

2026 New NS0-005 Test Prep & NetApp Technology Solutions Professional Exam Unparalleled Exam Bible

[Pass Network Appliance NS0-005 Exam | Latest NS0-005 Dumps & Practice Exams - Cert007](#)

communication with the clients using NFS or SMB protocols. ONTAP software also provides features such as data protection, efficiency, security, and performance for NAS workloads.
References = NetApp ONTAP, Provision NAS storage for both Windows and Linux using both NFS and SMB

6. Which two NetApp products offer hardware encryption? (Choose two.)

- A. NetApp Storage Encryption (NSE)
- B. NVMe self-encrypting drives (SED)
- C. NetApp Aggregate Encryption (NAE)
- D. NetApp Volume Encryption (NVE)

Answer: A

Explanation:

NetApp Storage Encryption (NSE) and NVMe self-encrypting drives (SED) are two NetApp products that offer hardware encryption. Hardware encryption is a method of encrypting data at the disk level using a hardware-accelerated mechanism. NSE requires all drives in an HA pair to be purpose-built, self-encrypting drives. These drives perform the data encryption themselves through a hardware-accelerated mechanism. Because of the hardware acceleration, NSE systems usually outperform NVE systems when encrypting data¹. NVMe self-encrypting drives (SED) are a type of NSE drives that use the NVMe protocol to provide high performance and low latency. NVMe SEDs are supported on select NetApp AFF systems².

7. Which NetApp BlueXP product enables a customer to provide read and write access to remote Windows servers from a centralized datastore?

- A. BlueXP copy and sync
- B. BlueXP edge caching
- C. BlueXP tiering
- D. Cloud Volumes ONTAP

Answer: B

Explanation:

BlueXP edge caching is a NetApp BlueXP product that enables a customer to provide read and write access to remote Windows servers from a centralized datastore. BlueXP edge caching allows you to cache data from a BlueXP volume or a Cloud Volume ONTAP system on a local Windows server, which improves the performance and availability of your applications. You can also sync the cached data back to the source volume, ensuring data consistency and protection.

References = BlueXP edge caching overview, BlueXP edge caching documentation, BlueXP edge caching: Accelerate access to your data

8. A customer wants to use cloud storage as part of their data strategy. Their existing storage is a mixture of NFS and SMB workloads. The customer wants a managed service to help provision these resources. Which solution should the customer choose?

4 / 5

We attach importance to candidates' needs and develop the NS0-005 useful test files from the perspective of candidates, and we sincerely hope that you can succeed with the help of our practice materials. Our aim is to let customers spend less time to get the maximum return. By choosing our NS0-005 study guide, you only need to spend a total of 20-30 hours to deal with exam, because our NS0-005 Study Guide is highly targeted and compiled according to the syllabus to meet the requirements of the exam. As long as you follow the pace of our NS0-005 useful test files, you will certainly have unexpected results.

Network Appliance NS0-005 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Data Storage Software: This domain focuses on NetApp's core software platforms including SANtricity, ONTAP, and StorageGRID, along with the data management tools used to operate these systems.
Topic 2	<ul style="list-style-type: none">• Infrastructure: This domain covers foundational concepts including basic infrastructure components, data management principles, virtualization technologies, and AI fundamentals relevant to storage environments.

Topic 3	<ul style="list-style-type: none"> Intelligent Data Infrastructure: This domain addresses advanced solutions including cyber resiliency, data mobility, hybrid cloud protection, storage architectures, and flexible consumption models for NetApp.

Network Appliance New NS0-005 Test Prep - Latest-updated NS0-005 Exam Bible and Useful Latest NetApp Technology Solutions Professional Exam Test Objectives

Our NS0-005 study materials are the accumulation of professional knowledge worthy practicing and remembering. There are so many specialists who join together and contribute to the success of our NS0-005 guide quiz just for your needs. As well as responsible and patient staff who has being trained strictly before get down to business and interact with customers on our NS0-005 Exam Questions. You can contact with our service, and they will give you the most professional guide.

Network Appliance NetApp Technology Solutions Professional Exam Sample Questions (Q179-Q184):

NEW QUESTION # 179

The NetApp Cloud Compliance service scans data from which two data sources? (Choose two.)

- A. Cloud Volumes ONTAP
- B. Azure Ultra Disk
- C. Microsoft OneDrive
- D. Amazon S3 Glacier

Answer: A,D

NEW QUESTION # 180

You are required to use data-at-rest encryption on a NetApp ONTAP system. You want to maintain cross-volume storage efficiencies.

Which three technologies would accomplish this task? (Choose three.)

- A. NetApp self encrypting drives
- B. NetApp Cluster peering encryption
- C. NetApp Volume Encryption
- D. NetApp Aggregate Encryption
- E. NetApp Storage Encryption

Answer: C,D,E

NEW QUESTION # 181

A customer wants to use FabricPool technology with NetApp StorageGRID. All objects must be erasure coded. What is the minimum number of sites required to deploy the StorageGRID solution while providing site redundancy?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

FabricPool is an ONTAP feature that tiers inactive data to an object store such as StorageGRID. StorageGRID uses erasure coding to protect data by slicing an object into data fragments and parity fragments, and spreading them across Storage Nodes. To use

erasure coding, the storage pool must include three or more sites, or exactly one site. Two sites are not supported. Therefore, the minimum number of sites required to deploy the StorageGRID solution with FabricPool and erasure coding is three.
References = Configuring StorageGRID for FabricPool, What erasure-coding schemes are

NEW QUESTION # 182

A customer is considering NetApp BlueXP backup and recovery. They want the ability to restore entire logical sets of data and to drill down and restore from a more granular level of their file system.

Which two restore capabilities does BlueXP backup and recovery provide to meet these restore demands? (Choose two.)

- A. object
- **B. volume**
- C. SVM
- **D. file**
- E. aggregate

Answer: B,D

Explanation:

BlueXP backup and recovery enables you to perform volume, file, and folder-level restore operations from the cloud or on-premises object store. You can restore entire volumes or specific files or folders from any backup file. You can also use the catalog search feature to find and restore files based on a query.

References = Learn about BlueXP backup and recovery, BlueXP backup and recovery APIs, [Restore data from the cloud]

NEW QUESTION # 183

A customer wants a storage solution with a zero RPO and near-zero RTO for all their NAS workloads. Which NetApp solution meets these needs?

- **A. MetroCluster over IP**
- B. SnapMirror Synchronous (SM-S)
- C. storage VM disaster recovery (SVM DR)
- D. SnapMirror Business Continuity (SMBC)

Answer: A

NEW QUESTION # 184
