Real SAP C-CPI-2506 Exam Questions with Accurate Answers

More and more people hope to enhance their professional competitiveness by obtaining C-CPI-2506 certification. However, under the premise that the pass rate is strictly controlled, fierce competition makes it more and more difficult to pass the C-CPI-2506 examination. In order to guarantee the gold content of the C-CPI-2506 Certification, the official must also do so. However, it is an indisputable fact that a large number of people fail to pass the C-CPI-2506 examination each year, some of them may choose to give it up while others may still choose to insist.

SAP C-CPI-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Topic 2	• SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.

Topic 3	• SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.
Topic 4	• Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.

C-CPI-2506 exam dumps, C-CPI-2506 PDF VCE, C-CPI-2506 Real Questions

There is an old saying goes, the customer is king, so we follow this principle with dedication to achieve high customer satisfaction on our C-CPI-2506 exam questions. First of all, you are able to make full use of our C-CPI-2506 learning dumps through three different versions: PDF, PC and APP online version. For each version, there is no limit and access permission if you want to download our C-CPI-2506study materials, and it really saves a lot of time for it is fast and convenient.

SAP Certified Associate - Integration Developer Sample Questions (Q34-Q39):

NEW QUESTION # 34
Which SAP offering manages integrations across hybrid and multicloud environments?

- A. SAP Integration Suite manages integrations across hybrid and multicloud environments.
- B. SAP process Orchestration manages integrations across hybrid and multicloud environments.
- C. SAP Business Technology Platform manages integrations across hybrid and multicloud environments.
- D. SAP Cloud Platform Integration manages integrations across hybrid and multicloud environments.

Answer: A

Explanation:
SAP Integration Suite is the strategic integration platform-as-a-service (iPaaS) from SAP. It provides a comprehensive set of integration capabilities for hybrid and multicloud landscapes.
It connects on-premise SAP systems, cloud SAP solutions (e.g., S/4HANA Cloud, SuccessFactors, Ariba), and third-party applications.
It offers capabilities like Cloud Integration, API Management, Event Mesh, Open Connectors, and Integration Advisor to support various integration patterns.
SAP explicitly positions Integration Suite as the solution to manage end-to-end integrations across heterogeneous and distributed IT landscapes.
Other options:
SAP Cloud Platform Integration was the older name of Cloud Integration (now part of Integration Suite).
SAP Process Orchestration is the legacy on-premise middleware and not designed for multicloud/hybrid environments.
SAP BTP is the overall platform; integration is only one capability within it.

NEW QUESTION # 35
In the SAP Integration Suite, where can you change the virtual host name?

- A. Discover - APIs
- B. Configure ? APIs
- C. Design APIs
- D. Settings APIs

Answer: D

Explanation:
In the SAP Integration Suite, you can change the virtual host name in the Settings APIs. The Settings APIs allow you to configure various aspects of your API provider, such as the virtual host name, the base path, the authentication method, and the CORS settings. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 36
What are some aspects of "holistic integration" of the SAP Integration Suite? Note: 3 answers are correct.

- A. Process Integration
- B. Cloud Integration
- C. Data Integration
- D. Event Integration
- E. Domain Integration

Answer: A,C,D

Explanation:
Some aspects of "holistic integration" of the SAP Integration Suite are process integration, event integration, and data integration. Process integration refers to the orchestration and automation of business processes across different systems and applications. Event integration refers to the communication and coordination of events between different sources and consumers. Data integration refers to the extraction, transformation, and loading of data between different sources and targets. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 37
How does the increased number of API calls in a microservices architecture impactAP I management and monitoring within an SAP Integration Suite landscape?

- A. performance, security and traceability across the distributed microservices.
- B. Increased API calls necessitate less robust API management tools and simplified monitoring capabilities within the SAP Integration Suite.
- C. Increased API calls improve API management efficiency and reduce the need for extensive monitoring within the SAP Integration Suite.
- D. Reduced API calls simplify API management and minimize monitoring needs within the SAP Integration Suite.
- E. Increased API calls necessitate more robust API management tools and comprehensive monitoring capabilities within the SAP Integration Suite tensure

Answer: E

Explanation:
In a microservices architecture, applications are decomposed into multiple smaller services communicating via APIs. This results in:
Increased API traffic due to inter-service communication.
Higher need for governance: enforcing policies, security, throttling, and quotas.
Comprehensive monitoring required to trace calls across multiple distributed services to ensure performance, reliability, and compliance.
SAP Integration Suite's API Management provides these capabilities:
Traffic management (quotas, rate limiting).
Security policies (OAuth, API keys).
End-to-end monitoring & analytics for distributed calls.
Thus, the correct answer highlights the need for more robust API management and monitoring in high- volume, microservices-driven landscapes.

NEW QUESTION # 38
Which combination of SAP BTP role collections allows a user to manage queues and topic subscriptions in SAP Event Mesh, and monitor its usage and resources?

- A. SecurityAdmin and SecurityDevelop
- B. EventMeshAdmin and EventMeshDevelop

- C. ApplicationAdmin and ApplicationDevelop
- D. IntegrationAdmin and IntegrationDevelop

Answer: B

Explanation:
In SAP BTP, SAP Event Mesh provides messaging capabilities (queues, topics, and subscriptions) that require specific role collections to enable developers and administrators to perform tasks. SAP delivers two dedicated role collections for Event Mesh:
EventMeshDeveloper:
Manages queues and topic subscriptions
Monitors Event Mesh and its queues
Performs testing of queues and message flows
EventMeshAdmin:
Includes all developer capabilities
Provides additional administration rights for lifecycle management of Event Mesh instances and configurations When a user is assigned these role collections, they gain the ability to:
Create and manage queues and topic subscriptions.
Monitor usage and resources such as queue depth, consumers, connections, and spool size within Event Mesh.
Other provided options are incorrect:
ApplicationAdmin/ApplicationDevelop # These are not SAP Event Mesh role collections, they do not provide queue or topic subscription access.
SecurityAdmin/SecurityDevelop # These roles are tied to security configurations and do not allow Event Mesh operations.
IntegrationAdmin/IntegrationDevelop # These roles belong to SAP Integration Suite (Cloud Integration) capability, not Event Mesh.
Therefore, the correct and verified answer according to SAP Integration Developer documentation is:
B). EventMeshAdmin and EventMeshDevelop

NEW QUESTION # 39
......

C-CPI-2506 training materials have now provided thousands of online test papers for the majority of test takers to perform simulation exercises, helped tens of thousands of candidates pass the C-CPI-2506 exam, and got their own dream industry certificates C-CPI-2506 exam questions have an extensive coverage of test subjects and have a large volume of test questions, and an online update program. C-CPI-2506 Study Material has a high quality service team. First of all, the authors of study materials are experts in the field. They have been engaged in research on the development of the industry for many years, and have a keen sense of smell for changes in the examination direction.
