anypoint API Manager, Anypoint Exchange

# Platform Capabilities

Correct Answers: API Operations and Management and API Consumer Engagement

\*\*\*\*\*

>> API Design and Development - Anypoint Studio, Anypoint Design Center, Anypoint Connectors

>> API Runtime Execution and Hosting - Mule Runtimes, CloudHub, Runtime Services

>> API Operations and Management - Anypoint API Manager, Anypoint Exchange

>> API Consumer Management - API Contracts, Public Portals, Anypoint Exchange, API Notebooks

# Platform Capabilities

## NEW QUESTION # 89

To minimize operation costs, a customer wants to use a CloudHub 1.0 solution. The customer's requirements are:

- \* Separate resources with two Business groups
- \* High-availability (HA) for all APIs

- \* Route traffic via Dedicated load balancer (DLBs)
- \* Separate environments into production and non-production

Which solution meets the customer's needs?

- A. One production and one non-production Virtual Private Cloud (VPC).  
Configure subnet to differentiate between business groups.  
Allocate maximum CIDR per VPCs to make it easier to add Child groups.  
Span VPC to cover three availability zones.
- B. One production and one non-production Virtual Private Cloud (VPC).  
Use availability zones to differentiate between Business groups.  
Allocate maximum CIDR per VPCs to ensure HA across availability zones
- C. One production and one non-production Virtual Private Cloud (VPC) per Business group.  
Minimize CIDR aligning with projected application total.  
Divide availability zones during deployment of APIs for HA.
- D. One production and one non-production Virtual Private Cloud (VPC) per Business group.  
Minimize CIDR aligning with projected application total.  
Choose a MuleSoft CloudHub 1.0 region with multiple availability zones.  
Deploy multiple workers for HA,

**Answer: D**

Explanation:

Understanding the Requirements:

Business Groups: The solution must support two business groups, which typically require separate VPCs for logical separation.

High Availability (HA): Requires deploying resources across multiple availability zones.

Dedicated Load Balancer (DLB): Traffic should be routed via DLBs, which operate within VPCs on CloudHub.

Separate Environments: There needs to be separation between production and non-production environments.

Evaluating the Options:

Option A: Using a single production and non-production VPC and differentiating business groups via availability zones is not ideal as it does not provide full separation for each business group, and using maximum CIDR allocation is wasteful.

Option B (Correct Answer): Creating separate production and non-production VPCs per business group with minimized CIDR blocks, multiple availability zones, and multiple workers per application for HA meets all requirements effectively.

Option C: While this option separates VPCs per business group, it does not fully address the requirement for HA across availability zones by specifying multi-zone deployment only during API deployment, which may not guarantee redundancy.

Option D: Configuring subnets to differentiate business groups within a single production and non-production VPC does not fully separate the business groups, which is a requirement.

Conclusion:

Option B is the best choice as it meets the requirements for high availability, business group separation, and cost efficiency by using minimized CIDR allocations and deploying multiple workers across availability zones.

For further reference, refer to MuleSoft's documentation on VPC configuration and high availability deployment strategies.

## NEW QUESTION # 90

What condition requires using a CloudHub Dedicated Load Balancer?

- A. When API invocations across multiple CloudHub workers must be load balanced
- B. When cross-region load balancing is required between separate deployments of the same Mule application
- C. When custom DNS names are required for API implementations deployed to customer-hosted Mule runtimes
- D. When server-side load-balanced TLS mutual authentication is required between API implementations and API clients

**Answer: D**

Explanation:

Correct Answer: When server-side load-balanced TLS mutual authentication is required between API implementations and API clients

\*\*\*\*\*

Fact/ Memory Tip: Although there are many benefits of CloudHub Dedicated Load balancer, TWO important things that should come to ones mind for considering it are:

>> Having URL endpoints with Custom DNS names on CloudHub deployed apps  
>> Configuring custom certificates for both HTTPS and Two-way (Mutual) authentication.

Coming to the options provided for this question:

>> We CANNOT use DLB to perform cross-region load balancing between separate deployments of the same Mule application.  
>> We can have mapping rules to have more than one DLB URL pointing to same Mule app. But viceversa (More than one Mule app having same DLB URL) is NOT POSSIBLE  
>> It is true that DLB helps to setup custom DNS names for Cloudhub deployed Mule apps but NOT true for apps deployed to Customer-hosted Mule Runtimes.  
>> It is true to that we can load balance API invocations across multiple CloudHub workers using DLB but it is NOT A MUST. We can achieve the same (load balancing) using SLB (Shared Load Balancer) too. We DO NOT necessarily require DLB for achieve it.  
So the only right option that fits the scenario and requires us to use DLB is when TLS mutual authentication is required between API implementations and API clients.

### **NEW QUESTION # 91**

True or False. We should always make sure that the APIs being designed and developed are self-servable even if it needs more man-day effort and resources.

- A. TRUE
- B. FALSE

#### **Answer: A**

Explanation:

Correct Answer: TRUE

\*\*\*\*\*

>> As per MuleSoft proposed IT Operating Model, designing APIs and making sure that they are discoverable and self-servable is VERY VERY IMPORTANT and decides the success of an API and its application network.

### **NEW QUESTION # 92**

.....

Our society needs all kinds of comprehensive talents, the Mule-Arch-201 latest preparation materials can give you what you want, but not just some boring book knowledge, but flexible use of combination with the social practice. Therefore, it is necessary for us to pass the qualification Mule-Arch-201 examinations, the Mule-Arch-201 study practice question can bring you high quality learning platform. If you want to progress and achieve their ideal life, if you still use the traditional methods by exam, so would you please choose the Mule-Arch-201 test materials, it will surely make you shine at the moment.

**Mule-Arch-201 Free Study Material:** <https://www.pass4sures.top/Salesforce-MuleSoft/Mule-Arch-201-testking-braindumps.html>

Hope you can give not only our Mule-Arch-201 training materials but also yourself a chance, Our Salesforce Mule-Arch-201 exam prep files are just suitable for you, Salesforce Mule-Arch-201 Demo Test As long as the syllabus has changed, they need to repurchase new learning materials, To achieve this objective Pass4sures is offering top-notch and real Mule-Arch-201 exam questions in three different formats, They are PDF version, online test engines and windows software of the Mule-Arch-201 practice prep.

Solutions Manual will be available for instructors Mule-Arch-201 Trustworthy Source to download from Pearson.com/us, If you study under the guidance of our Salesforce Mule-Arch-201 pass-sure training materials, you can finish the Mule-Arch-201 Demo Test preparing period in a very short time and pass the exam easily so as to get the certificates.

## **100% Pass Quiz Mule-Arch-201 - Salesforce Certified MuleSoft Platform Architect Pass-Sure Demo Test**

Hope you can give not only our Mule-Arch-201 Training Materials but also yourself a chance, Our Salesforce Mule-Arch-201 exam prep files are just suitable for you, As long Mule-Arch-201 as the syllabus has changed, they need to repurchase new learning materials.

To achieve this objective Pass4sures is offering top-notch and real Mule-Arch-201 exam questions in three different formats, They are PDF version, online test engines and windows software of the Mule-Arch-201 practice prep.
